DESCRIPTION

FIG. 1 is a bottom perspective view of the vegetation blade.

FIG. 2 is a top perspective view of the vegetation blade.

FIG. 3 is front view of the vegetation blade.

FIG. 4 is a side view of the vegetation blade.

FIG. 5 is a bottom view of the vegetation blade; and,

FIG. 6 is a cross sectional view of the vegetation blade taken
along line 6—6.

The broken line showing of two segments of flexible cutting
material is included for the purpose of illustrating location of
said segments, which are required for the vegetation blade to
function.

Vegetation blade is a one-piece article in the general shape of
a disc. Two segments of flexible cutting material must be
attached thereto and are required for the vegetation blade to
cut vegetation. It is a lawnmower blade used to cut vegetation.
It is a replacement blade for any conventional lawnmower
blade because it is reversibly attachable to any conventional
lawnmower, including those that use multiple blades.
