(57) **CLAIM**

An ornamental design for a vehicle taillight, shown and described.

DESCRIPTION

FIG. 1 is a left side elevational view of a left vehicle taillight (the right vehicle taillight being a mirror image and is not shown);

FIG. 2 is right side elevational view of the vehicle taillight;

FIG. 3 is a front elevational view of the vehicle taillight;

FIG. 4 is a rear elevational view of the vehicle taillight;

FIG. 5 is a top plan view of the vehicle taillight;

FIG. 6 is a bottom plan view of the vehicle taillight; and,

FIG. 7 is a perspective view of the vehicle taillight.

Views are orthogonal projections rendered from computer aided design data. The absence or presence of contours, features or surfaces in the area enclosed by broken lines is not relied upon for patentability and is not part of the claimed design. The surfaces enclosed by broken lines are illustrated in lighter tones to distinguish them from the claimed surfaces.
