(57) CLAIM

(45) **Date of Patent:**

The ornamental design for an electric PAR lamp, as shown and described.

DESCRIPTION

FIG. 1 is a top view of an electric PAR lamp, in which a first embodiment of our design is embodied.

FIG. 2 is a perspective view thereof.

FIG. 3 is another perspective view thereof, taken from a different viewpoint than FIG. 2 to show additional aspects of the design.

FIG. 4 is a side view thereof, taken along the line 4—4 shown in FIG. 1. Because of the symmetry of the design, the side views taken along the lines 4A—4A and 4B—4B shown in FIG. 1 are the same as the view taken along the line 4—4 shown in FIG. 1.

FIG. 5 is a bottom view thereof.

FIGS. 6 and 7 are bottom and perspective views, respectively, of a variation of our design, similar to FIGS. 5 and 3, respectively, differing only in environmental structure that forms no part of the claimed design; and,

FIG. 8 is another side view thereof, taken along the line 8—8 shown in FIG. 1, but which is enlarged from the other views in order to show in greater detail the ornamental appearance of the fins on the object in which the design is embodied, and the ornamental appearance of the fins shown in all views is understood to be the same. Because of the symmetry of the design, the side views taken along the lines 8A—8A and 8B—8B shown in FIG. 1 are the same as the view taken along the line 8—8 shown in FIG. 1.

The details shown in broken line illustration in the drawing figures are environmental structure that forms no part of the claimed design. The trademark name of the Assignee ("SHARP") shown in dotted outline in FIG. 4 is optional environmental marking that may optionally appear in one or more of the side views 4—4, 4A—4A, and 4B—4B, and in FIGS. 2, 3, and 8, and which forms no part of the claimed design.

The article in which the design is embodied is an electric PAR lamp, intended to be used for illumination.
