US00D629900S

(12) United States Design Patent

Fisher

(10) Patent No.: US D629,900 S
(45) Date of Patent: ** Dec. 28, 2010

(54) **SURGICAL CUTTING GUIDE DEVICE**

(75) Inventor: **Michael Fisher**, Folsom, CA (US)

(73) Assignee: **Synvasive Technology, Inc.**, Reno, NV (US)

(**) Term: **14 Years**

(21) Appl. No.: **29/335,690**

(22) Filed: **Apr. 20, 2009**

(51) **LOC (9) Cl.** **24-02**
(52) **U.S. Cl.** **D24/146**
(58) **Field of Classification Search** ..... D8/20, D8/26, 64, 98, 105; D24/144, 146, 147; 30/115, 144, 151, 162, 163, 166.3, 335; 606/82, 606/85, 176–179; 206/234, 363; 70/456 R; 224/163; 452/160; 374/141
See application file for complete search history.

(57) **CLAIM**

The ornamental design for the surgical cutting guide device, as shown and described.

DESCRIPTION

FIGS. **1-4** show a top view, a side view, a top perspective view and a front view respectively of a surgical cutting guide detailing our new design according to the first embodiment of the present invention;

FIGS. **5-8** show a top view, a side view, a top perspective view and a front view respectively of a surgical cutting guide detailing our new design according to the second embodiment of the present invention;

FIGS. **9-12** show a top view, a side view, a top perspective view and a front view respectively of a surgical cutting guide detailing our new design according to the third embodiment of the present invention;

FIGS. **13-16** show a top view, a side view, a top perspective view and a front view respectively of a surgical cutting guide detailing our new design according to the fourth embodiment of the present invention;

FIGS. **17-20** show a top view, a side view, a top perspective view and a front view respectively of a surgical cutting guide detailing our new design according to the fifth embodiment of the present invention; and,

FIGS. **21-24** show a top view, a side view, a top perspective view and a front view respectively of a surgical cutting guide detailing our new design according to the sixth embodiment of the present invention.

The portions of the surgical cutting guide devices shown in broken lines form no part of the claimed design.
