(57) **CLAIM**

The ornamental design for a portable front projection screen, as shown and described.

DESCRIPTION

FIG. 1 is a front perspective view of the portable front projection screen in an open viewing configuration showing our design;

FIG. 2 is a front view thereof;

FIG. 3 is a top open view thereof;

FIG. 4 is a back open view thereof;

FIG. 5 is a bottom end view thereof;

FIG. 6 is a side open view (with the other side view being a mirror image thereof and is not shown);

FIG. 7 is a front perspective closed view;

FIG. 8 is a closed side view thereof;

FIG. 9 is a closed top end view thereof;

FIG. 10 is a closed front view thereof;

FIG. 11 is an unfolded side perspective view; and,

FIG. 12 is a front perspective view of the portable front projection screen in a viewing configuration, where the broken lines showing the projector are included for the purpose of illustrating environmental purpose only and forms no part of the claimed design. The additional broken lines between the screen and the projector indicate the path in optical communication.
