(57) CLAIM

The ornamental design for a hygienic toothbrush holder, as shown and described.

DESCRIPTION

- FIG. 1 is a front, top and left side perspective view of a first embodiment of a hygienic toothbrush holder showing my new design;
- FIG. 2 is a front, top and left side perspective view thereof, with the mounting strip portion omitted for clarity of illustration of the holder portion;
- FIG. 3 is a front, top and left side perspective view thereof, with the holder portion omitted for clarity of illustration of the mounting strip portion;
- FIG. 4 is a front elevation view thereof;
- FIG. 5 is a front elevation view thereof, with the mounting strip portion omitted for clarity of illustration of the holder portion;
- FIG. 6 is a front elevation view thereof, with the holder portion omitted for clarity of illustration of the mounting strip portion;
- FIG. 7 is a rear elevation view thereof;
- FIG. 8 is a rear elevation view thereof, with the holder portion omitted for clarity of illustration of the mounting strip portion;
- FIG. 9 is a top plan view thereof;
- FIG. 10 is a top plan view thereof, with the mounting strip portion omitted for clarity of illustration of the holder portion;
- FIG. 11 is a top plan view thereof, with the holder portion omitted for clarity of illustration of the mounting strip portion;
- FIG. 12 is a front, top and left side perspective view of a second embodiment thereof;
- FIG. 13 is a front, top and left side perspective view thereof, with the mounting strip portion omitted for clarity of illustration of the holder portion;
- FIG. 14 is a front, top and left side perspective view thereof, with the holder portion omitted for clarity of illustration of the mounting strip portion;

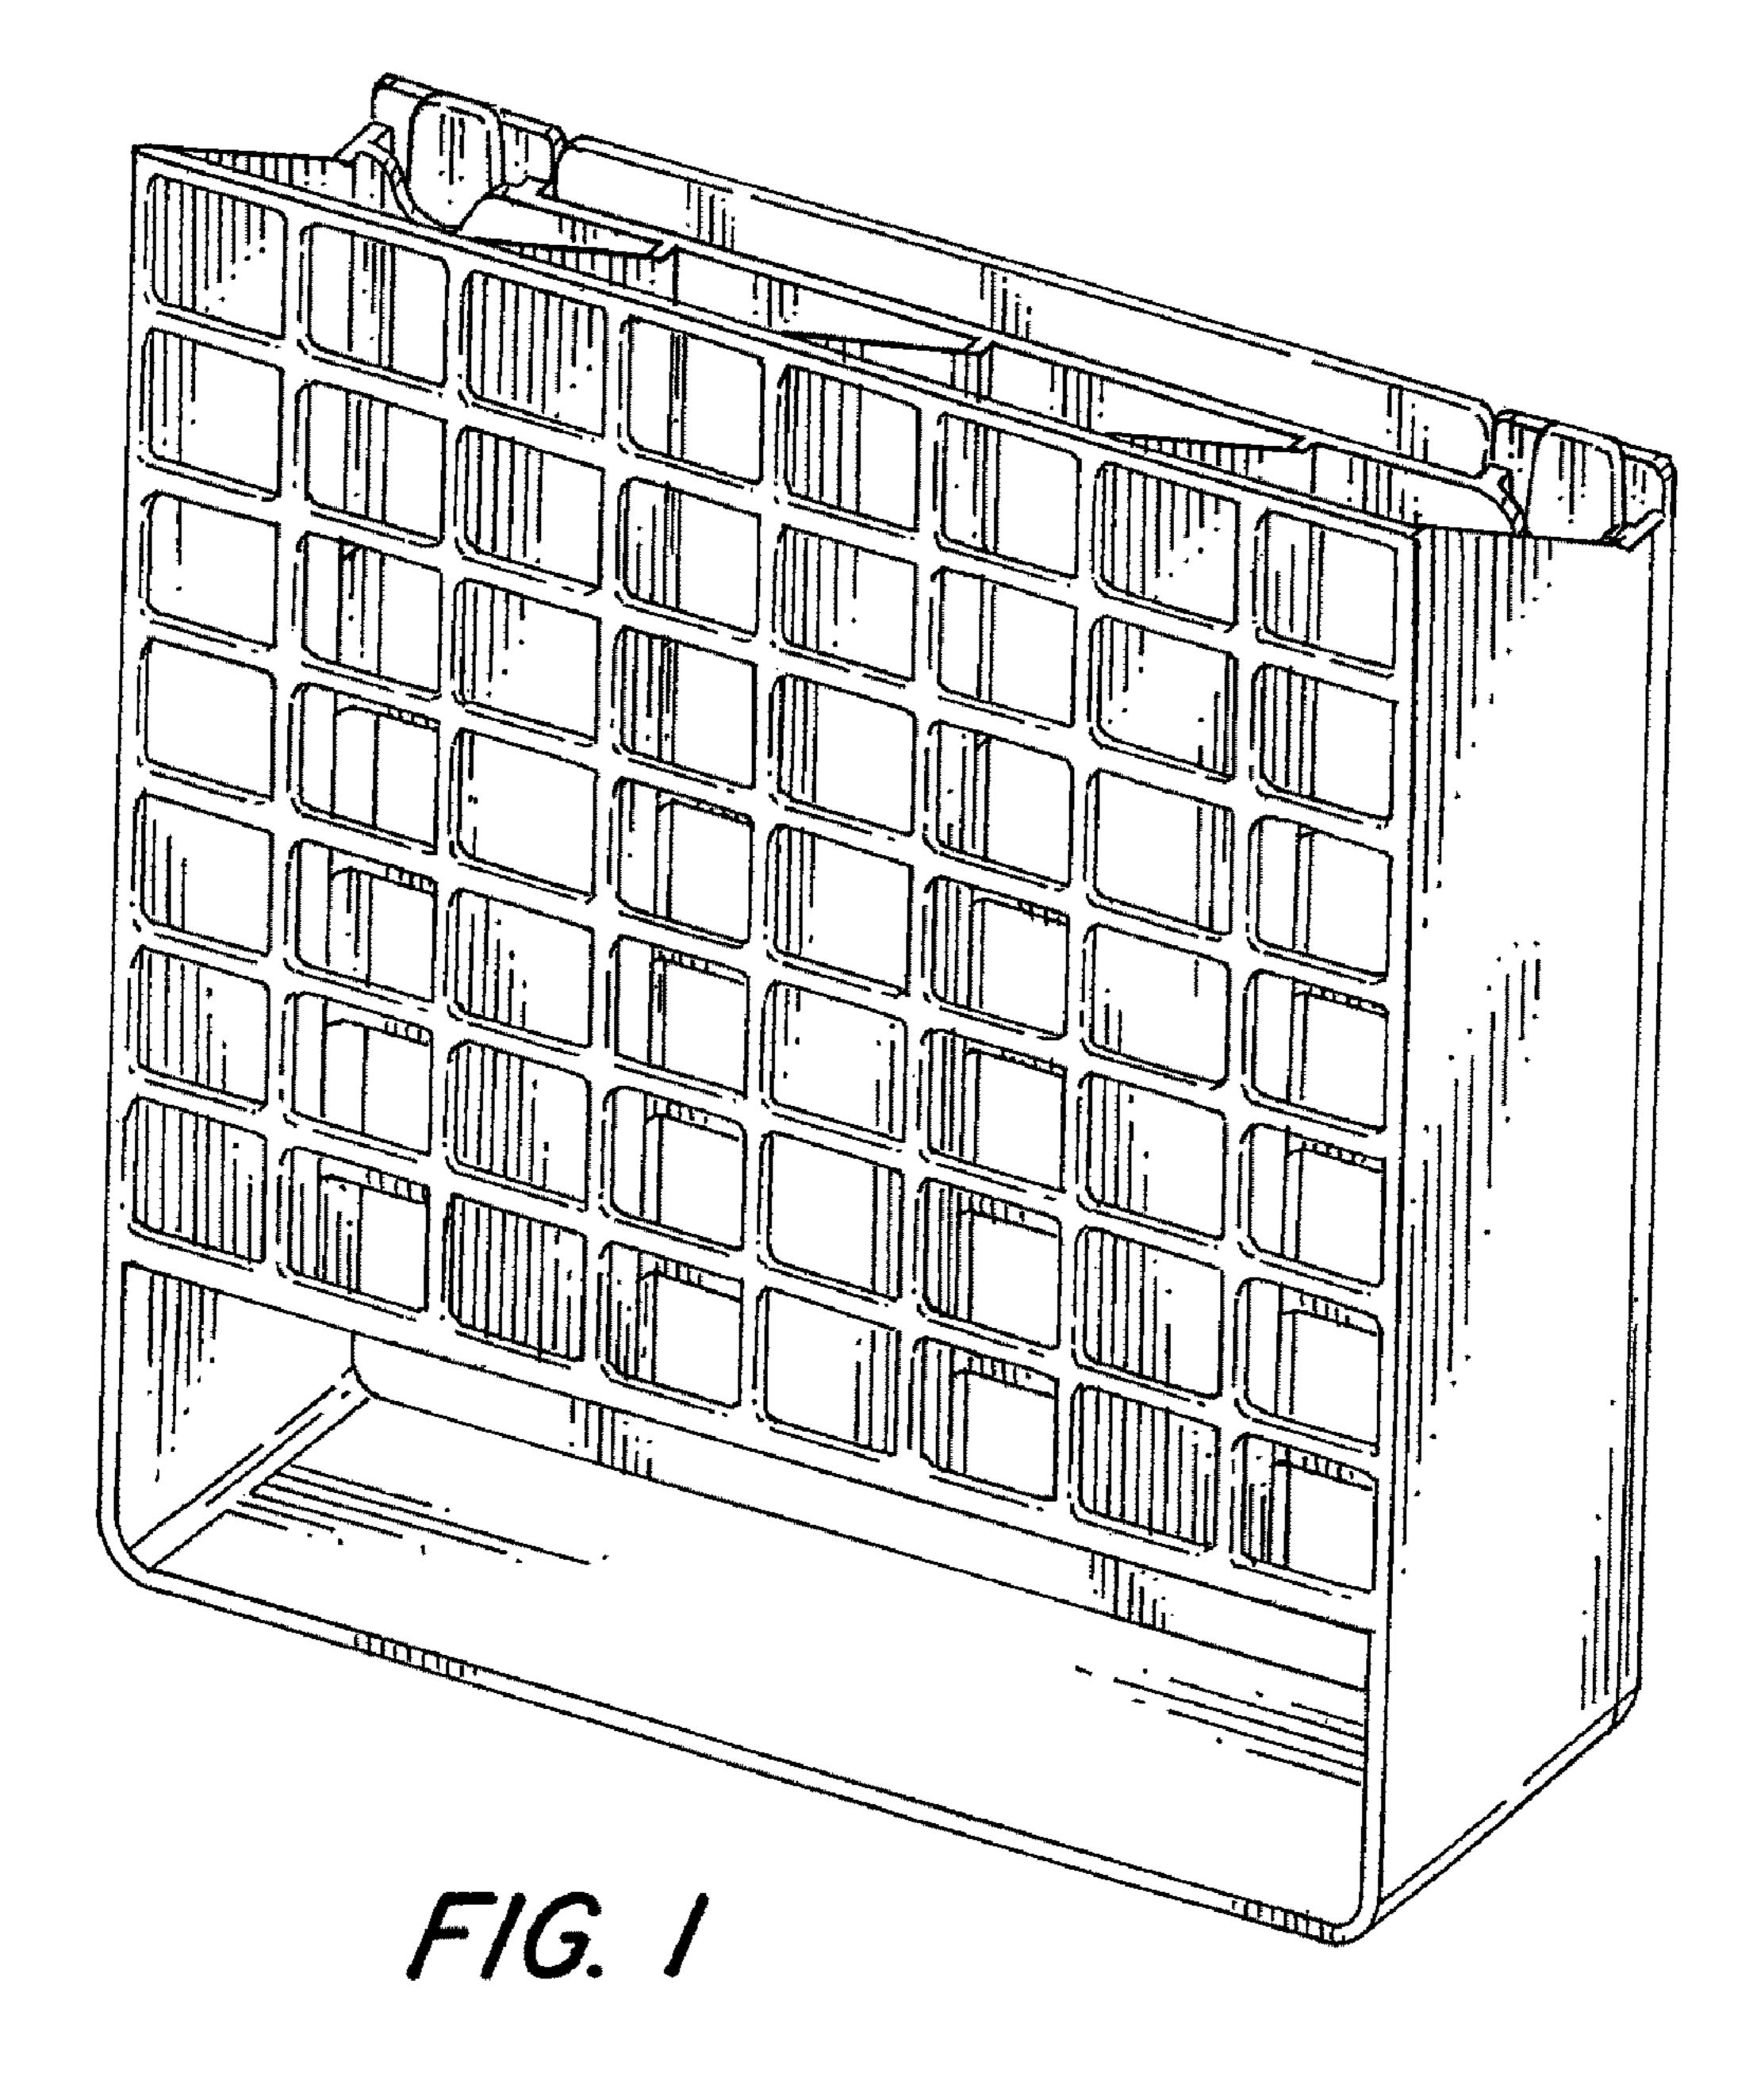

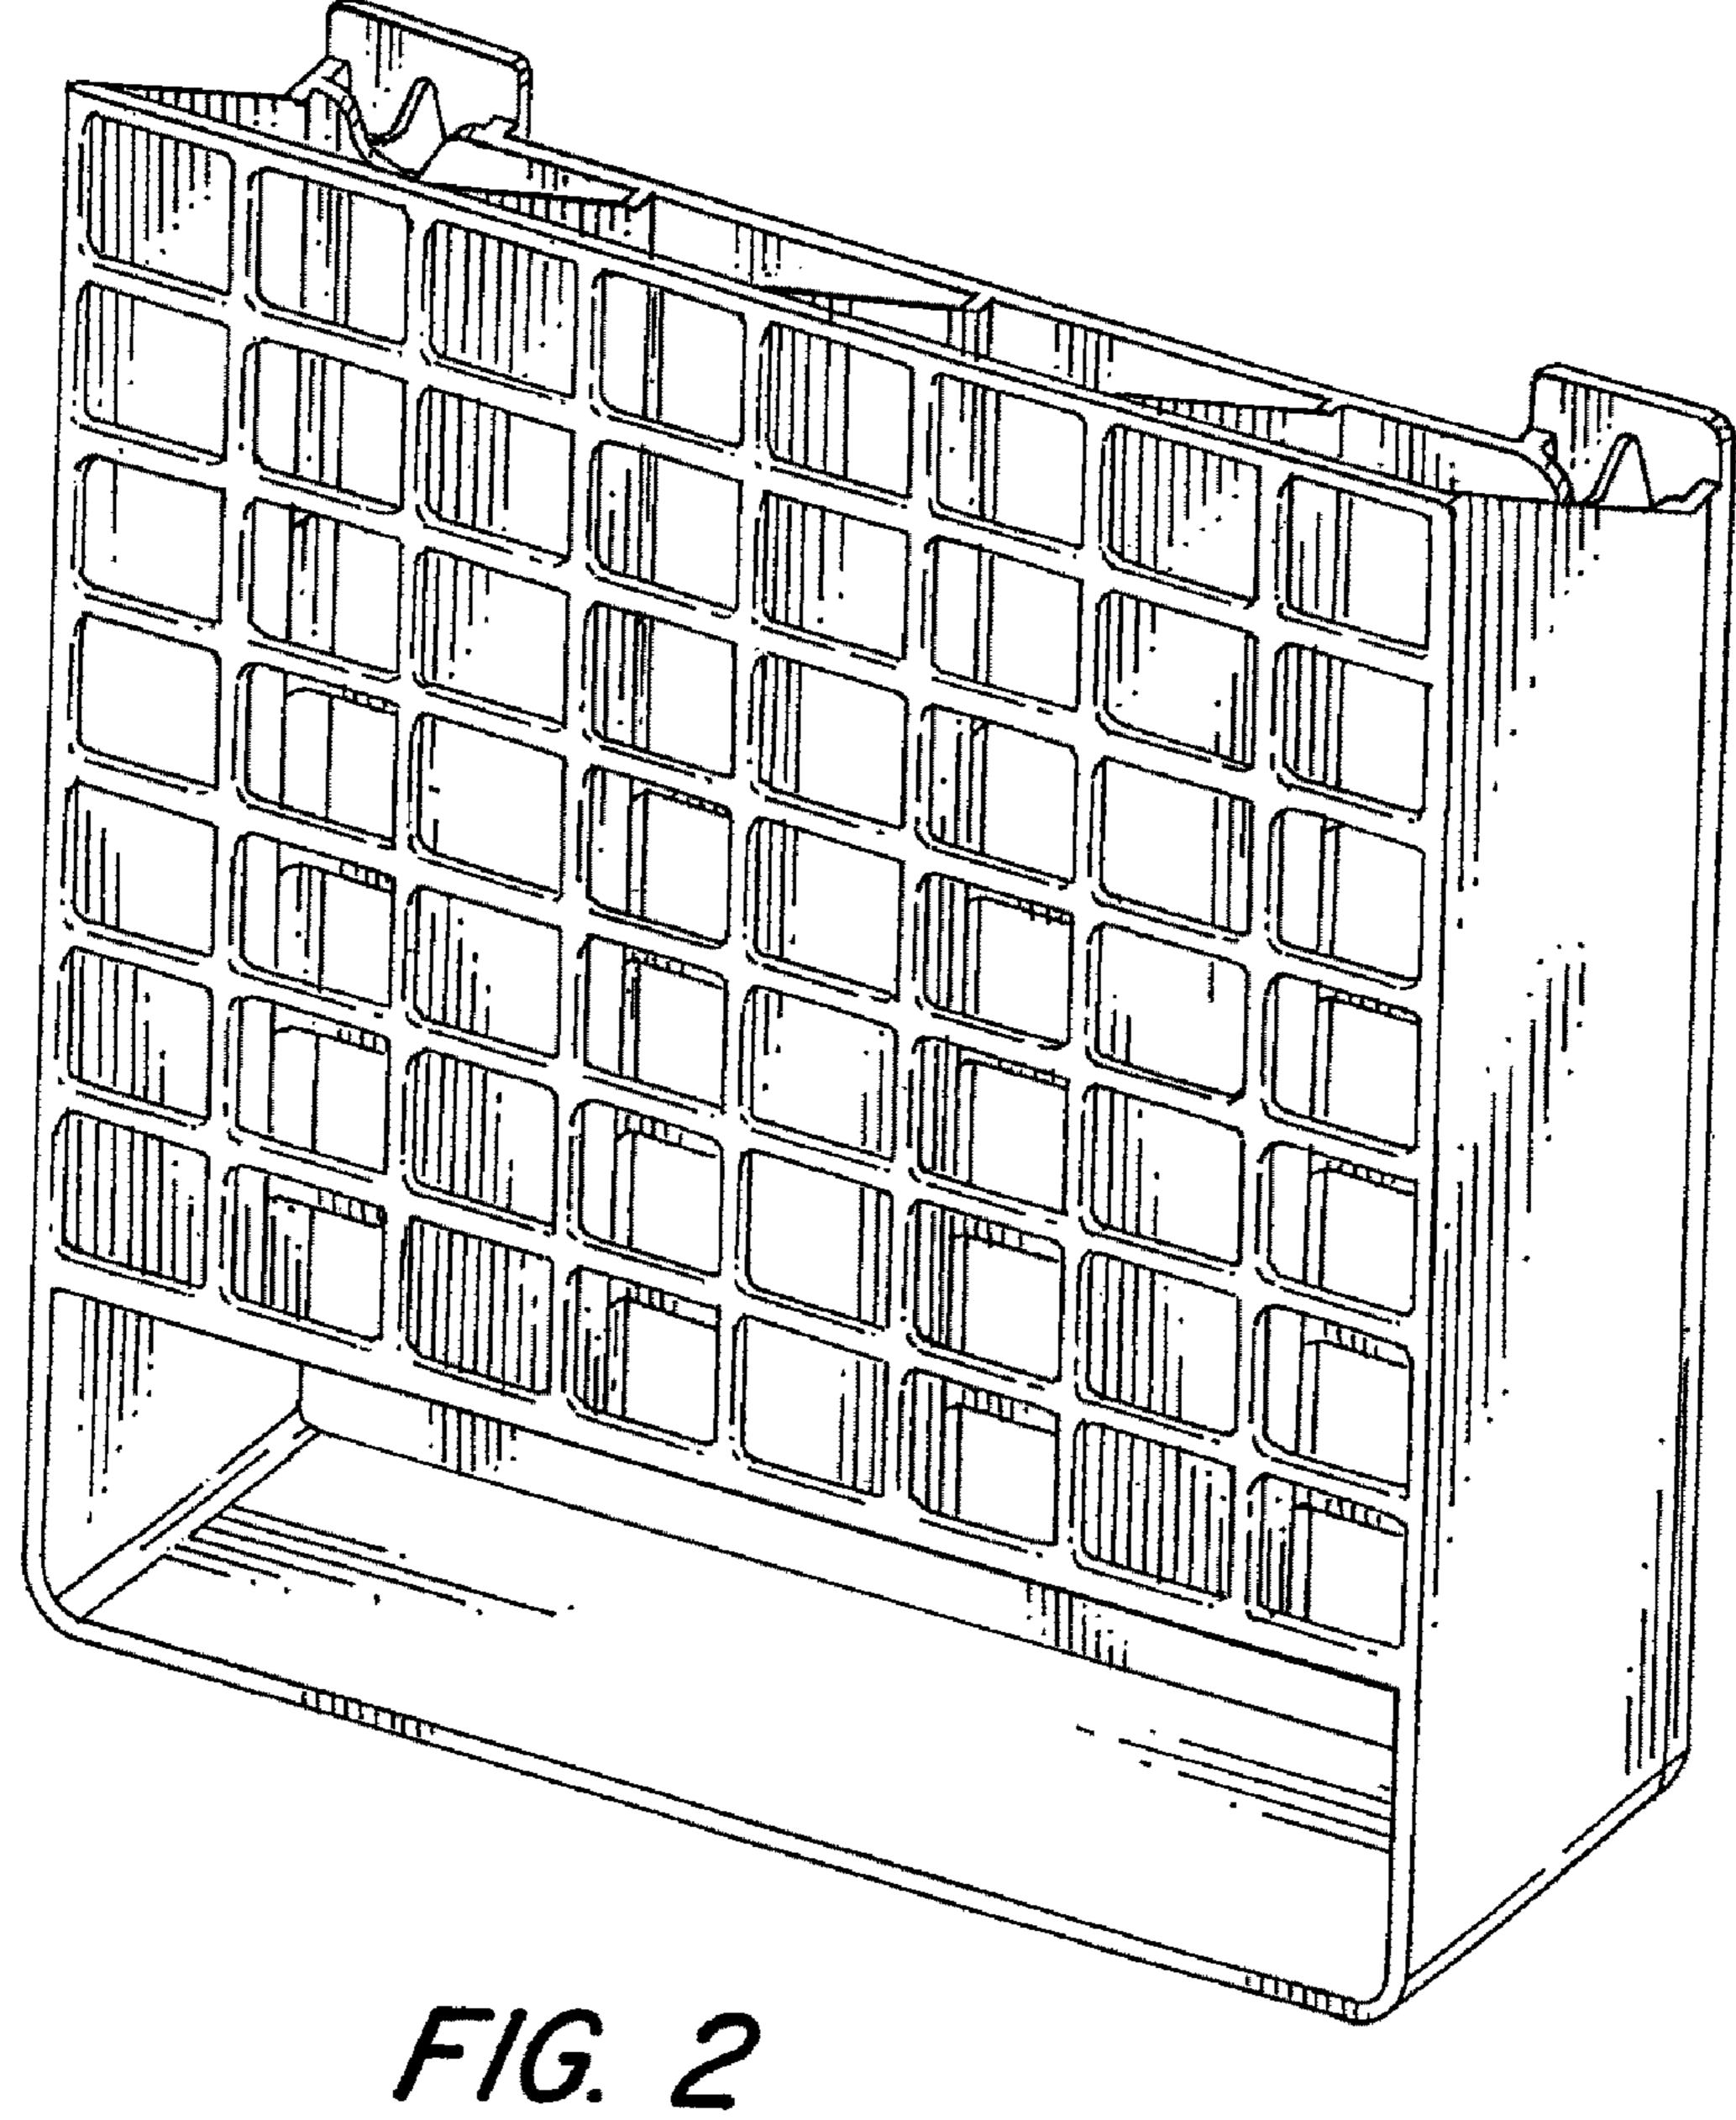

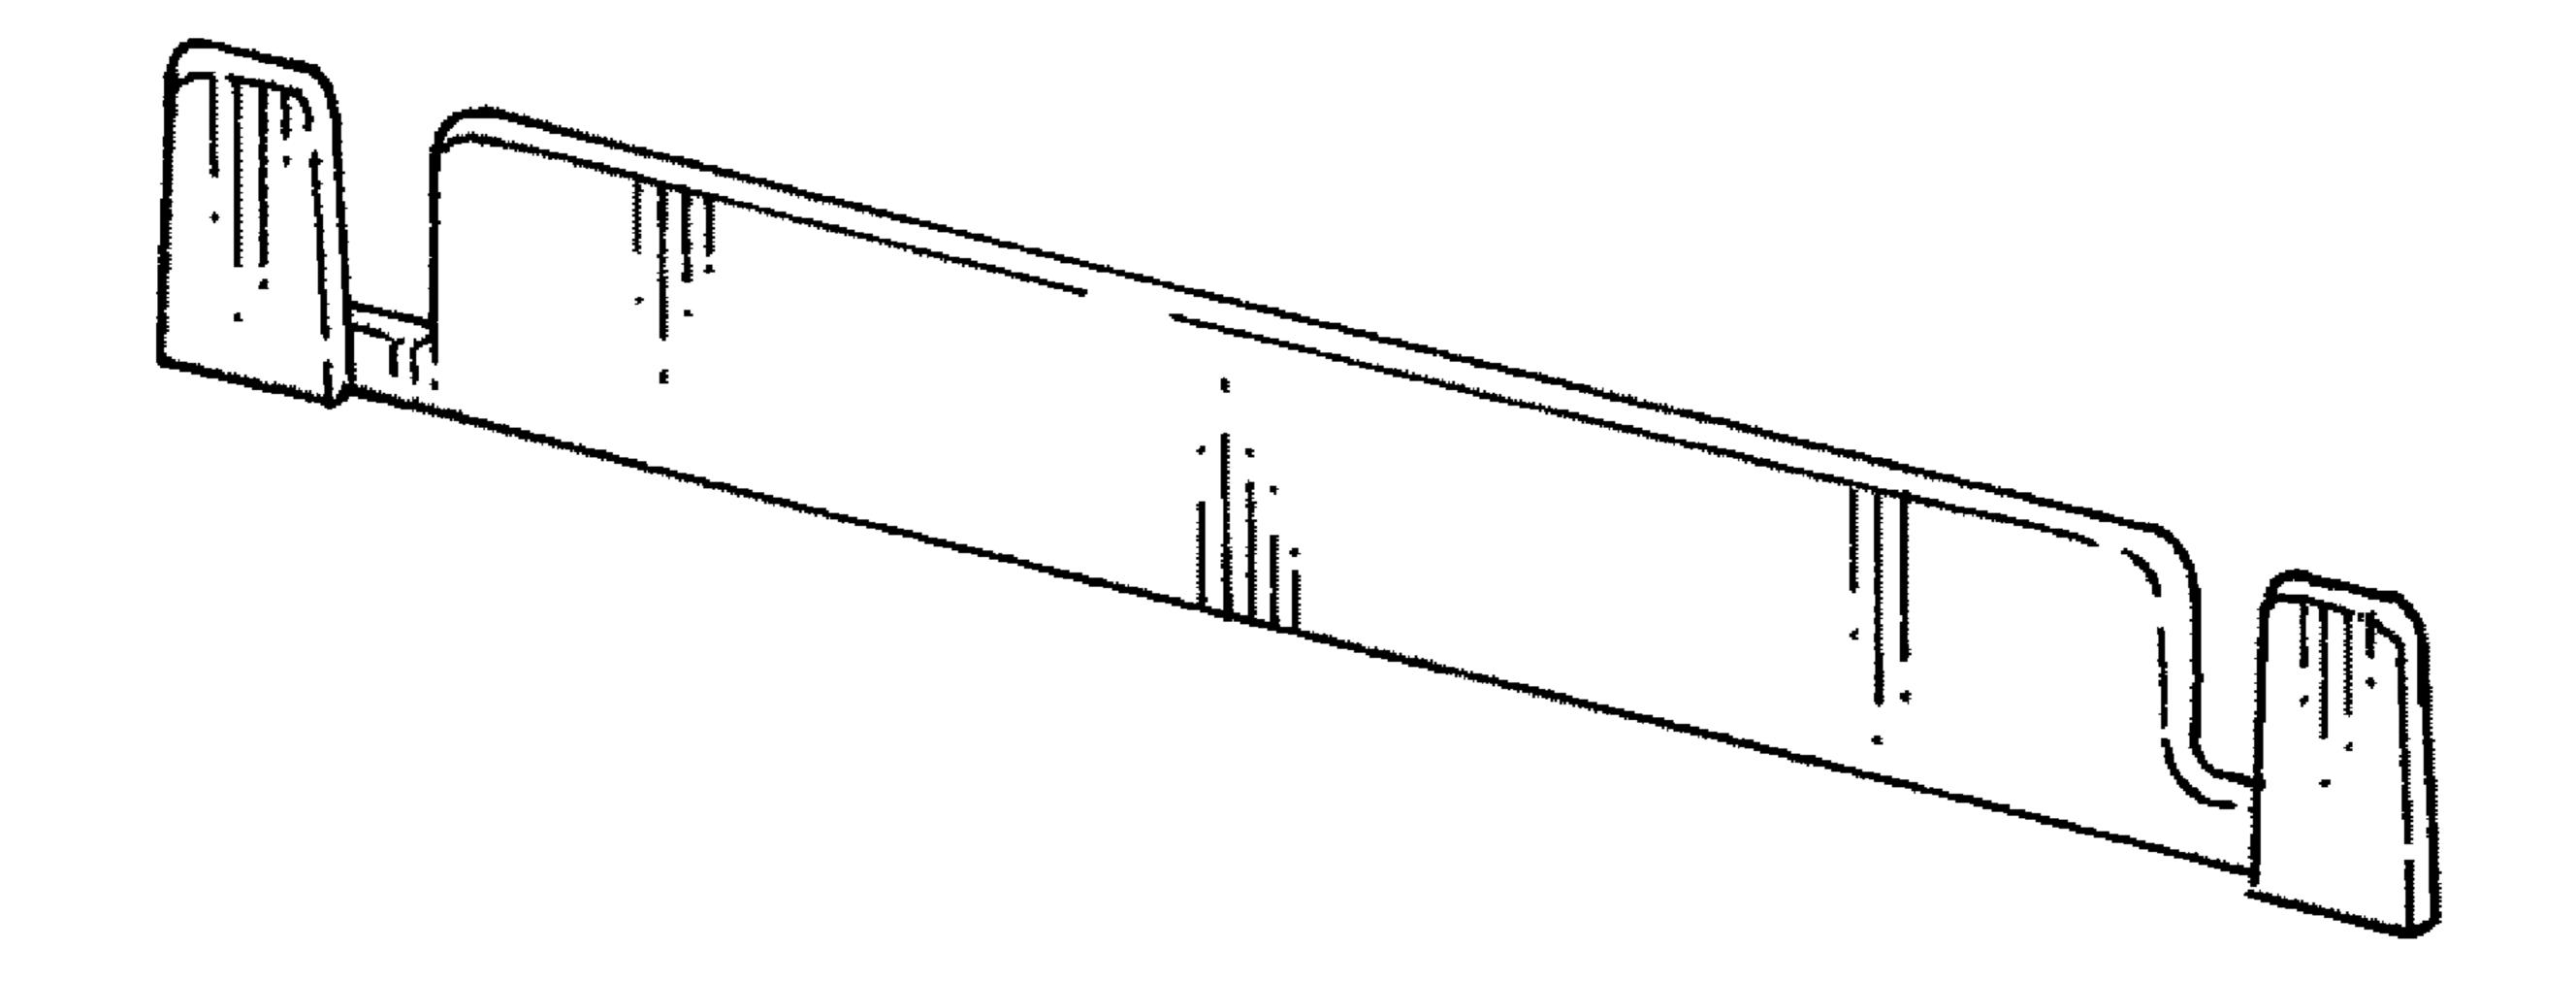

- FIG. 15 is a front elevation view thereof;
- FIG. **16** is a front elevation view thereof, with the mounting strip portion omitted for clarity of illustration of the holder portion;
