(57) **CLAIM**

The ornamental design for an ergonomic histology station, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of the histology station with the drawer open and the lid removed.

FIG. 2 is a top view of the histology station, with the lid removed, and the drawer closed.

FIG. 3 is a rear elevational view of the histology station, with the lid removed, and the drawer closed.

FIG. 4 is a front elevational view of the histology station, with the lid removed, and the drawer closed.

FIG. 5 is a right side elevational view of the histology station, with the lid removed and the drawer closed.

FIG. 6 is a left side elevational view of the histology station, with the lid removed and the drawer closed.

FIG. 7 is a bottom view of the histology station

FIG. 8 is a top view of the lid of the histology station.

FIG. 9 is a bottom view of the lid of the histology station.

FIG. 10 is a perspective view of the histology station, with the lid on, and the drawer closed; and,

FIG. 11 is a right side elevational view of the histology station, with the lid removed, the drawer closed, and showing the station feet capable of swiveling.

The purpose of the broken lines in the drawings is to show the environmental structure, and form no part of the design to be patented.
