(74) *Attorney, Agent, or Firm*—Jansson Shupe & Munger Ltd.

(57) **CLAIM**

The ornamental design for a two sided crown molding, as shown and described.

DESCRIPTION

FIG. 1 is an end elevation view of a two sided crown molding also shown in FIGS. 2 and 3.

FIG. 2 is a fragmentary front side isometric view of the two sided crown molding.

FIG. 3 is a fragmentary back side isometric view of the two sided crown molding.

FIG. 4 is an end elevation view of an alternate embodiment of a two sided crown molding also shown in FIGS. 5 and 6.

FIG. 5 is a fragmentary front side isometric view of the two sided crown molding.

FIG. 6 is a fragmentary back side isometric view of the two sided crown molding.

FIG. 7 is an end elevation view of an alternate embodiment of a two sided crown molding also shown in FIGS. 8 and 9.

FIG. 8 is a fragmentary front side isometric view of the two sided crown molding.

FIG. 9 is a fragmentary back side isometric view of the two sided crown molding.

FIG. 10 is an end elevation view of an alternate embodiment of a two sided crown molding also shown in FIGS. 11 and 12.

FIG. 11 is a fragmentary front side isometric view of the two sided crown molding.

FIG. 12 is a fragmentary back side isometric view of the two sided crown molding.

FIG. 13 is an end elevation view of an alternate embodiment of a two sided crown molding also shown in FIGS. 14 and 15.

FIG. **14** is a fragmentary front side isometric view of the two sided crown molding.

FIG. **15** is a fragmentary back side isometric view of the two sided crown molding.

FIG. **16** is an end elevation view of an alternate embodiment of a two sided crown molding also shown in FIGS. **17** and **18**.

FIG. **17** is a fragmentary front side isometric view of the two sided crown molding.

FIG. **18** is a fragmentary back side isometric view of the two sided crown molding.

FIG. **19** is an end elevation view of an alternate embodiment of a two sided crown molding also shown in FIGS. **20** and **21**.

FIG. **20** is a fragmentary front side isometric view of the two sided crown molding.

FIG. **21** is a fragmentary back side isometric view of the two sided crown molding.

FIG. **22** is an end elevation view of an alternate embodiment of a two sided crown molding also shown in FIGS. **23** and **24**.

FIG. **23** is a fragmentary front side isometric view of the two sided crown molding.

FIG. **24** is a fragmentary back side isometric view of the two sided crown molding.

FIG. **25** is an end elevation view of an alternate embodiment of a two sided crown molding also shown in FIGS. **26** and **27**.

FIG. **26** is a fragmentary front side isometric view of the two sided crown molding.

FIG. **27** is a fragmentary back side isometric view of the two sided crown molding.

FIG. **28** is an end elevation view of an alternate embodiment of a two sided crown molding also shown in FIGS. **29** and **30**.

FIG. **29** is a fragmentary front side isometric view of the two sided crown molding; and,

FIG. **30** is a fragmentary back side isometric view of the two sided crown molding.

The claimed design is broken on the end to indicate indeterminate length.
