(57) **CLAIM**

I claim the ornamental design for a web material adapted to connect to a mop, as shown and described.

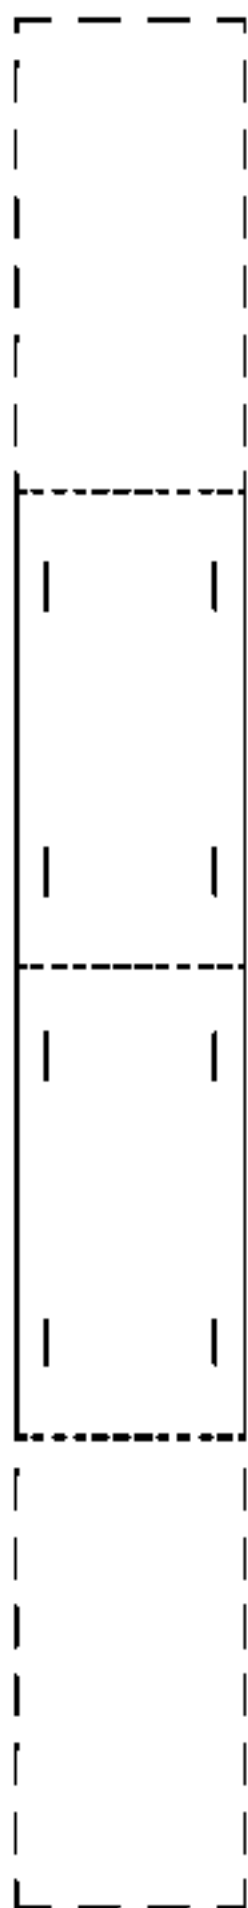

DESCRIPTION

The FIGURE is a top view of a web material adapted to connect to a mop showing my new design.

The broken lines showing the two end portions are for the purpose of illustrating unclaimed portions and form no part of the claimed design. The smaller broken lines that line the ends and center of the claimed portion are for the purpose of illustrating perforation and form part of the claimed design. The eight dashes within the claimed portion are for the purpose of illustrating cuts and form part of the claimed design. Views which are not illustrated do not form any part of the design.

As illustrated, the web material is perforated to allow separation of one or more portions of the web material. Also, the web material has a plurality of cuts in the longitudinal direction to provide attachment locations with a mop.
