(57) **CLAIM**

The ornamental design for a film conversion device with a display, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a film conversion device with display, where the display is in an open position;

FIG. 2 is a perspective view of the film conversion device with display, where the display is in a closed position;

FIG. 3 is a first side elevational view of the film conversion device with display, where the display is in the open position;

FIG. 4 is a first side elevational view of the film conversion device with display, where the display is in the closed position;

FIG. 5 is a second side elevational view of the film conversion device with display, where the display is in the open position;

FIG. 6 is a top plan view of the film conversion device with display, where the display is in the open position; and,

FIG. 7 is a bottom plan view of the film conversion device with display.

The broken lines showing portion of a film conversion device with a display are included for illustrating environmental structure and form no part of the claimed design.

1 Claim, 7 Drawing Sheets
