(57) **CLAIM**

The ornamental design for a ring light fixture and tubular mount combination, as shown and described.

DESCRIPTION

FIG. 1 is an upper side perspective view of a light fixture and tubular mount of the present invention, with the portions of this Figure shown in phantom lines not forming a part of the claimed design;

FIG. 2 is a top plan view of a light fixture and tubular mount of the present invention, with the portions of this Figure shown in phantom lines not forming a part of the claimed design;

FIG. 3 is a bottom plan view of a light fixture and tubular mount of the present invention, with the portions of this Figure shown in phantom lines not forming a part of the claimed design;

FIG. 4 is a side elevation view of a first lateral side of the light fixture and tubular mount of the present invention, and of which FIG. 5 is the reverse side thereof, with the portions of this Figure shown in phantom lines not forming a part of the claimed design;

FIG. 5 is a side elevation view of a second lateral side of the light fixture and tubular mount of the present invention, and of which FIG. 4 is the reverse side thereof, with the portions of this Figure shown in phantom lines not forming a part of the claimed design;

FIG. 6 is a side elevation view of a third lateral side of the light fixture and tubular mount of the present invention, and of which FIG. 7 is the reverse side thereof, with the portions of this Figure shown in phantom lines not forming a part of the claimed design;

FIG. 7 is a side elevation view of a fourth lateral side of the light fixture and tubular mount of the present invention, and of which FIG. 6 is the reverse side thereof, with the portions of this Figure shown in phantom lines not forming a part of the claimed design; and,

FIG. 8 is an upper side perspective view of two of the light fixtures and tubular mounts of the present invention, in two orientations, with the portions of this Figure shown in phantom lines not forming a part of the claimed design, shown as part of the front suspension fork of a motorcycle (shown in phantom), it being understood that the broken lines are for illustrative purposes only, and not forming a part of the claimed design. It is also understood that a second fixture is shown for illustrative purposes only and the claim is directed to only the single ring light fixture and tubular mount combination.
