(57) **CLAIM**

The ornamental design for a protective and supportive component for a motorcycle seat, as shown and described.

FIG. 1 is an upper rear perspective view of a protective and supportive component for a motorcycle seat in accordance with the present invention.

FIG. 2 is a front lateral perspective view of a protective and supportive component for a motorcycle seat in accordance with the present invention, with the support and attachment portions shown in phantom.

FIG. 3 is a rear elevation view of a protective and supportive component for a motorcycle seat in accordance with the present invention, with the support and attachment portions shown in phantom.

FIG. 4 is a front elevation view of a protective and supportive component for a motorcycle seat in accordance with the present invention, with the support and attachment portions shown in phantom.

FIG. 5 is a top plan view of a protective and supportive component for a motorcycle seat in accordance with the present invention.

FIG. 6 is a bottom plan view of a protective and supportive component for a motorcycle seat in accordance with the present invention, with the support and attachment portions shown in phantom.

FIG. 7 is a first lateral view of a protective and supportive component for a motorcycle seat in accordance with the present invention and of which FIG. 8 is a mirror image, with the attachment portion shown in phantom.

FIG. 8 is a second lateral view of a protective and supportive component for a motorcycle seat in accordance with the present invention and of which FIG. 7 is a mirror image, with the attachment portion shown in phantom; and,

FIG. 9 is a lateral view of a motorcycle bearing a protective and supportive component for a motorcycle seat in accordance with the present invention, wherein the motorcycle is shown in phantom.

The motorcycle, motorcycle seat and motorcycle tank shown are shown in phantom, as are the support and attachment structures, which form no part of the claimed invention.
