(57) **CLAIM**

The ornamental design for a tri-rail accessory mount on telescopic sight, as shown and described.

DESCRIPTION

FIG. **1** is a perspective view of the tri-rail accessory mounts on a telescopic sight in which the dashed lines represent environmental setting of the three accessory mounts which are together claimed.

FIG. **2** is a perspective view of the claimed tri-rail accessory mounts and of the telescopic sight of FIG. **1** in which the dashed lines represent the environmental setting only.

FIG. **3** is a top plan view of the tri-rail accessory mounts on the telescopic sight of FIG. **1** with the objective end facing right in which the dashed lines represent the environmental setting only.

FIG. **4** is a right side elevation view of the tri-rail accessory mounts on the telescopic sight of FIG. **1** in which the dashed lines represent the environmental setting only.

FIG. **5** is a bottom plan view of the tri-rail accessory mounts on the telescopic sight of FIG. **1** with the objective end facing right and in which the dashed lines represent the environmental setting only.

FIG. **6** is a left side elevation view of the tri-rail accessory mounts on the telescopic sight of FIG. **1** in which the dashed lines represent the environmental setting only.

FIG. **7** is a front elevation view of the tri-rail accessory mounts on the telescopic sight of FIG. **1** in which the dashed lines represent the environmental setting only; and,

FIG. **8** is a perspective view of the tri-rail accessory mounts from the front right of the bottom of the telescopic sight of FIG. **1** in which the dashed lines represent the environmental setting only.

The environmental structure depicted in dashed lines forms no part of the claimed design.
