FIG. 1 is a top plan view of a first embodiment of a paper product showing our new paper product it being understood that the inner perimeter of broken lines defines one repeat unit of the claimed design, which repeats uniformly throughout the length and width of the paper product. The outer perimeter of broken lines indicates that a specific length and width of the paper product forms no part of the claimed design;

FIG. 2 is a top plan view of the paper product of FIG. 1; and, FIG. 3 is a top plan view of a second embodiment of a paper product it being understood that the broken lines shown along the border of the figure depict the boundaries of one repeat unit of the claimed design and indicate that a specific length and width of the paper product forms no part of the claimed design. The design repeats uniformly throughout the length and width of the paper product.

See application file for complete search history.

The broken lines represent the environment of additional repeat units included to show the design in a position of use and form no part of the claimed design.
