(57) **CLAIM**

The ornamental design for a user interface for computer-display, as shown and described.

DESCRIPTION

A portion of the disclosure of this patent document contains material to which a claim for copyright is made. The copyright owner has no objection to the facsimile reproduction by anyone of the patent document or the patent disclosure, as it appears in the Patent and Trademark Office patent file or records, but reserves all other copyright rights whatsoever.

FIG. 1 is a front view of a user interface for computer display showing our new design; and,

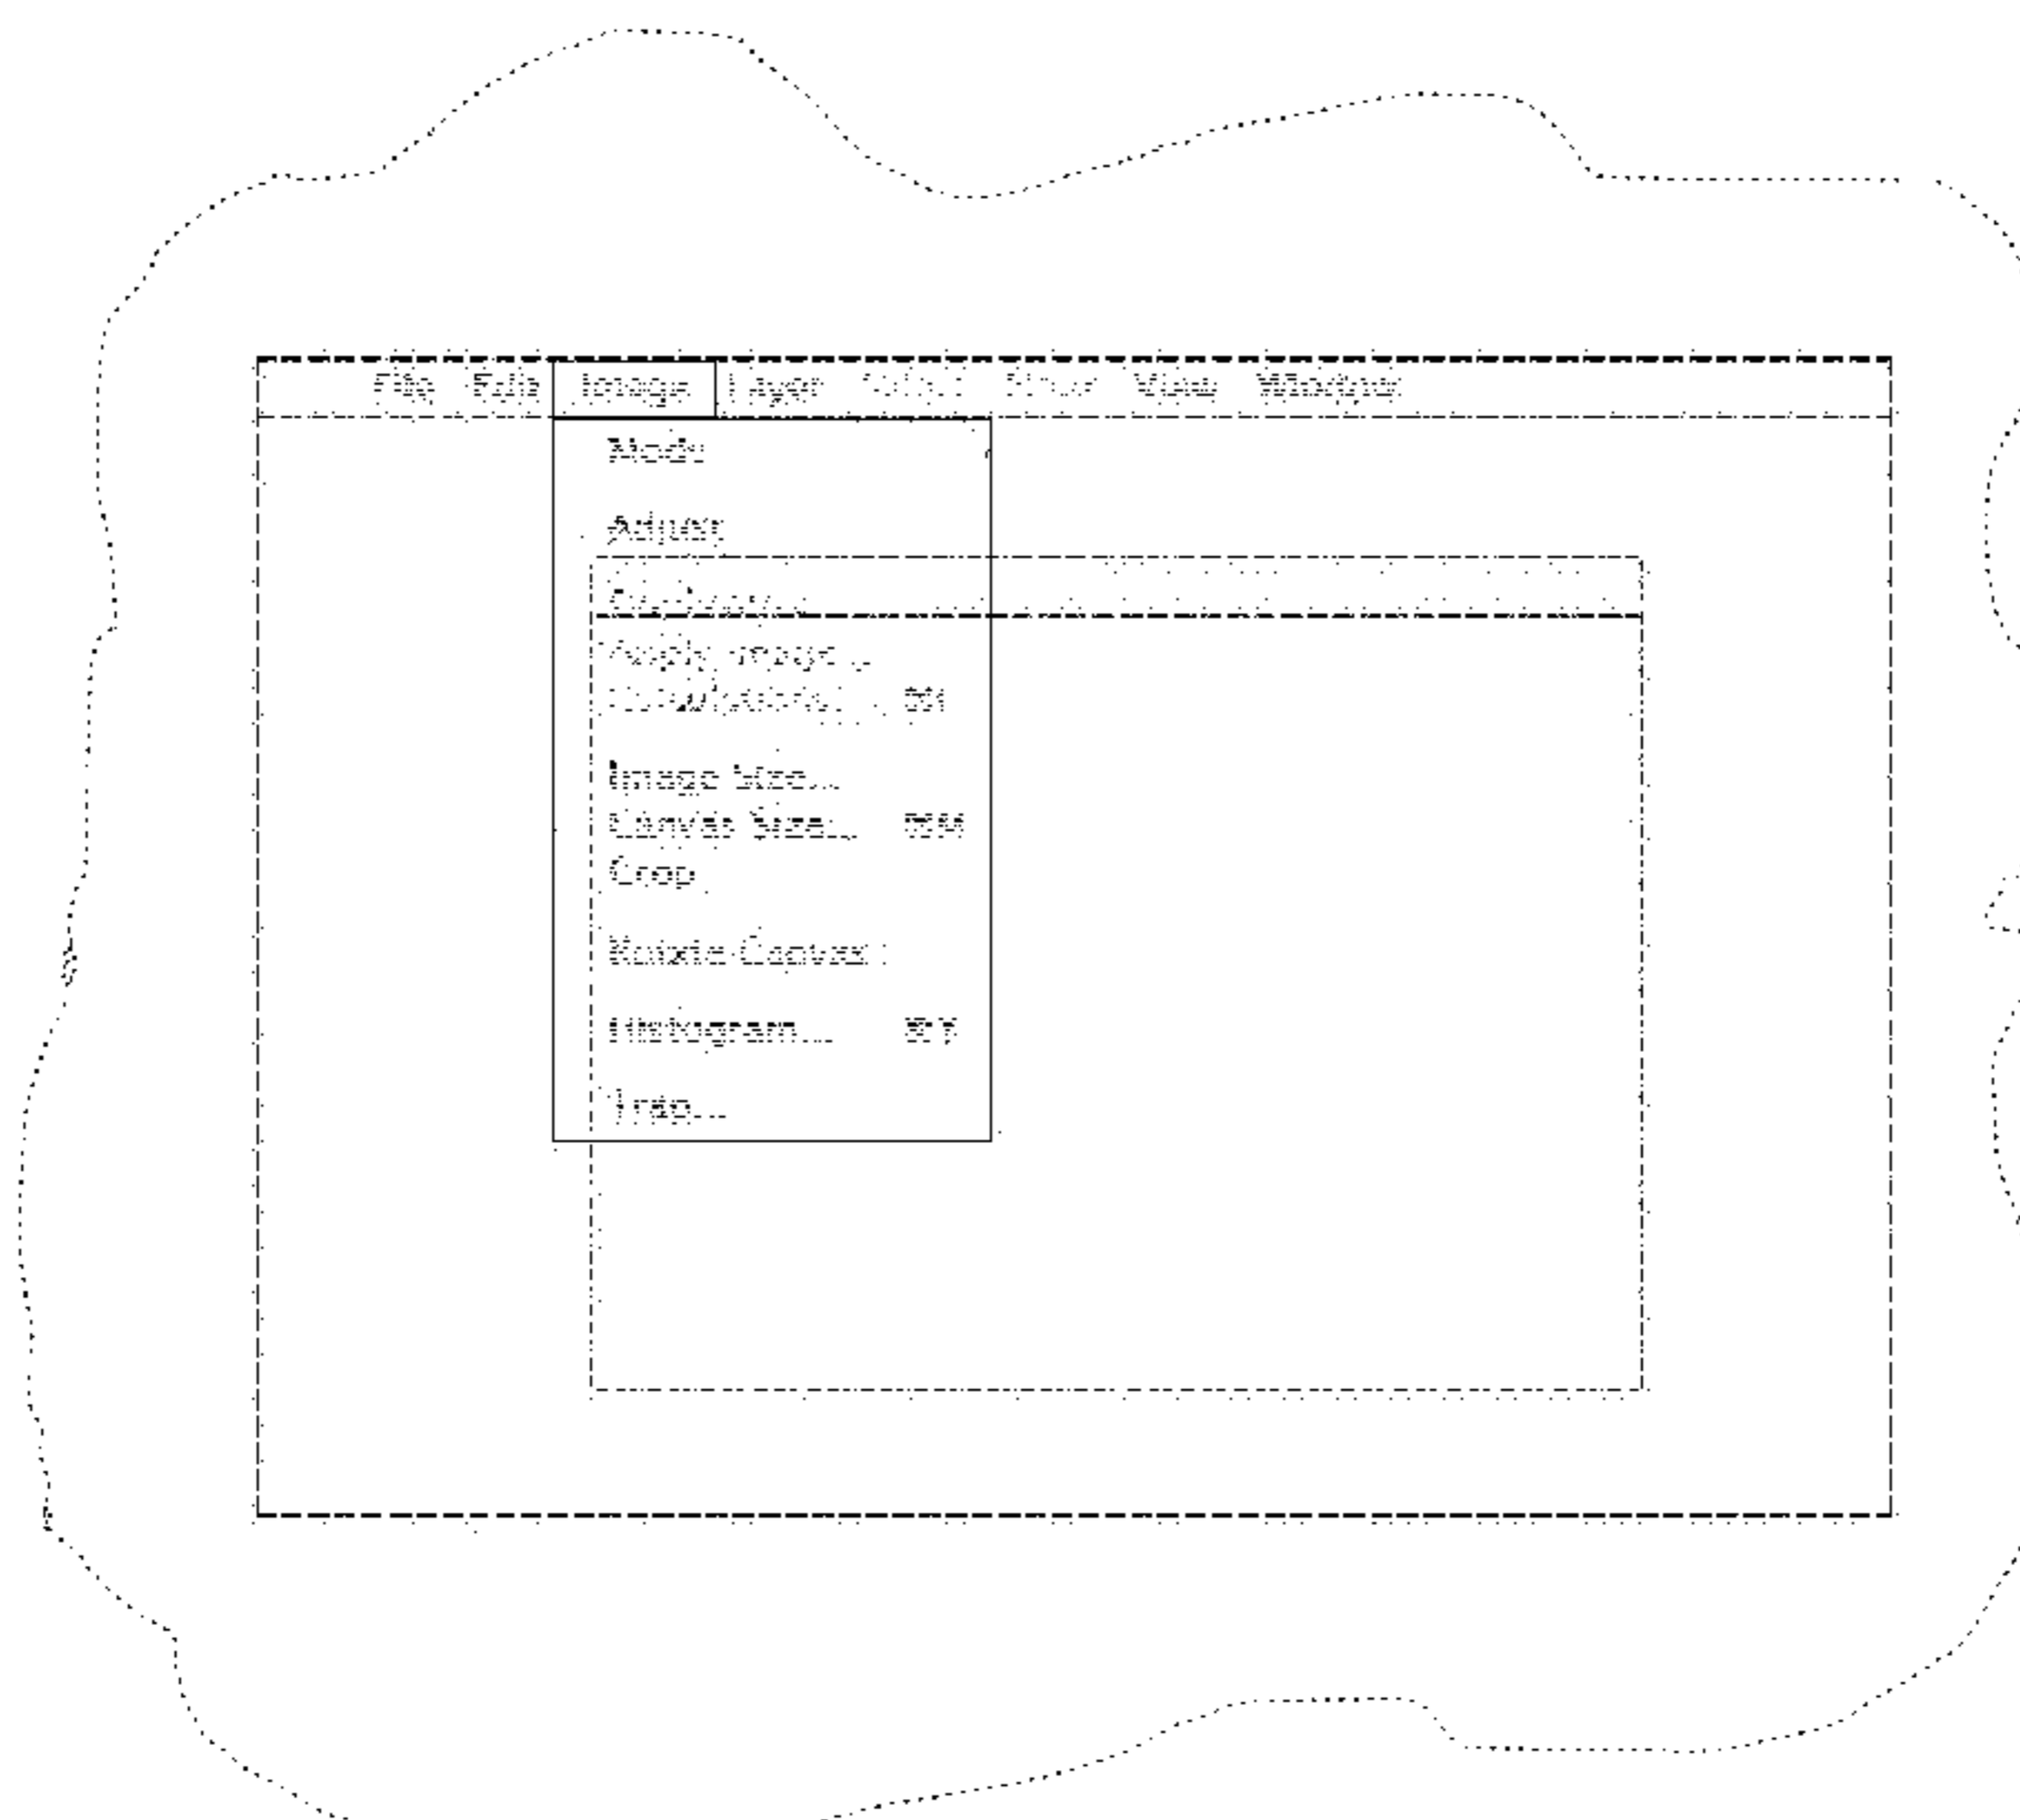

FIG. 2 is a second embodiment thereof.

The pattern of oblique lines shown on the lower window in FIGS. 1 and 2 are shown to portray a translucent/transparent surface.

The broken line showing in both views of a computer display, windows, text, and other images forms no part of the claimed design.

The claimed design is a user interface for a computer display with a large, lower rectangle that conveys the impression of a translucent/transparent surface and a small, upper rectangle that does not convey the impression of a translucent/transparent surface.

