(57) **CLAIM**

The ornamental design for handheld ultrasound imaging device, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a handheld ultrasound imaging device when the handheld ultrasound imaging device is in an open position in accordance with an embodiment;

FIG. 2 is a top plan view of the handheld ultrasound imaging device of FIG. 1 when the handheld ultrasound imaging device is in an open position;

FIG. 3 is a bottom plan view of the handheld ultrasound imaging device of FIG. 1 when the handheld ultrasound imaging device is in an open position;

FIG. 4 is a left side view of the handheld ultrasound imaging device of FIG. 1 when the handheld ultrasound imaging device is in an open position;

FIG. 5 is a right side view of the handheld ultrasound imaging device of FIG. 1 when the handheld ultrasound imaging device is in an open position;

FIG. 6 is a front view of the handheld ultrasound imaging device of FIG. 1 when the handheld ultrasound imaging device is in an open position;

FIG. 7 is a rear view of the handheld ultrasound imaging device of FIG. 1 when the handheld ultrasound imaging device is in an open position;

FIG. 8 is a left side view of the handheld ultrasound imaging device of FIG. 1 when the handheld ultrasound imaging device is in a closed position; the right side view of the handheld ultrasound imaging device in a closed position is a mirror image of the left side view of the handheld ultrasound imaging device in a closed position and is therefore not shown;

FIG. 9 is a front view of the handheld ultrasound imaging device of FIG. 1 when the handheld ultrasound imaging device is in a closed position; and,

FIG. 10 is a rear view of the handheld ultrasound imaging device of FIG. 1 when the handheld ultrasound imaging device is in a closed position.
