(57) **CLAIM**

The ornamental design for a shoulder tread for a tire, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a shoulder tread for a tire showing our new design, it being understood that the pattern repeats uniformly throughout the circumference of the tire;

FIG. 2 is a front elevational view thereof;

FIG. 3 is a right side elevational view thereof, the left side elevational view being identical thereto; and,

FIG. 4 is an enlarged fragmentary front elevational view thereof.

In the drawings, the broken lines defining the center tread, sidewall, inner bead and the peripheral boundary between the shoulder tread for a tire and the sidewall are for illustrative purposes only and form no part of the claimed design.
