FIG. 1 is a right, top, front perspective view of a support embodying our new design shown in a retracted position with mounting bracket environment shown partially broken away; FIG. 2 is a front elevational view thereof, with the mounting bracket environment again shown partially broken away; FIG. 3 is a rear elevational view thereof; FIG. 4 is a top plan view thereof; FIG. 5 is bottom plan view thereof; FIG. 6 is a right side elevational view thereof; and, FIG. 7 is a left side elevational view thereof.

See application file for complete search history.

The mounting bracket is shown as partially broken away to indicate that no particular length is claimed.

The support is shown as partially broken away to indicate that no particular length is claimed. The portions of the support shown in broken lines form no part of the claimed design. The broken lines immediately adjacent to the shaded surface areas are unclaimed boundary lines and form no part of the claimed design.

In a preferred embodiment, the nature of this product is a support which is primarily useful for adjustably mounting electronic devices, such as various displays and monitors.
