(57) **CLAIM**

We claim the ornamental design for a wireless receiver unit for an irrigation flow control device, as shown and described.

DESCRIPTION

FIG. **1** is a perspective view of a wireless receiver unit for an irrigation flow control device according to our new design, in which all of an antenna, a panel on the front side, a support rib on each of the left and right sides, four indicator openings on a top surface, electrical wires and external threads on a screw cap are illustrated in broken lines in this and the following views, and form no part of the claimed design;

FIG. **2** is a front elevation view thereof;

FIG. **3** is a right side view elevation thereof;

FIG. **4** is a rear elevation view thereof;

FIG. **5** is a left side elevation view thereof;

FIG. **6** is a top plan view thereof; and,

FIG. **7** is a bottom plan view thereof.
