**CLAIM**

The ornamental design for an electronic device, as shown and described.

**DESCRIPTION**

A portion of the disclosure of this patent document contains or may contain material which is subject to copyright protection. The copyright owner has no objection to the photocopy reproduction by anyone of the patent document or the patent disclosure in exactly the form it appears in the Patent and Trademark Office patent file or records, but otherwise reserves all copyright rights whatsoever.

This application is related to the following commonly-owned co-pending patent applications:

(a) U.S. patent application Ser. No. 11/315,830, filed on Dec. 22, 2005, entitled “Electronic Device Having A Movable Input Assembly With Multiple Input Sides”;

(b) U.S. patent application Ser. No. 11/509,392, filed on Aug. 24, 2006, entitled “Electronic Device Having An Input Device Movable Inward/Outward and About An Axis”;

(c) U.S. patent application Ser. No. 11/787,999, filed on Apr. 17, 2007, entitled “Assembly Having a Main Unit and a Mounting Unit”; and

(d) U.S. patent application Ser. No. 29/285,998, filed on Apr. 17, 2007, entitled “Electronic Device.”

FIG. 1 is a front elevation view of the electronic device shown mounted to a vertical structure wherein the input device of the electronic device is shown in a closed position;

FIG. 2 is a right, front, side perspective view thereof;

FIG. 3 is a left, front, side perspective view thereof;

FIG. 4 is a front elevation view thereof wherein the input device of the electronic device is shown in an opened position;

FIG. 5 is a right, front, side perspective view thereof;

FIG. 6 is a left, front, side perspective view thereof;

FIG. 7 is a front elevation view thereof shown supported by a substantially horizontal support surface wherein the input device of the electronic device is shown in a closed position;

FIG. 8 is a right, front, side perspective view thereof;

FIG. 9 is a left, front, side perspective view thereof;

FIG. 10 is a front elevation view thereof shown supported by a substantially horizontal support surface wherein the input device of the electronic device is shown in an opened position;

FIG. 11 is a right, front, side perspective view thereof; and,

FIG. 12 is a left, front side perspective view thereof.

Broken lines shown in the drawings illustrate portions of the electronic device and the vertical horizontal support surfaces, and form no part of the claimed design.
