(57) **CLAIM**

The ornamental design for a blood pressure measuring apparatus, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of the front, right and top of a blood pressure measuring apparatus;

FIG. 2 is a front view thereof;

FIG. 3 is a rear view thereof;

FIG. 4 is a right side view thereof;

FIG. 5 is a left side view thereof;

FIG. 6 is a top plan view thereof;

FIG. 7 is a bottom view thereof;

FIG. 8 is a cross sectional view at 8—8 in FIG. 2 thereof;

FIG. 9 is a cross sectional view at 9—9 in FIG. 2 thereof;

FIG. 10 is a reference perspective view with the cover in open condition thereof; and,

FIG. 11 is a reference perspective view showing a halftone depicting the translucent portion of the otherwise transparent top portion of the claimed design. While this division of transparent and translucent portions has not been shown in all views for clarity of illustration, this delineation between translucent and transparent is understood to be present in all of the preceding figure views.

The broken lines in the drawing views are included for the purpose of illustrating portions of the blood pressure measuring apparatus that form no part of the claimed design. The halftone shading of FIG. 11 represents translucency, and not a color or color contrast.
