(57) **CLAIM**

An ornamental design for a vehicle fog light bezel, shown and described.

DESCRIPTION

FIG. **1** is a front elevational view of a left vehicle fog light bezel (both the left and right headlight being mirror images and only one is shown);

FIG. **2** is left side elevational view of the vehicle fog light bezel;

FIG. **3** is right side elevational view of the vehicle fog light bezel;

FIG. **4** is a top plan view of the vehicle fog light bezel;

FIG. **5** is a bottom plan view of the vehicle fog light bezel; and,

FIG. **6** is rear elevational view of the vehicle fog light bezel.

The vehicle fog light bezel is styled independently of adjacent vehicle panels. Shading is used to illustrate the curvature of the part and not color. Any functional features of the vehicle fog light bezel are not claimed. Views are orthogonal projections rendered from computer aided design data. The various views are not necessarily to scale in order to better illustrate the design.
