(57) **CLAIM**

The ornamental design for a strap for brassiere, as shown and described.

DESCRIPTION

FIG. 1 is a side elevational view of the strap for brassiere, showing my new design. The strap is shown broken in the middle to indicate indeterminate length and for ease of illustration. The examiner finds the claim definite under 35 USC 112 second paragraph with the understanding that the “indeterminate” portion of the article forms no part of the claim design. Patentability is based only on those portions of the article that are shown in solid lines.

FIG. 2 is a top plan view thereof;

FIG. 3 is an end elevational view thereof; and,

FIG. 4 is a partial top and end perspective view thereof.

The broken lines depicting the brassiere and the brassiere connection hooks are for environmental structure only and form no part of the claimed design.
