(57) **CLAIM**

The ornamental design for a bracket for supporting railing from a post, as shown and described.

FIG. 1. is a front perspective view of the bracket for supporting railing from a post.

FIG. 2 is a rear perspective view of the subject invention.

FIG. 3. is a top view of the subject invention.

FIG. 4 is a rear view of the subject invention.

FIG. 5. is a right side view of the subject invention, the opposite side being a mirror image thereof.

FIG. 6. is a front view of the subject invention.

FIG. 7. is a bottom view of the subject invention.

FIG. 8. is a front perspective view of the bracket for supporting railing from a post of a second embodiment of the subject invention in which the view is similar to that of FIG. 1.

FIG. 9. is a rear perspective view of the subject invention, of a second embodiment of the subject invention in which the view is similar to that of FIG. 2.

FIG. 10. is a top view of the subject invention, of a second embodiment of the subject invention in which the view is similar to that of FIG. 3.

FIG. 11. is a rear view of the subject invention, of a second embodiment of the subject invention in which the view is similar to that of FIG. 4.

FIG. 12. is a right side view of the subject invention, the opposite side being a mirror image thereof, of a second embodiment of the subject invention in which the view is similar to that of FIG. 5.

FIG. 13. is a front view of the subject invention, of a second embodiment of the subject invention in which the view is similar to that of FIG. 6; and,

FIG. 14. is a bottom view of the subject invention, of a second embodiment of the subject invention in which the view is similar to that of FIG. 7. The broken lines showing in this figure form no part of the claimed design.