- FIG. 17 is a front elevation view thereof, with the holder portion omitted for clarity of illustration of the mounting strip portion;
- FIG. 18 is a rear elevation view thereof;
- FIG. 19 is a rear elevation view thereof, with the mounting strip portion omitted for clarity of illustration of the holder portion;
- FIG. 20 is a rear elevation view thereof, with the holder portion omitted for clarity of illustration of the mounting strip portion;
- FIG. 21 is a top plan view thereof;
- FIG. 22 is a top plan view thereof, with the mounting strip portion omitted for clarity of illustration of the holder portion;
- FIG. 23 is a top plan view thereof, with the holder portion omitted for clarity of illustration of the mounting strip portion;
- FIG. 24 is a front, top and left side perspective view of a third embodiment thereof;
- FIG. 25 is a front, top and left side perspective view thereof, with the mounting strip portion omitted for clarity of illustration of the holder portion;
- FIG. 26 is a front, top and left side perspective view thereof, with the holder portion omitted for clarity of illustration of the mounting strip portion;
- FIG. 27 is a front elevation view thereof;
- FIG. 28 is a front elevation view thereof, with the mounting strip portion omitted for clarity of illustration of the holder portion;
- FIG. 29 is a front elevation view thereof, with the holder portion omitted for clarity of illustration of the mounting strip portion;

- FIG. 30 is a rear elevation view thereof;
- FIG. 31 is a rear elevational view thereof, with the mounting strip portion omitted for clarity of illustration of the holder portion;
- FIG. 32 is a rear elevation view thereof, with the holder portion omitted for clarity of illustration of the mounting strip portion;
- FIG. 33 is a right side elevation view of the first embodiment thereof, with the right side elevations of the second and third embodiments being identical in appearance, and the left side elevations of all three embodiments being mirror images of that shown;
- FIG. 34 is a right side elevation view of the first embodiment thereof, with the mounting strip portion omitted for clarity of illustration of the holder portion; the right side elevations of the second and third embodiments being identical in appearance, and the left side elevations of all three embodiments being mirror images of that shown;
- FIG. 35 is a right side elevation view of the first embodiment thereof, with the holder portion omitted for clarity of illustration of the mounting strip portion; the right side elevations of the second and third embodiments being identical in appearance, and the left side elevations of all three embodiments being mirror images of that shown;
- FIG. 36 is a vertical cross-sectional view of the first embodiment thereof, taken through the middle of the right compartment, with the vertical cross-sectional views of the second and third embodiments being identical in appearance;
- FIG. 37 is a top plan view of the third embodiment thereof;
- FIG. 38 is a top plan view thereof, with the mounting strip portion omitted for clarity of illustration of the holder portion; and,
- FIG. 39 is a top plan view thereof, with the holder portion omitted for clarity of illustration of the mounting strip portion.
