150/113–114, 118–119

My purse design is characterized by the unique cut out front design to display the multiple colors of swatches that can be inserted inside of the purse. Creating a coordinated look with the carriers' ensemble without having to change purses.

See application file for complete search history.

The purse has a unique design cut out of the front through the fabric making the design visible inside the purse. Inside the front of the purse is a pocket covering the cut out design. In this pocket, swatches of different colors made of the same fabric as the outside of the purse can be inserted. These swatches can be interchangeable to match the carriers' ensemble.
