(57) CLAIM

The ornamental design for an organ model case with digital media storage tray, as shown and described.

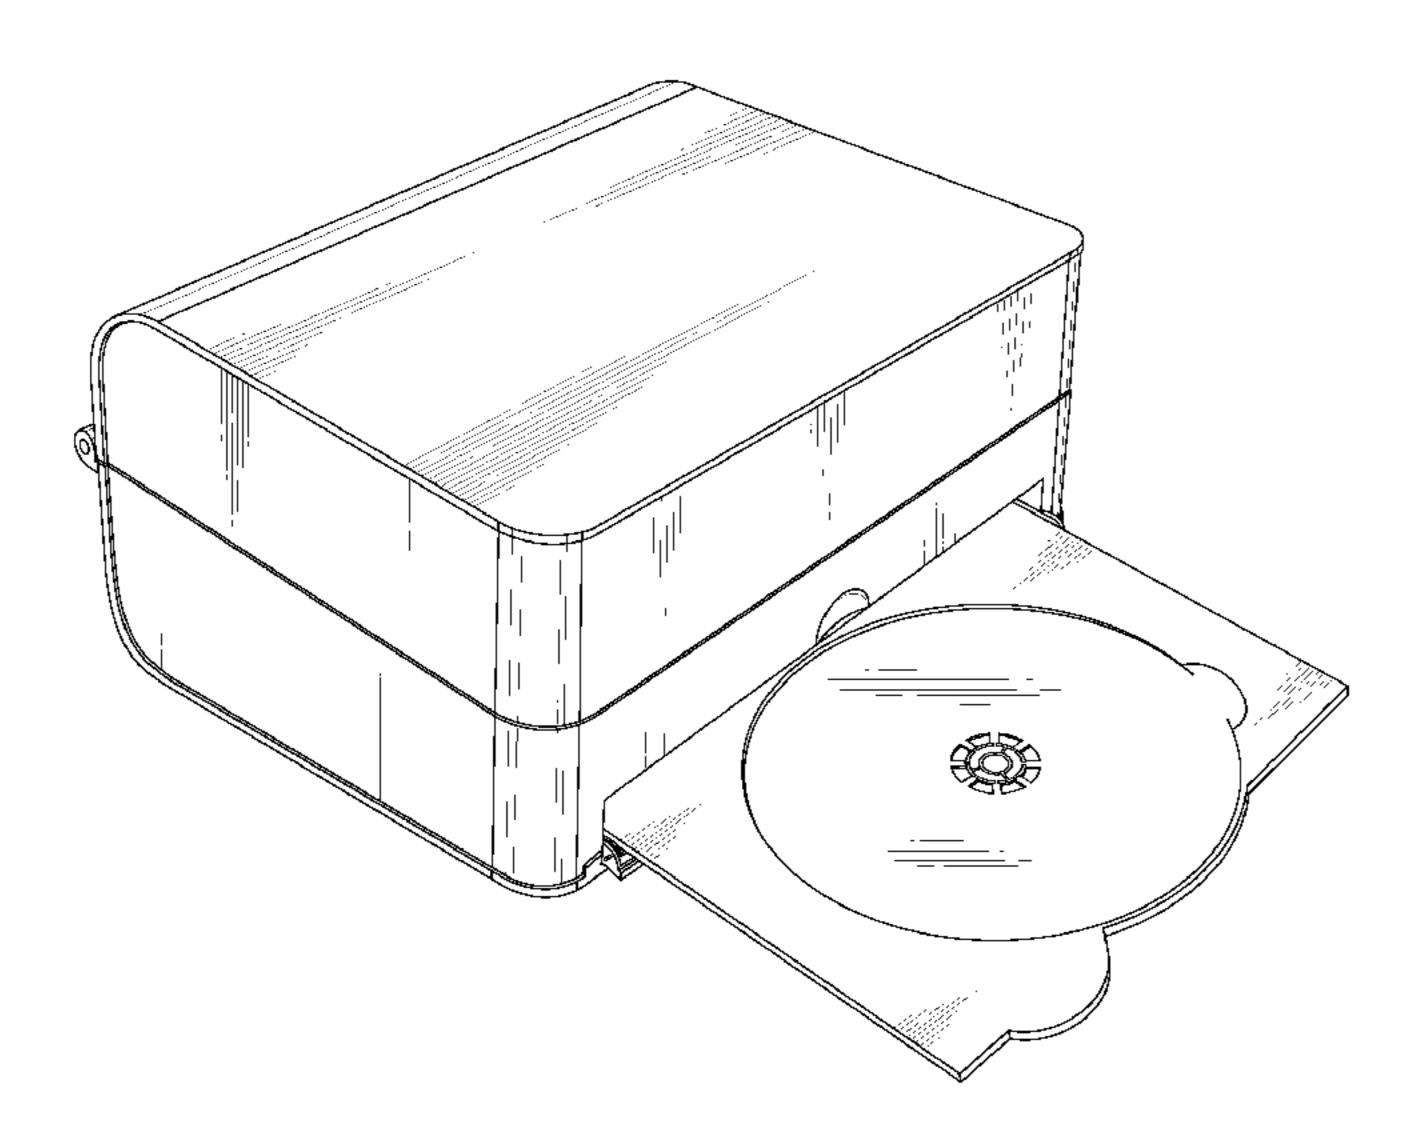

DESCRIPTION

- FIG. 1 is a perspective view of the organ model case with digital media storage tray showing the new design;
- FIG. 2 is a top view of the organ model case with digital media storage tray.
- FIG. 3 is a bottom view of the organ model case with digital media storage tray.
- FIG. 4 is a left side view of the organ model case with digital media storage tray.
- FIG. 5 is a right side view of the organ model case with digital media storage tray.
- FIG. 6 is a rear view of the organ model case with digital media storage tray.
- FIG. 7 is a front view of the organ model case with digital media storage tray.
- FIG. 8 is a perspective view of the organ model case with digital media storage tray, with the digital media storage tray extended to an open position; and,
- FIG. 9 is a perspective view of the organ model case with digital media storage tray, with the case in an open position to display the organ model.

The ornamental design which is claimed is shown in solid lines in the drawings. The broken lines in the drawings are for illustrative purposes only and form no part of the claimed design.

The invention relates to a case for storing, transporting and displaying organ models.
