(57) **CLAIM**

The ornamental design for solar powered keyring with a liquid crystal display, as shown and described.

**DESCRIPTION**

FIG. 1 is a perspective view of a solar powered key ring with a liquid crystal display thereof;

FIG. 2 is a perspective view of a solar powered key ring with a liquid crystal display transitioned to display a computer generated icon thereof;

FIG. 3 is a front view of a solar powered key ring with a liquid crystal display thereof;

FIG. 4 is a back view of a solar powered key ring with a liquid crystal display thereof;

FIG. 5 is a side view of a solar powered key ring with a liquid crystal display thereof;

FIG. 6 is a side view of a solar powered key ring with a liquid crystal display thereof;

FIG. 7 is a top view of a solar powered key ring with a liquid crystal display thereof; and,

FIG. 8 is a bottom view of a solar powered key ring with a liquid crystal display thereof.

The design is embodied in a solar powered key ring with a liquid crystal display on a front side. The subject matter in this patent includes a process or period in which a computer generated icon, such as an individual name, changes into another image. The process or period forms no part of the claimed design.

The broken line showing of key rings, indicia and the opening to house a keyring is included for the purpose of illustrating environmental matter and forms no part of the claimed design.
