(57) **CLAIM**

The ornamental design for a pulling eye, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a pulling eye where the broken line showing of the head portion of the pulling eye is for the purpose of illustrating portions of the article and forms no part of the claimed design;

FIG. 2 is a rear view of the pulling eye where the broken line showing of an aperture in the head portion of the pulling eye is for the purpose of illustrating portions of the article and forms no part of the claimed design;

FIG. 3 is a perspective view of the pulling eye, where the broken line showings of indented portions of the pulling eye and a head portion of the pulling eye are for the purpose of illustrating portions of the article and form no part of the claimed design;

FIG. 4 is a right side view of the pulling eye where the broken line showings of the indented portions of the pulling eye and the head portion of the pulling eye are for the purpose of illustrating portions of the article and form no part of the claimed design;

FIG. 5 is a top view of the pulling eye where the broken line showings of the indented portions of the pulling eye and the head portion of the pulling eye are for the purpose of illustrating portions of the article and form no part of the claimed design;

FIG. 6 is an exploded view of the pulling eye showing a first alternative for connecting the head portion of the pulling eye to a barrel portion of the pulling eye, where the broken line showings of the indented portions of the pulling eye and the head portion of the pulling eye are for the purpose of illustrating portions of the article and form no part of the claimed design; and,

FIG. 7 is an exploded view of the pulling eye showing a second alternative for connecting the head portion of the pulling eye to the barrel portion of the pulling eye, where the broken line showings of the indented portions of the pulling eye, the head portion of the pulling eye, and a screw portion of the barrel portion of the pulling eye are for the purpose of illustrating portions of the article and form no part of the claimed design.

The left side view and bottom view of the pulling eye are not shown, as they are identical to the right side view and top view of the pulling eye shown in FIGS. 4 and 5, respectively.

The broken line showing of the pulling eye is included for the purpose of illustrating portions of the article and forms no part of the claimed design.
