DESCRIPTION

See application file for complete search history.

FIG. 1 is an end elevation view of a two sided crown molding also shown in FIGS. 2 and 3.

FIG. 2 is a fragmentary front side isometric view of the two sided crown molding.

FIG. 3 is a fragmentary back side isometric view of the two sided crown molding.

FIG. 4 is an end elevation view of an alternate embodiment of a two sided crown molding also shown in FIGS. 5 and 6.

FIG. 5 is a fragmentary front side isometric view of the two sided crown molding.

FIG. 6 is a fragmentary back side isometric view of the two sided crown molding.

FIG. 7 is an end elevation view of an alternate embodiment of a two sided crown molding also shown in FIGS. 8 and 9.

FIG. 8 is a fragmentary front side isometric view of the two sided crown molding.

FIG. 9 is a fragmentary back side isometric view of the two sided crown molding.

FIG. 10 is an end elevation view of an alternate embodiment of a two sided crown molding also shown in FIGS. 11 and 12.

FIG. 11 is a fragmentary front side isometric view of the two sided crown molding.

FIG. 12 is a fragmentary back side isometric view of the two sided crown molding.

FIG. 13 is an end elevation view of an alternate embodiment of a two sided crown molding also shown in FIGS. 14 and 15.

FIG. 14 is a fragmentary front side isometric view of the two sided crown molding.

FIG. 15 is a fragmentary back side isometric view of the two sided crown molding.

FIG. 16 is an end elevation view of an alternate embodiment of a two sided crown molding also shown in FIGS. 17 and 18.

FIG. 17 is a fragmentary front side isometric view of the two sided crown molding.

FIG. 18 is a fragmentary back side isometric view of the two sided crown molding.

FIG. 19 is an end elevation view of an alternate embodiment of a two sided crown molding also shown in FIGS. 20 and 21.

FIG. 20 is a fragmentary front side isometric view of the two sided crown molding.

FIG. 21 is a fragmentary back side isometric view of the two sided crown molding.

FIG. 22 is an end elevation view of an alternate embodiment of a two sided crown molding also shown in FIGS. 23 and 24.

FIG. 23 is a fragmentary front side isometric view of the two sided crown molding.

FIG. 24 is a fragmentary back side isometric view of the two sided crown molding.

FIG. 25 is an end elevation view of an alternate embodiment of a two sided crown molding also shown in FIGS. 26 and 27.

FIG. 26 is a fragmentary front side isometric view of the two sided crown molding.

FIG. 27 is a fragmentary back side isometric view of the two sided crown molding.

FIG. 28 is an end elevation view of an alternate embodiment of a two sided crown molding also shown in FIGS. 29 and 30.

FIG. 29 is a fragmentary front side isometric view of the two sided crown molding.

FIG. 30 is a fragmentary back side isometric view of the two sided crown molding.

FIG. 31 is an end elevation view of an alternate embodiment of a two sided crown molding also shown in FIGS. 32 and 33.

FIG. 32 is a fragmentary front side isometric view of the two sided crown molding.

FIG. 33 is a fragmentary back side isometric view of the two sided crown molding.

FIG. 34 is an end elevation view of an alternate embodiment of a two sided crown molding also shown in FIGS. 35 and 36.

FIG. 35 is a fragmentary front side isometric view of the two sided crown molding; and,

FIG. 36 is a fragmentary back side isometric view of the two sided crown molding.

The claimed design is broken on the end to indicate indeterminate length.