1 Claim, 2 Drawing Sheets

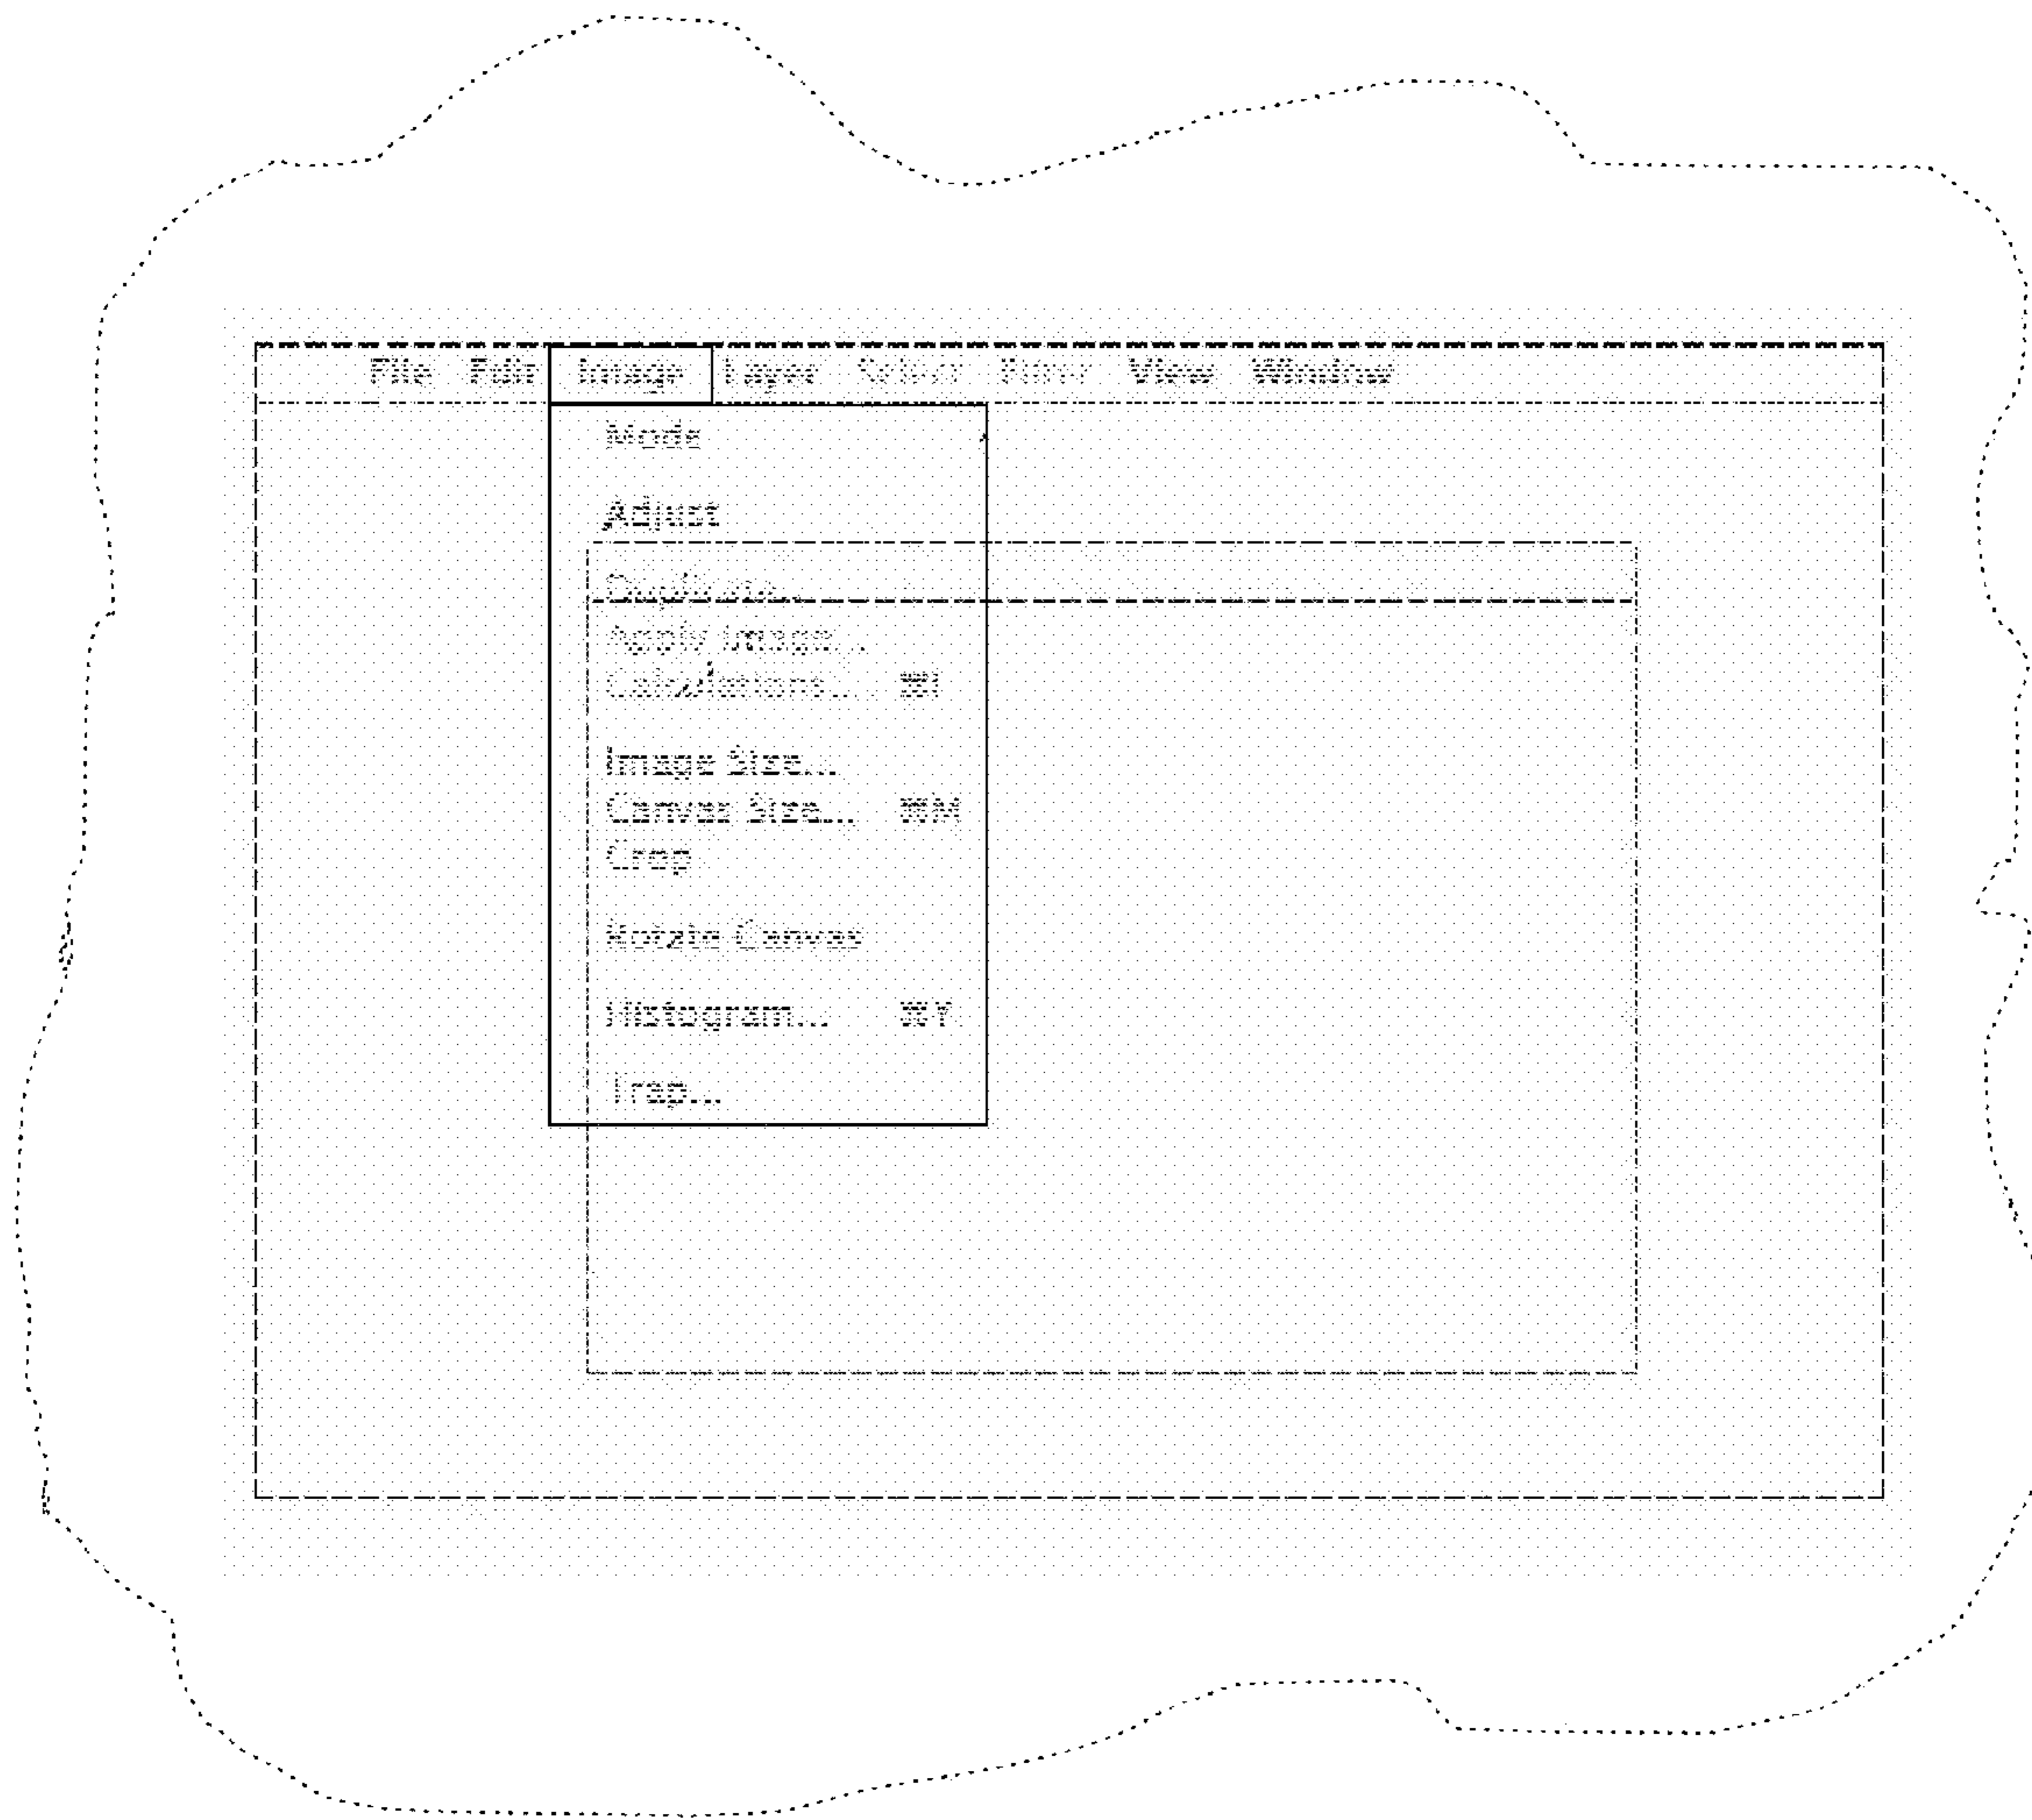

