(57) **CLAIM**

The ornamental design for a TV and stand, as shown and described.

DESCRIPTION

FIG. 1 is an isometric view of a TV and stand showing an embodiment of our new design.

FIG. 2 is a front elevational view thereof.

FIG. 3 is a rear elevational view thereof.

FIG. 4 is a top plan view thereof.

FIG. 5 is a bottom plan view thereof.

FIG. 6 is a right side elevational view thereof.

FIG. 7 is a left side elevational view thereof; and,

FIG. 8 is a front elevational view of a TV and stand showing another embodiment of our new design: a mirror-image configuration. Apart from differences arising from the extended portion of the front TV face being relocated from the right-side, as shown in FIGS. 1 and 2, to the left-side, as shown in FIG. 8, all features in the alternate embodiment remain as shown in FIGS. 3-7.

The broken lines in the figures are for illustrative proposes only and form no part of the claimed design. Further, the rectangles shown in broken lines in FIGS. 1, 2, 4 and 8 represent the position where input controls for the TV may be located.

1 Claim, 8 Drawing Sheets
