(57) **CLAIM**

The ornamental design for scaffolding equipment, as shown and described.

DESCRIPTION

FIG. **1** is a top perspective view from one side of a first embodiment of a cross-piece forming part of the scaffolding equipment.

FIG. **2** is a side view of the cross-piece shown in FIG. **1**,

FIG. **3** is a top view of the cross-piece shown in FIG. **1**,

FIG. **4** is a bottom view of the cross-piece shown in FIG. **1**,

FIG. **5** is a bottom perspective view from the other side of the cross-piece shown in FIG. **1**,

FIG. **6** is a top perspective view from one side of a second embodiment of a cross-piece forming part of the scaffolding equipment.

FIG. **7** is a top view of the cross-piece shown in FIG. **6**,

FIG. **8** is a bottom perspective view from the other side and one end of the cross-piece shown in FIG. **6**,

FIG. **9** is another bottom perspective view from the other side and the other end of the cross-piece shown in FIG. **6**,

FIG. **10** is a top and front perspective view of a cross-piece end member forming part of the scaffolding equipment and being used on the cross-pieces as shown on FIGS. **1**–**5** and **6**–**9**,

FIG. **11** is a top, rear perspective view of the cross-piece end member of FIG. **10** as seen from one end thereof.

FIG. **12** is a bottom, rear perspective view of the cross-piece end member of FIG. **10** as seen from the other end thereof.

FIG. **13** is a bottom view of a main member of the cross-piece shown in FIGS. **1**–**5** and **6**–**9**, respectively, and forming part of said scaffolding equipment.

FIG. **14** is an top view of the main member shown in FIG. **13**,

FIG. **15** is an end view of the main member shown in FIG. **13**.

FIG. **16** is a side view of the main member shown in FIG. **13**; and,

FIG. **17** is a bottom perspective view of a safety-catch member forming part of the scaffolding equipment for attachment to the crosspiece.
