(57) **CLAIM**

The ornamental design for specimen container, as shown and described.

DESCRIPTION

FIG. 1 is a first perspective view of the specimen container having a pivoting handle in an extended position, whereas the

first perspective view shows a top, rear and right side of the container;

FIG. 2 is a second perspective view of the specimen container in which the handle is extended, whereas the second perspective view shows the top, front and right side of the container;

FIG. 3 is top view of the specimen container with the handle extended;

FIG. 4 is bottom view of the specimen container with the handle extended;

FIG. 5 is a front view of the specimen container with the handle extended;

FIG. 6 is a right side view of the specimen container showing the handle in the extended position, and a left side view of the specimen container with the handle extended is a mirror image of FIG. 6;

FIG. 7 is a rear view of the specimen container;

FIG. 8 is a third perspective view of the specimen container in which the handle is folded against a cylindrical sidewall of the container, where the third perspective view shows the top, front and right side of the container;

FIG. 9 is top view of the specimen container with the handle folded;

FIG. 10 is bottom view of the specimen container with the handle folded;

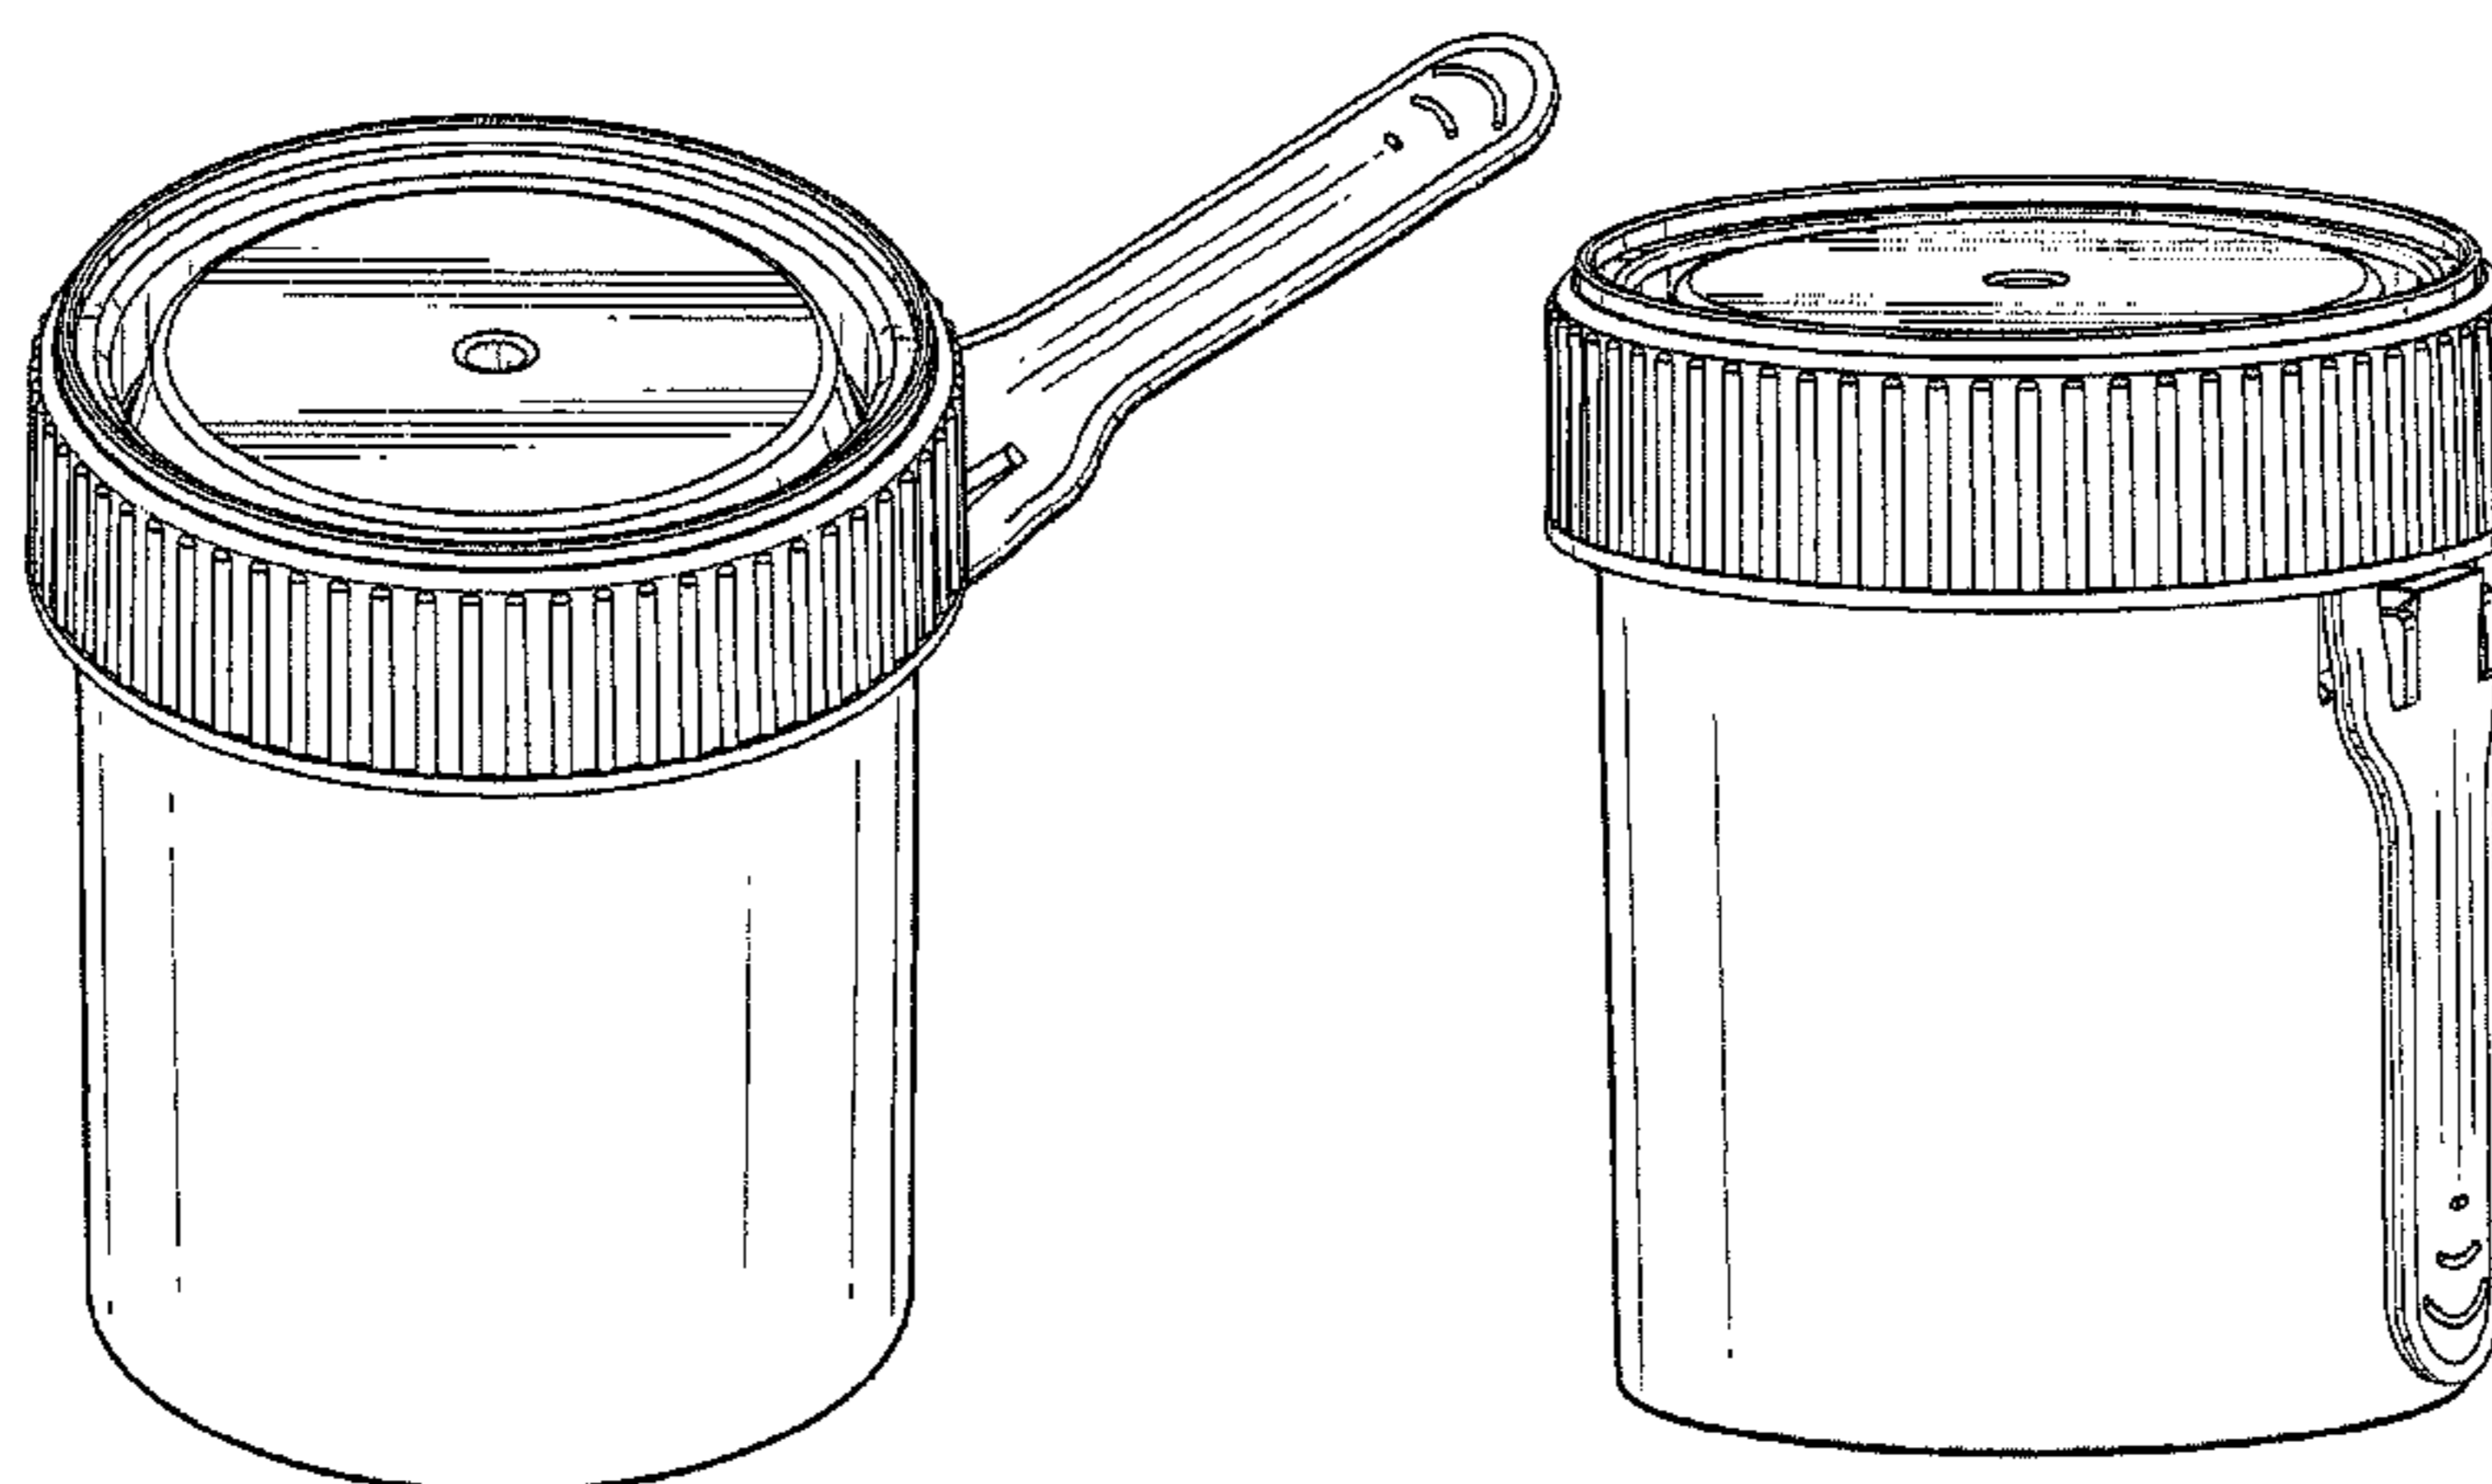

FIG. 11 is a front view of the specimen container with the handle folded;

FIG. 12 is a right side view of the specimen container with the handle folded, and a left side view of the specimen container with the handle folded is a mirror image of FIG. 12; and,

FIG. 13 is an exploded view of the specimen container in which a removable top is shown separately from a container body and the handle is extended from the container body, whereas the exploded view shows the top, front and right side of the container body and top.

The broken lines shown are included for the purpose of illustrating portions of the specimen container that form no part of the claimed design.
