(57) **CLAIM**

The ornamental design for an elliptical rod bearing, as shown and described.

DESCRIPTION

FIG. 1 is perspective front view of the elliptical bearing of the present invention;

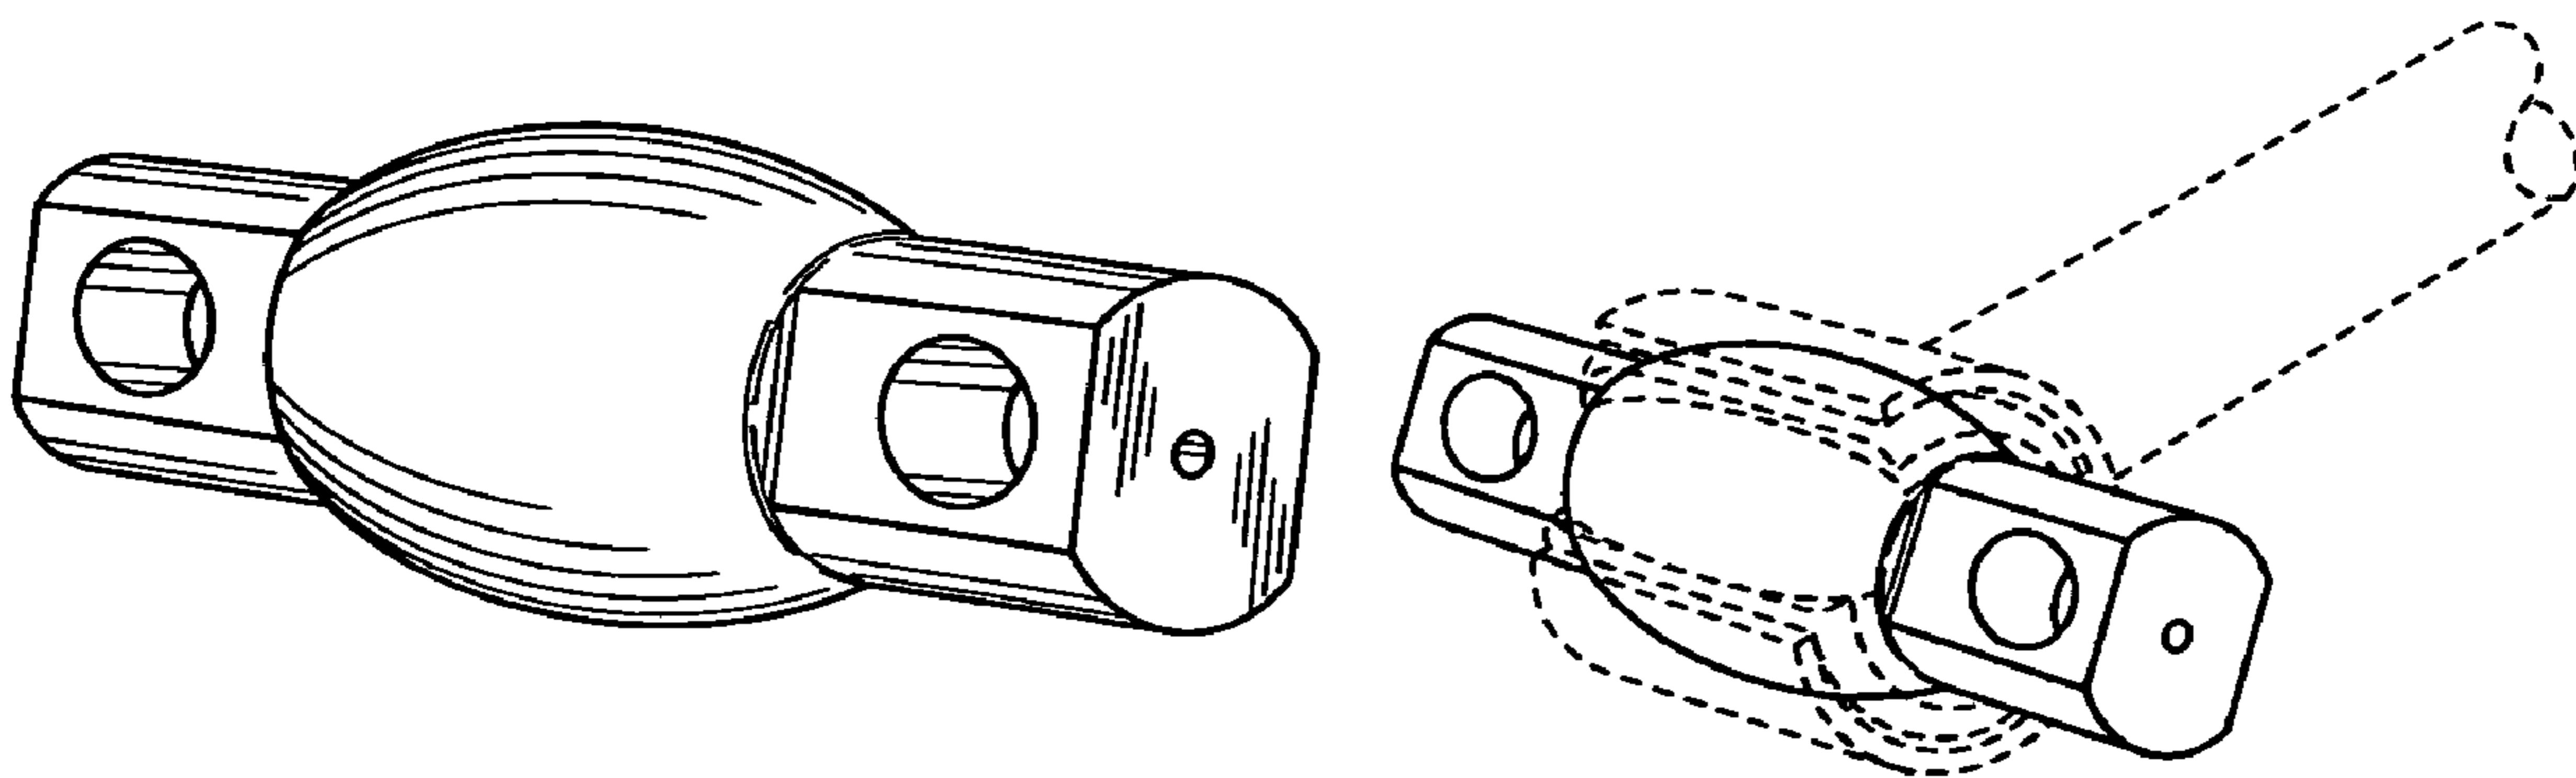

FIG. 2 is a top view of the elliptical bearing, the bottom being a mirror image;

FIG. 3 is a front view of the elliptical bearing, the rear being a mirror image;

FIG. 4 is a view of one end of the elliptical bearing, the opposite end being identical; and,

FIG. 5 is schematic perspective view of the elliptical bearing with a rod end ghosted in.
