FIG. 1 is a perspective view of a handheld communication device in a closed position;

FIG. 2 is a front view of the handheld communication device in the closed position;

FIG. 3 is a back view of the handheld communication device in the closed position;

FIG. 4 is a first side view of the handheld communication device in the closed position;

FIG. 5 is a second side view of the handheld communication device in the closed position;

FIG. 6 is a top view of the handheld communication device in the closed position;

FIG. 7 is a bottom view of the handheld communication device in the closed position;

FIG. 8 is a front view of the handheld communication device opened to expose a first keypad; and,

FIG. 9 is a front view of the handheld communication device opened to expose a second keypad.

The outermost broken lines adjacent to the claimed areas represent the bounds of the claimed design, while all other broken lines are directed to environment and are for illustrative purposes only; the broken lines form no part of the claimed design.

The second line (first thick line) from the front, as shown in the side views, is the line at which the device slides to expose the second keypad. The fourth line (second thick line) from the front, as shown in the side views, is the line at which the device slides to expose the first keypad.
