(57) **CLAIM**

The ornamental design for a controller for an entrance, as shown and described.

**DESCRIPTION**

FIG. 1 is a perspective view of a controller for entrance incorporating ornamental attributes of a biometric sensor such as a fingerprint recognition window, depicting the design;

FIG. 2 is a front elevational view thereof;

FIG. 3 is a rear elevational view thereof;

FIG. 4 is a left side elevational view thereof;

FIG. 5 is a right side elevational view thereof;

FIG. 6 is a top plan view thereof;

FIG. 7 is a bottom plan view thereof; and,

FIG. 8 is a perspective view illustrating the ornamental attributes of a fingerprint recognition window during use of the controller for an entrance for the claimed design.

The present invention relates to a new design of a controller of an entrance incorporating an ornamental appearance for a biometric sensor such as a fingerprint recognition window, which is installed on an entrance/exit zone of a building, and has an attractive outer ornamental appearance and a streamlined profile that fit the requirement for a new design.

The broken lines are for illustrative purposes only and form no part of the claimed design.
