FIG. 2 is a right side elevational view thereof; the left side elevational view being a mirror image of the side view shown;

FIG. 3 is a top and left front perspective view thereof, the top and right rear perspective view being a mirror image of the view shown;

FIG. 4 is a top and right side perspective view thereof, the top and left side perspective view thereof being a mirror image of the perspective view shown;

FIG. 5 is a top plan view thereof; and,

FIG. 6 is a bottom plan view thereof.

The indicia shown in the bottom plan view is for illustrative purposes only, forms no part of the claimed invention and is hereby disclaimed.

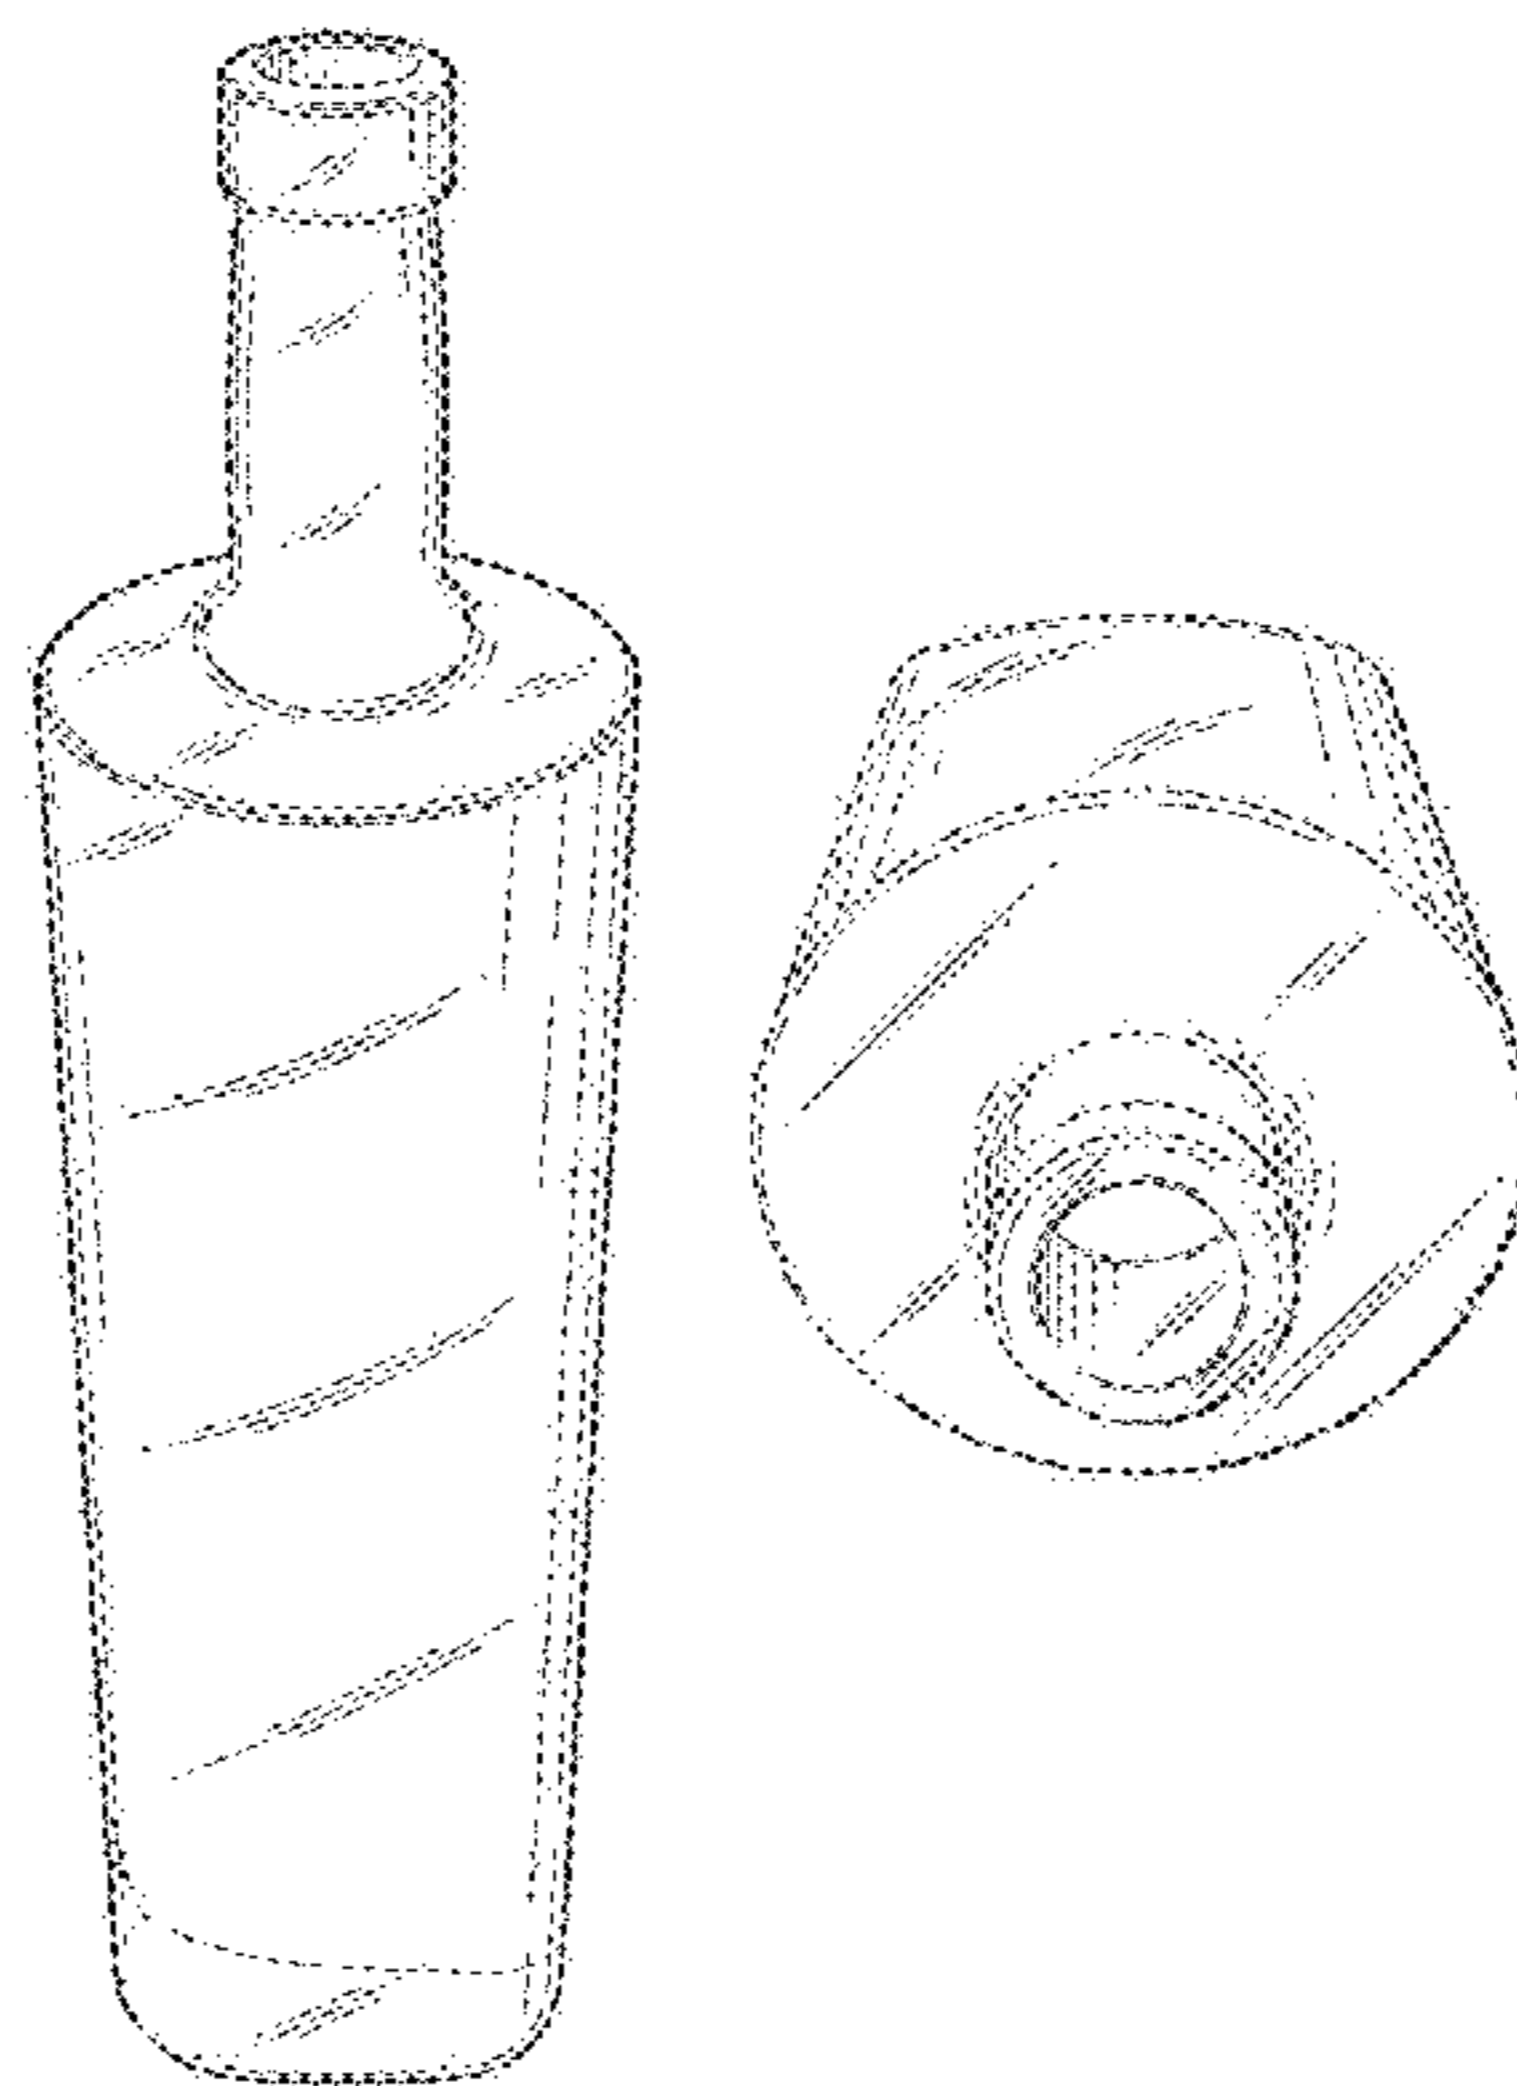

Due to the specific nature of the glass and its instance of changing appearance when rotating it from one angle to another, the same space or portion may take on a different appearance, one which does not change the scope of the invention, as deemed so in this claim.
