(57) **CLAIM**

An ornamental design for a vehicle wheel cover, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a vehicle wheel cover; and, FIG. 2 is a perspective view of the vehicle wheel cover.

The absence or presence of surfaces on the area enclosed by broken lines is nor relied upon for patentability or infringement. The surfaces enclosed by broken lines are illustrated in lighter tones to distinguish them from the claimed surfaces. Any broken lines represent an internal boundary of the design; the line itself and the area within form no part of the claim. Views are orthogonal projections rendered from computer aided design data.
