(57) **CLAIM**

The ornamental design for a horizontal adjustable pad for a window curtain rail, as shown and described.

DESCRIPTION

The present design provides an adjustable pad for adjusting the horizontal of a window curtain rail. The adjustable pad has two legs, each leg has a full length and can be broken into a middle length or a short length.

FIG. 1 is a perspective view of a horizontal adjustable pad for a window curtain rail;

FIG. 2 is a top view thereof;

FIG. 3 is a bottom view thereof;

FIG. 4 is a right side view thereof;

FIG. 5 is a left side view thereof;

FIG. 6 is a front view thereof;

FIG. 7 is a rear view thereof;

FIG. 8 is an illustration top view showing that the adjustable pad of the design is used in a full-length state and is installed in a window curtain rail, the broken line forming the window curtain rail forming no part of the claim;

FIG. 9 is a front view of FIG. 8, the broken line forming the window curtain forming no part of the claim;

FIG. 10 is an illustration top view showing that the adjustable pad of the design is broken and used in a middle-length state and is installed in a window curtain rail, the broken line forming the window curtain rail forming no part of the claim; and,

FIG. 11 is an illustration top view showing that the adjustable pad of the design is broken and used in a short-length state and is installed in a window curtain rail, the broken line forming the window curtain rail forming no part of the claim.
