(57) **CLAIM**

The ornamental design for a soft shell for a diabetes management system, as shown and described.

DESCRIPTION

The present application relates to U.S. patent application Ser. No. 12/039,722, to Daniel Saffer et al., filed Feb. 28, 2008, entitled “Diabetes Management System”, which also relates to design application Ser. No. 29/304,346, to Daniel Saffer et al., filed Feb. 28, 2008, entitled “Remote Control Device for a Diabetes Management System”.

FIG. 1 is a top view of a soft shell for a diabetes management system of our new design;

FIG. 2 is a back view of the soft shell shown in FIG. 1 showing an insulin reservoir shaped indentation and an adhesive ring;

FIG. 3 is a side view of the soft shell shown in FIG. 1;

FIG. 4 is a sectional view of the soft shell shown in FIG. 1, taken along line 4—4' of FIG. 1;

FIG. 5 is a top view of a soft shell for a diabetes management system, according to another embodiment of our new design;

FIG. 6 is a back view of the soft shell shown in FIG. 5 showing an insulin reservoir shaped indentation and an adhesive ring;

FIG. 7 is a side view of the soft shell shown in FIG. 5;

FIG. 8 is a sectional view of the soft shell shown in FIG. 5, taken along line 8—8' of FIG. 5; and,

FIG. 9 is a soft shell for a diabetes management system mounted to a patient's body, according to another embodiment of our new design.

The broken lines showing elements of the soft shell in the above described figures are for illustrative purposes only and form no part of the claimed design. For example, the patient's body in FIG. 9 is not claimed.
