(57) **CLAIM**

The ornamental design for a diamond, as shown and
described.

DESCRIPTION

FIG. 1 is a top view of a diamond, showing a medium-table
version of my new design. A diamond shows the addition of
star facets and two upper girdle facets, which are slightly
detectable to the unaided eye;

FIG. 2 is a flat side view of a diamond, showing a medium-
table version of my new design (if FIG. 1 were a map with
north at the top, the side view in FIG. 2 is of the south side);

FIG. 3 is a point-rounded-end side view of a diamond, show-
ing a medium-table version of my new design (if FIG. 1 were
a map with north at the top, the side view in FIG. 3 is of the
southeast corner);

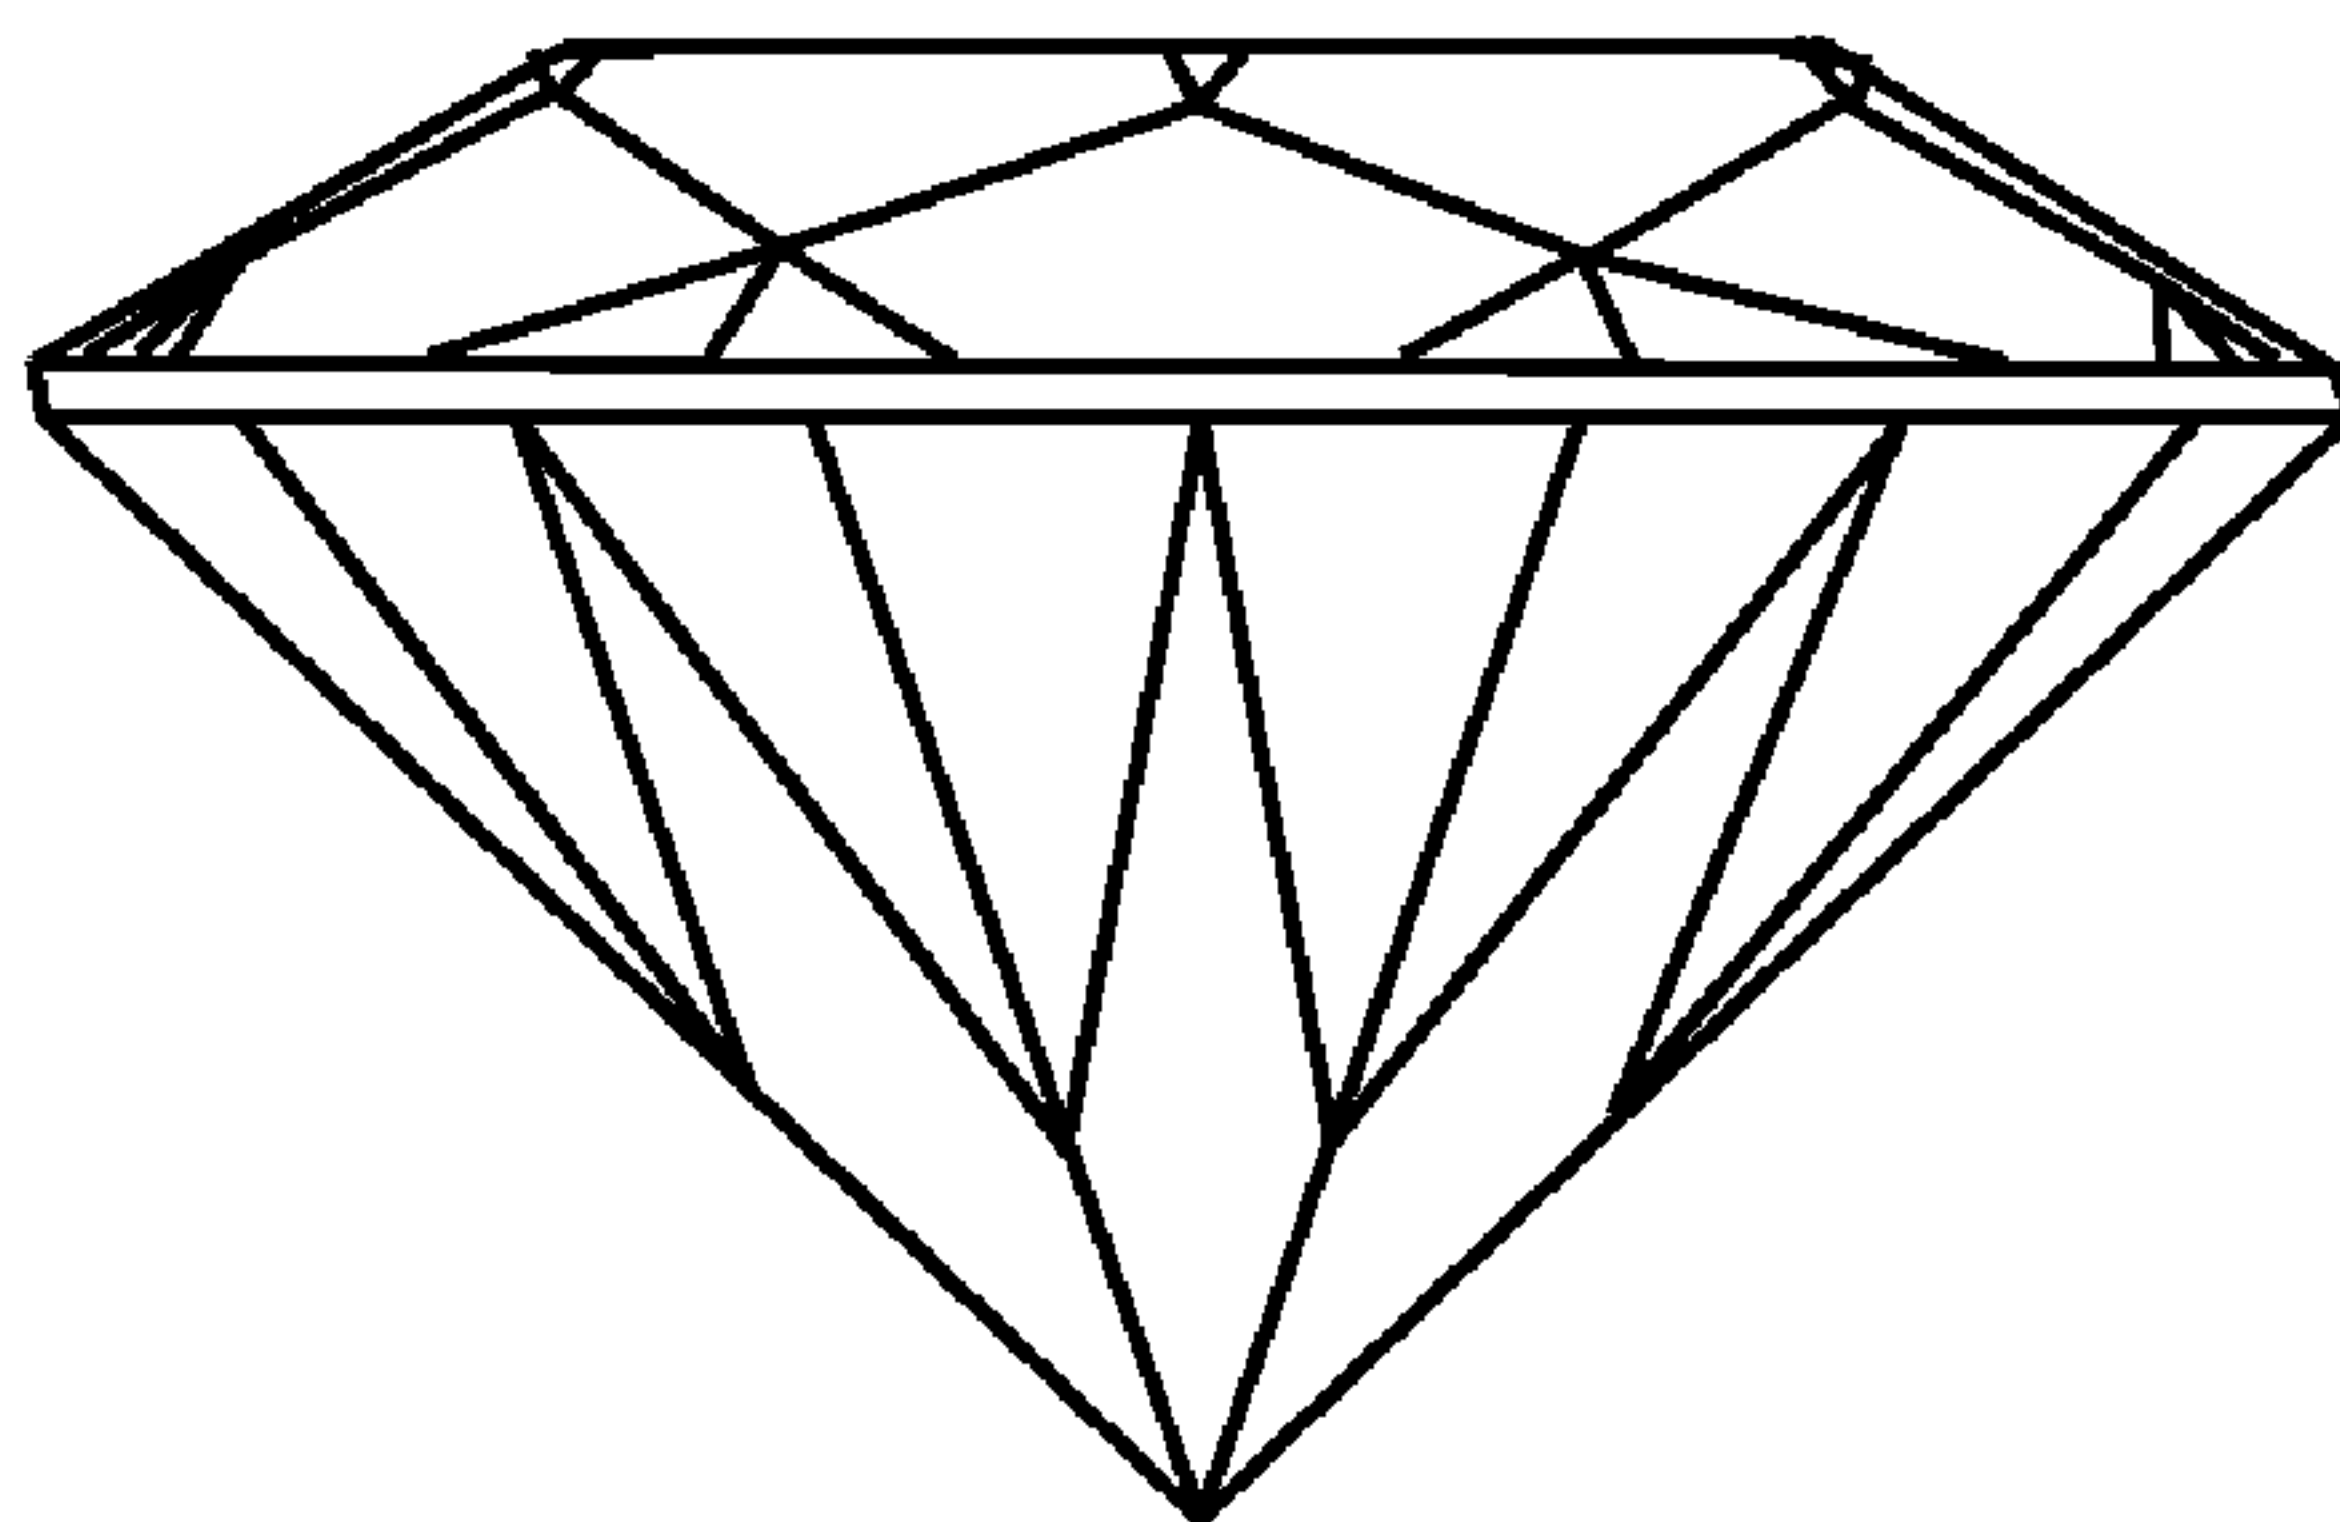

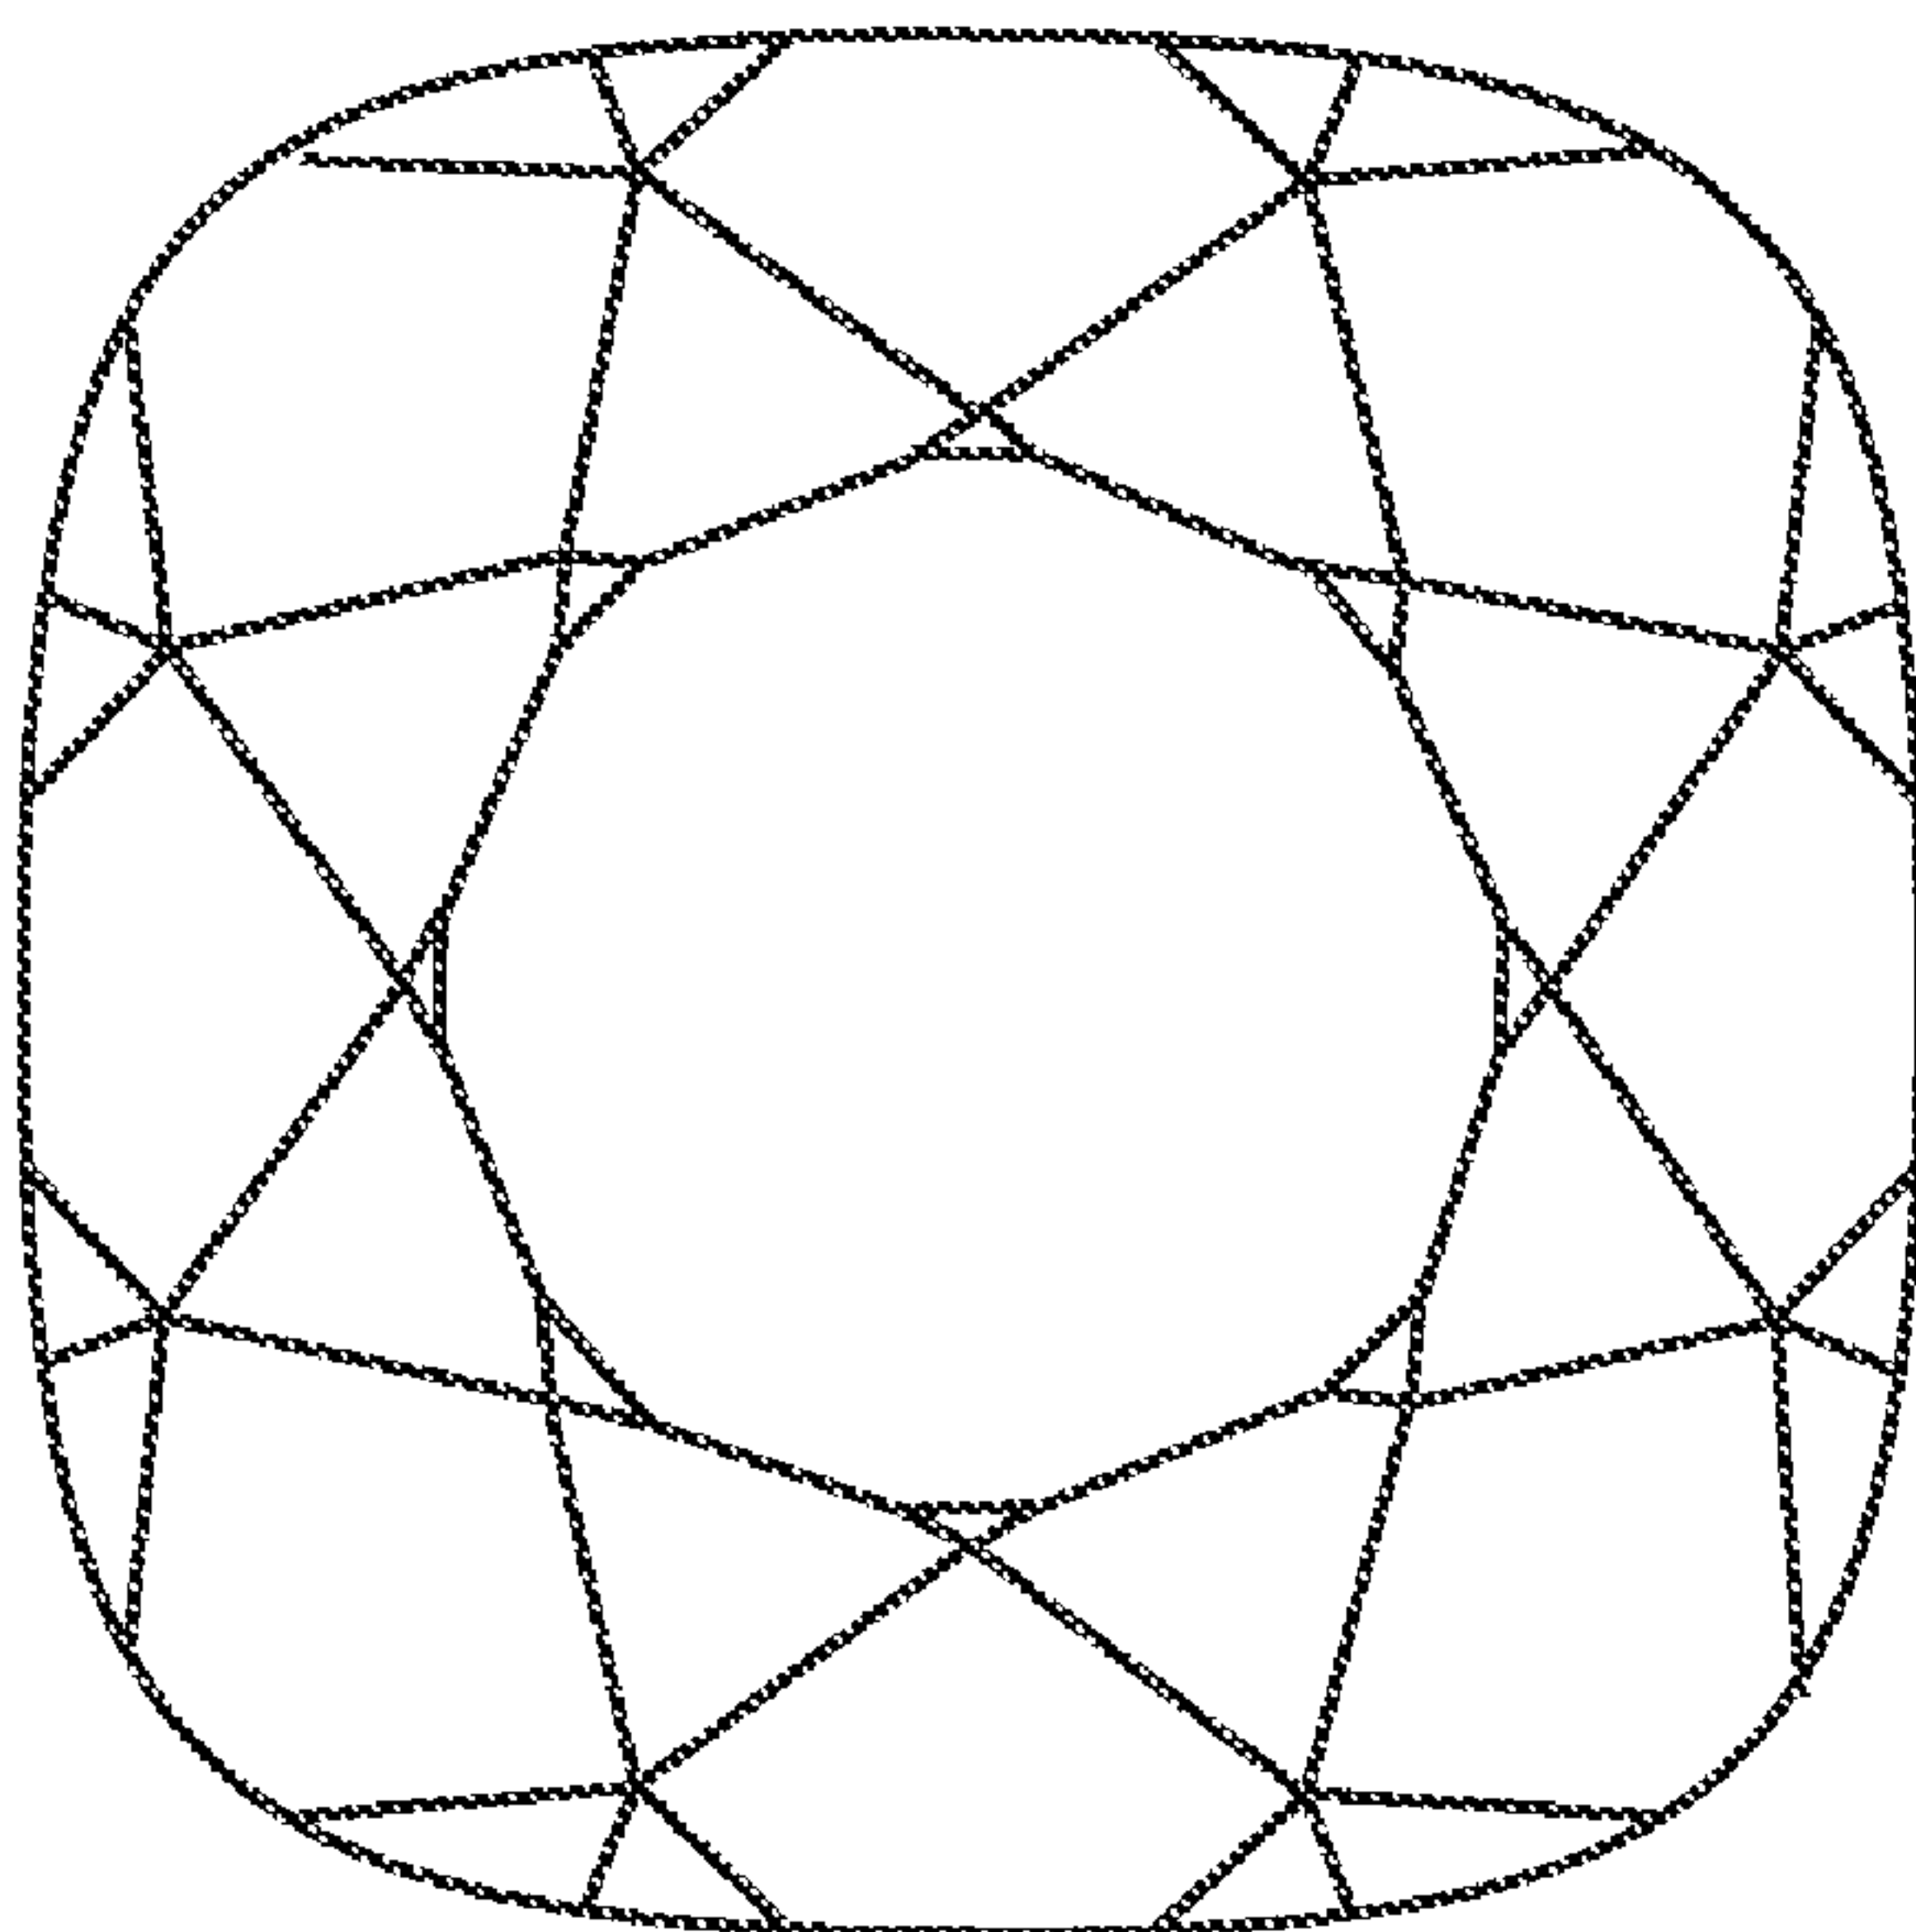

FIG. 4 is a top view of a diamond, showing a large-table
version of my new design. The diamond shows the addition of
star facets and two upper girdle facets, which are slightly
detectable to the unaided eye;

FIG. 5 is a flat side view of a diamond, showing a large-table
version of my new design (if FIG. 4 were a map with north at
the top, the side view in FIG. 5 is of the south side); and,

FIG. 6 is a point-rounded-end side view of a diamond, show-
ing a large-table version of my new design ; (if FIG. 4 were a
map with north at the top, the side view in FIG. 6 is of the
southeast corner).

Some figures show typical bottom views of a diamond of
some embodiments of the present invention, though other
bottoms could be used, and some figures show side views of
a diamond of some embodiments of the present invention—
the main feature of the present design for which patent pro-
tection is sought is the shape of the facets on the top of a
diamond.
