(57) **CLAIM**

The ornamental design for an infant carrier seat rocker acces-
sory, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of an infant carrier seat rocker
accessory of my new design;

FIG. 2 is a left elevational view thereof, the right side being a
mirror image;

FIG. 3 is a front elevational view thereof, the rear being a
mirror image;

FIG. 4 is a top plan elevational view thereof;

FIG. 5 is a bottom plan view thereof;

FIG. 6 is a perspective view thereof, with the platform shown
in one extreme rocking position; and,

FIG. 7 is a perspective view thereof, with the platform shown
in the alternate extreme rocking position.

The broken lines shown in FIG. 3 are for illustrative purposes
only and form no part of the claimed design.

The present invention relates to the ornamental design for a
rocking accessory which is used to automatically rock a typi-
cal molded plastic type infant carrier seat. The user would
place an infant carrier seat upon the rocking accessory and the
rocking accessory gently rocks the infant carrier seat back and
forth.
