FIG. 1 is a perspective view of a center tread for a tire showing
our new design, it being understood that the pattern repeats
uniformly throughout the circumference of the tire;

FIG. 2 is a front elevational view thereof;

FIG. 3 is a right side elevational view thereof, the left side
elevational view being identical thereto; and,

FIG. 4 is an enlarged fragmentary front elevational view
thereof.

The broken lines defining the sidewall, inner bead and the
peripheral boundary between the tire tread and the sidewall
are for illustrative purposes only and form no part of the
claimed design. Any broken line areas which appear within
the shaded, center portion of the design illustrate sipes which
are part of the claimed design.