FIG. 1

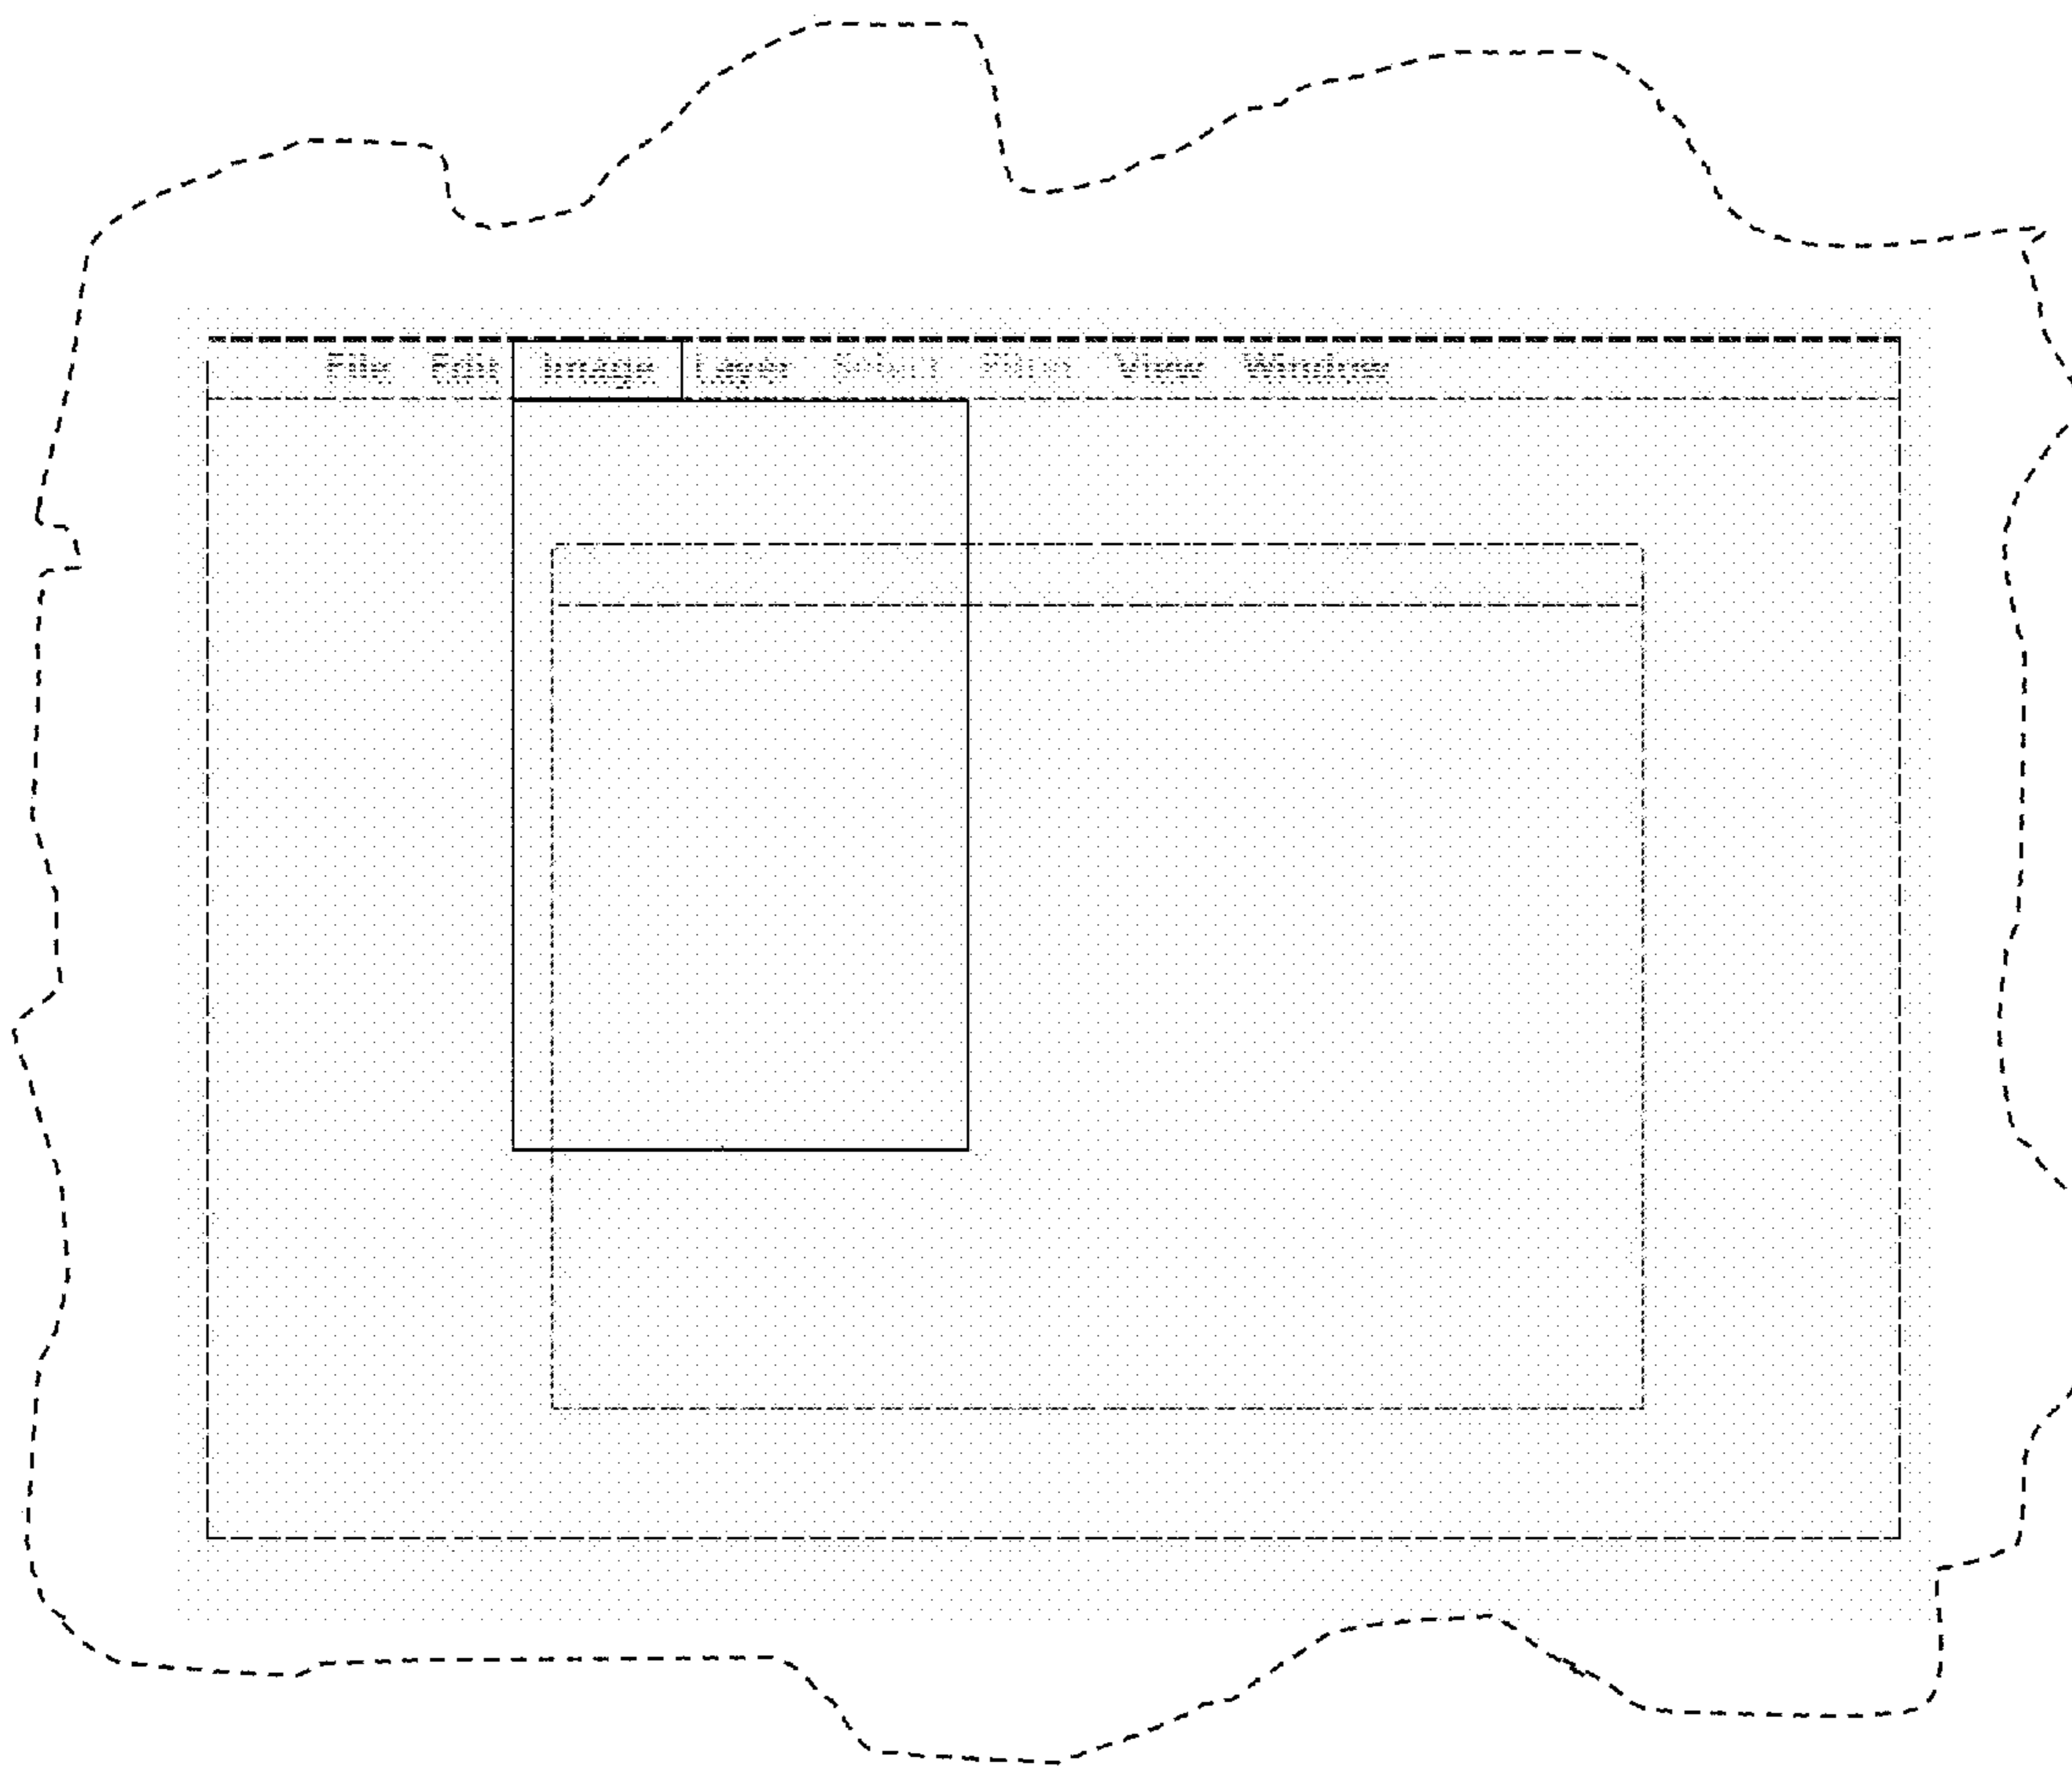

FIG. 2
