(57) **CLAIM**

The ornamental design for a combination airflow control and spark arrestor assembly for a cooker, as shown and described.

DESCRIPTION

FIG. 1 is a front perspective view of my combination airflow control and spark arrestor assembly for a cooker according to my design;

FIG. 2 is a front elevational view of the combination airflow control and spark arrestor of the combination airflow control and spark arrestor assembly both in fully retracted positions according to my design;

FIG. 3 is a front elevational view of the combination airflow control and spark arrestor assembly for a cooker with the cover plate of the combination airflow control and spark arrestor assembly in a fully retracted position and the spark arrestor of the combination airflow control and spark arrestor assembly in a non-retracted position according to my design;

FIG. 4 is a front elevational view of the combination airflow control and spark arrestor assembly for a cooker with the cover plate of the combination airflow control and spark arrestor assembly in a partially retracted position and the spark arrestor of the combination airflow control and spark arrestor assembly in a non-retracted position according to my design;

FIG. 5 is a front elevational view of the combination airflow control and spark arrestor assembly for a cooker with the cover plate and spark arrestor of the combination airflow control and spark arrestor assembly both in non-retracted positions according to my design;

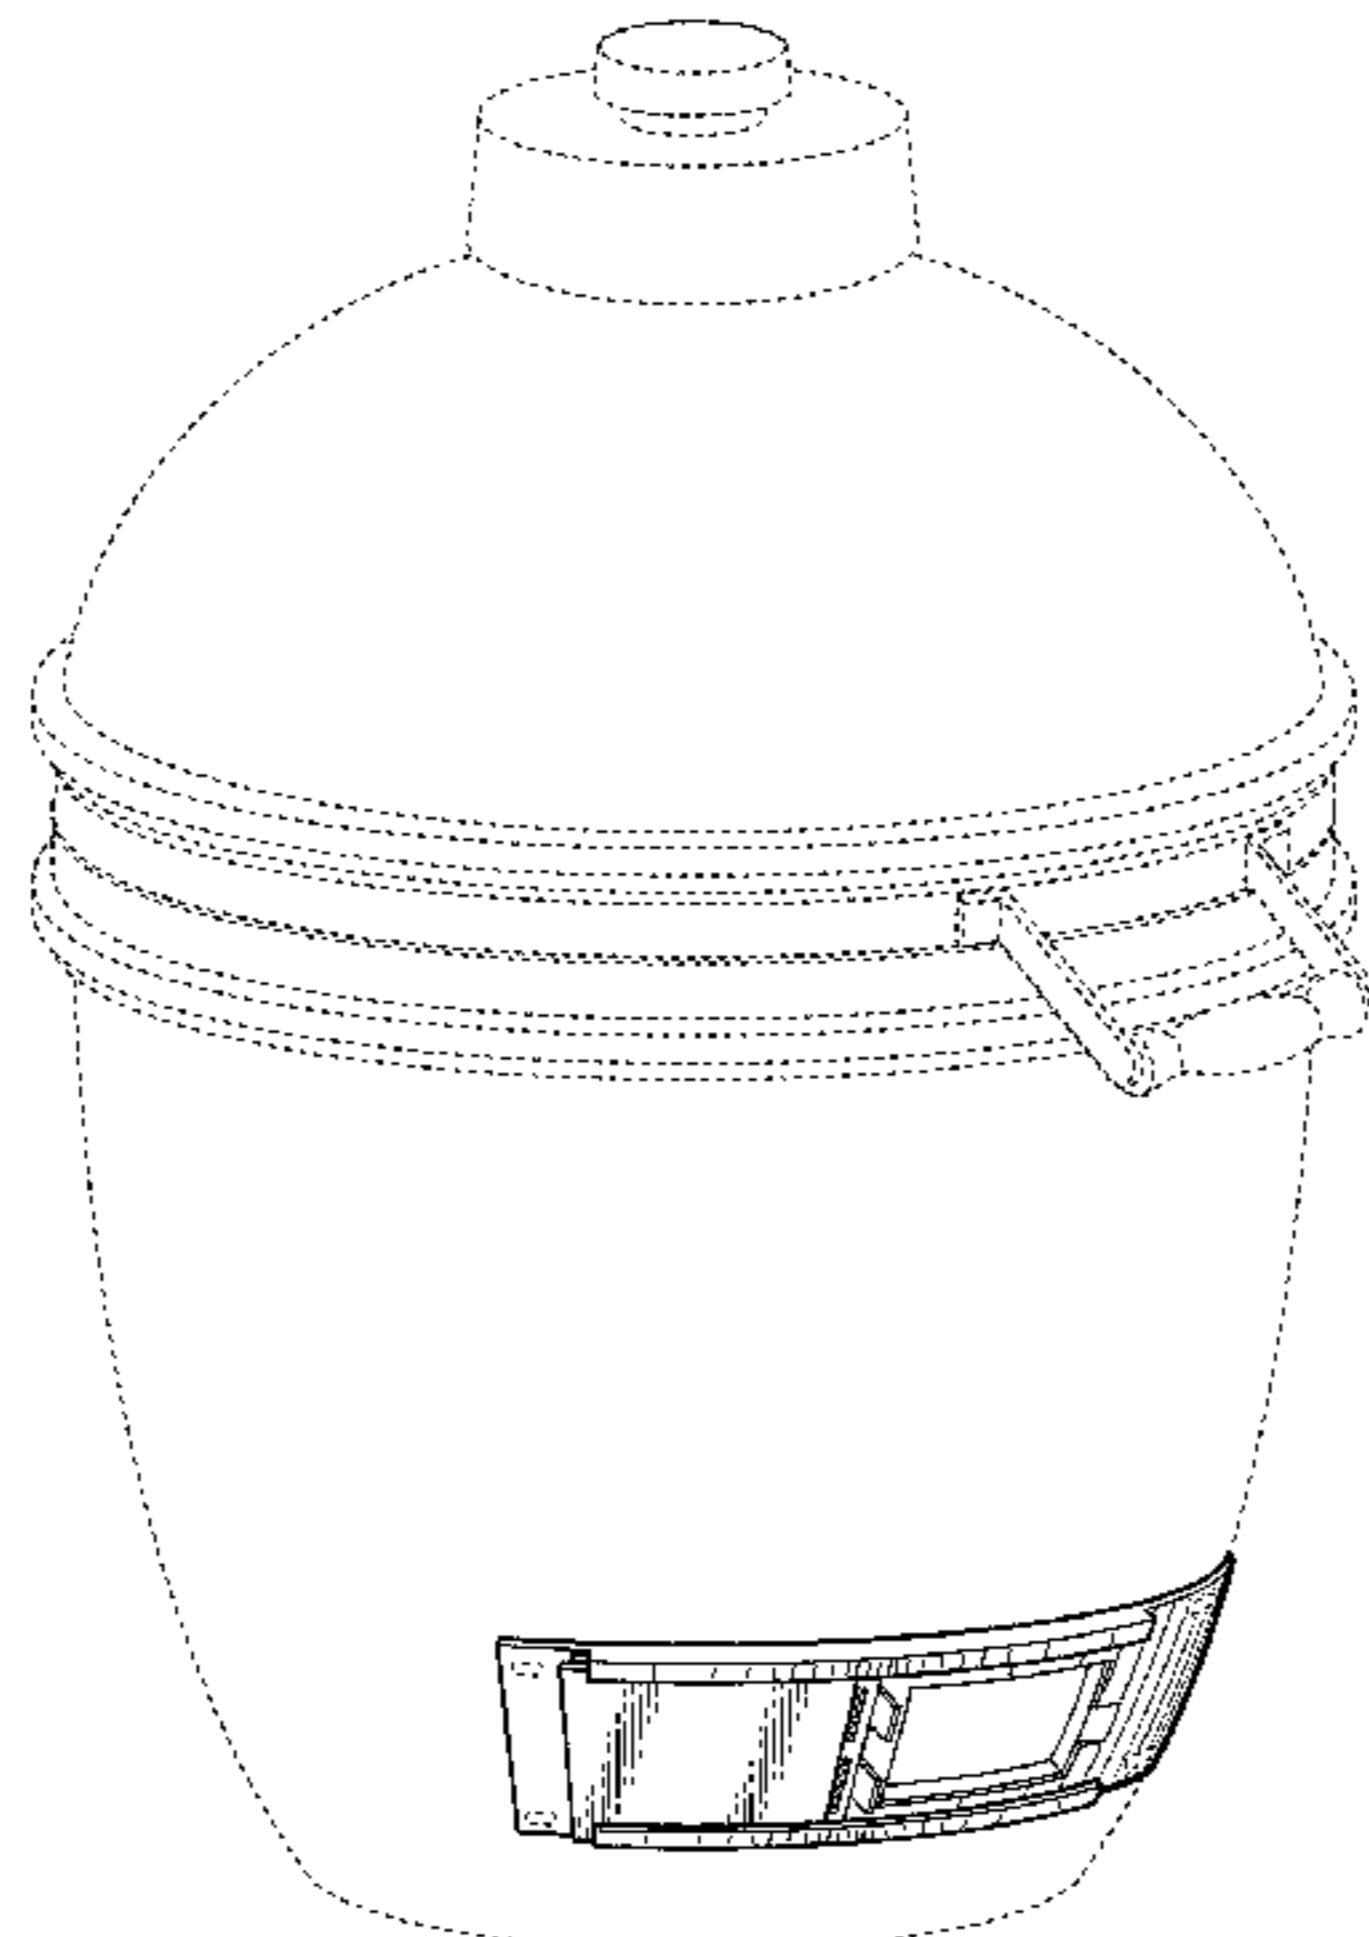

FIG. 6 is a left side elevational view of the combination airflow control and spark arrestor assembly for a cooker according to my design;

FIG. 7 is a right side elevational view of the combination airflow control and spark arrestor assembly for a cooker according to my design; and,

FIG. 8 is a bottom plan view of the combination airflow control and spark arrestor assembly for a cooker according to my design.

The broken lines shown herein are for illustrative purposes only and form no part of the claimed design.
