(57) **CLAIM**

The ornamental design for a tire tread, as shown and
described.

DESCRIPTION

FIG. 1 is a perspective view of a tire tread showing our new
design, it being understood that the tread pattern continues
circumferentially throughout the outer circumference and
shoulder of the tire, the opposite perspective view being iden-
tical thereto;

FIG. 2 is a full front elevation view of the tire tread thereof of
FIG. 1; and,

FIG. 3 is a side view of the tire tread thereof of FIG. 1.

In the drawings, the dark stippled surface shading represents
the recessed groove portions of the tire tread having a depth as
best illustrated along the top and bottom edges of FIG. 2. The
broken line disclosure of the tire sidewall and inner bead is for
illustrative purposes only and forms no part of the claimed
design.
