(57) **CLAIM**

The ornamental design for an adjustable organizer, as shown and described.

DESCRIPTION

FIG. 1 is a top plan view of the adjustable organizer. The dotted lines represent the ends of the walls of the adjustable organizer and are shown in dotted lines as the ends do not form part of the claimed design, but rather show the environment in which the claimed design appears.

FIG. 2 is top perspective view of a portion of a wall of the adjustable organizer, showing my inventive design. The dotted lines represent the bounds of the claimed subject matter. The boundaries and sections shown in dotted lines are unclaimed subject matter and do not form part of the claimed design.

FIG. 3 is a top plan view of a wall of the adjustable organizer, showing my inventive design. The dotted lines represent the bounds of the claimed subject matter. The boundaries shown in dotted lines are unclaimed subject matter and do not form part of the claimed design. The bottom plan view is identical and is not shown.

FIG. 4 is an end elevation view a wall of the adjustable organizer. The boundaries of the side are shown in dotted lines as the end of the wall does not form part of the claimed design. The other end view is identical and is not shown.

FIG. 5 is a side view of the wall of the adjustable organizer. The dotted lines represent the bounds of the claimed subject matter. The boundaries shown in dotted lines are unclaimed subject matter and do not form part of the claimed design. The other side view is identical and is not shown.

FIG. 6 is a persepctive view of the coupling of the adjustable organizer of the present invention. The boundaries shown in dotted lines are unclaimed subject matter and do not form part of the claimed design.

FIG. 7 is a top plan view of the coupling of the adjustable organizer of the present invention. The bottom plan view is identical and is not shown.

FIG. 8 is a end elevational view of a portion of the coupling of the adjustable organizer of the present invention. The dotted lines represent the bounds of the claimed subject matter. The boundaries shown in dotted lines are unclaimed subject matter and do not form part of the claimed design. The other end view is identical and is not shown.

FIG. 9 is an side elevational view of a portion of the coupling of the adjustable organizer of the present invention. The dotted lines represent the bounds of the claimed subject matter. The boundaries shown in dotted lines are unclaimed subject matter and do not form part of the claimed design. The other side view is identical and is not shown.

FIG. 10 is is a persepective view of the connector of the adjustable organizer of the present invention. The boundaries shown in dotted lines are unclaimed subject matter and do not form part of the claimed design.

FIG. 11 is a top plan view of the coupling of the adjustable organizer of the present invention. The bottom plan view is identical and is not shown.

FIG. 12 is a side elevational view of a portion of the coupling of the adjustable organizer of the present invention. The dotted lines represent the bounds of the claimed subject matter. The boundaries shown in dotted lines are unclaimed subject matter and do not form part of the claimed design. The other side view is identical and is not shown.

FIG. 13 is an end elevational view of a portion of the coupling of the adjustable organizer of the present invention. The dotted lines represent the bounds of the claimed subject matter. The boundaries shown in dotted lines are unclaimed subject matter and do not form part of the claimed design; and,

FIG. 14 is an end elevational view of a portion of the coupling of the adjustable organizer of the present invention. The dotted lines represent the bounds of the claimed subject matter. The boundaries shown in dotted lines are unclaimed subject matter and do not form part of the claimed design.
