(57) **CLAIM**

The ornamental design for a computer monitor or display panel with display icon for pulmonary function, as shown and described.

DESCRIPTION

FIG. 1 is a front view of the computer monitor or display panel with display icon for pulmonary function according to my new design;

FIG. 2 is a front view of the second embodiment thereof;

FIG. 3 is a front view of the third embodiment thereof; and,

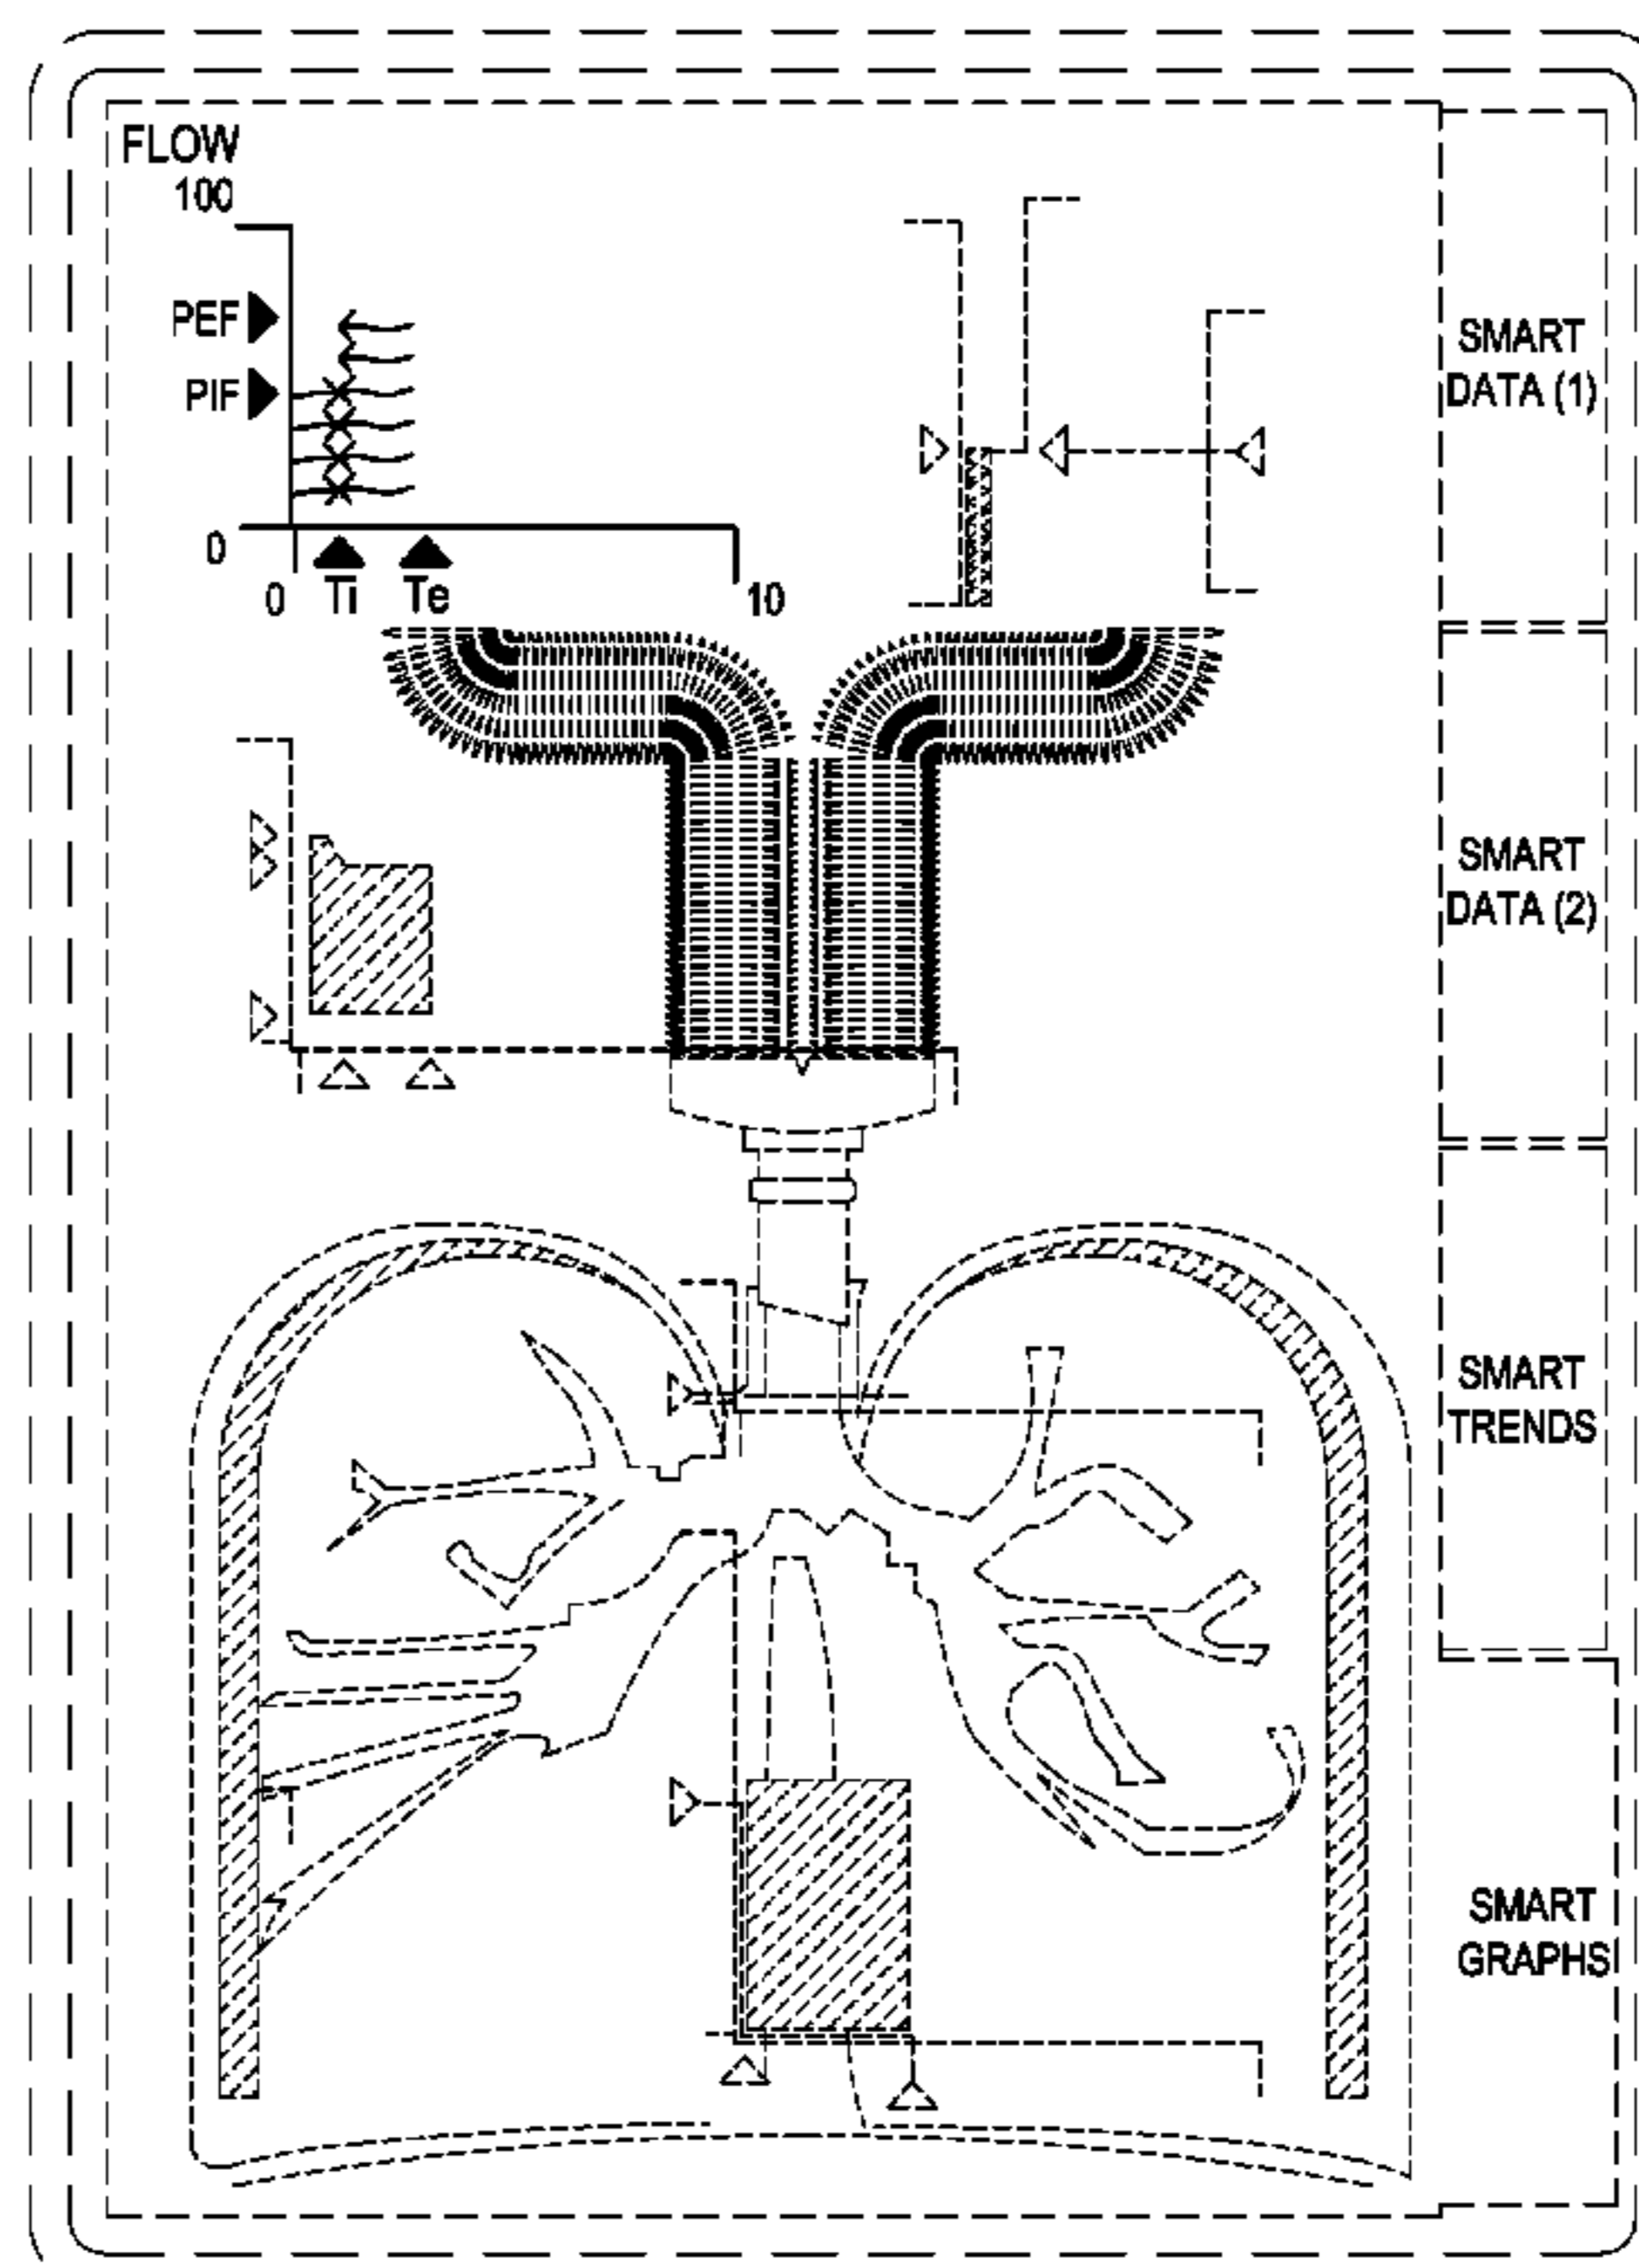

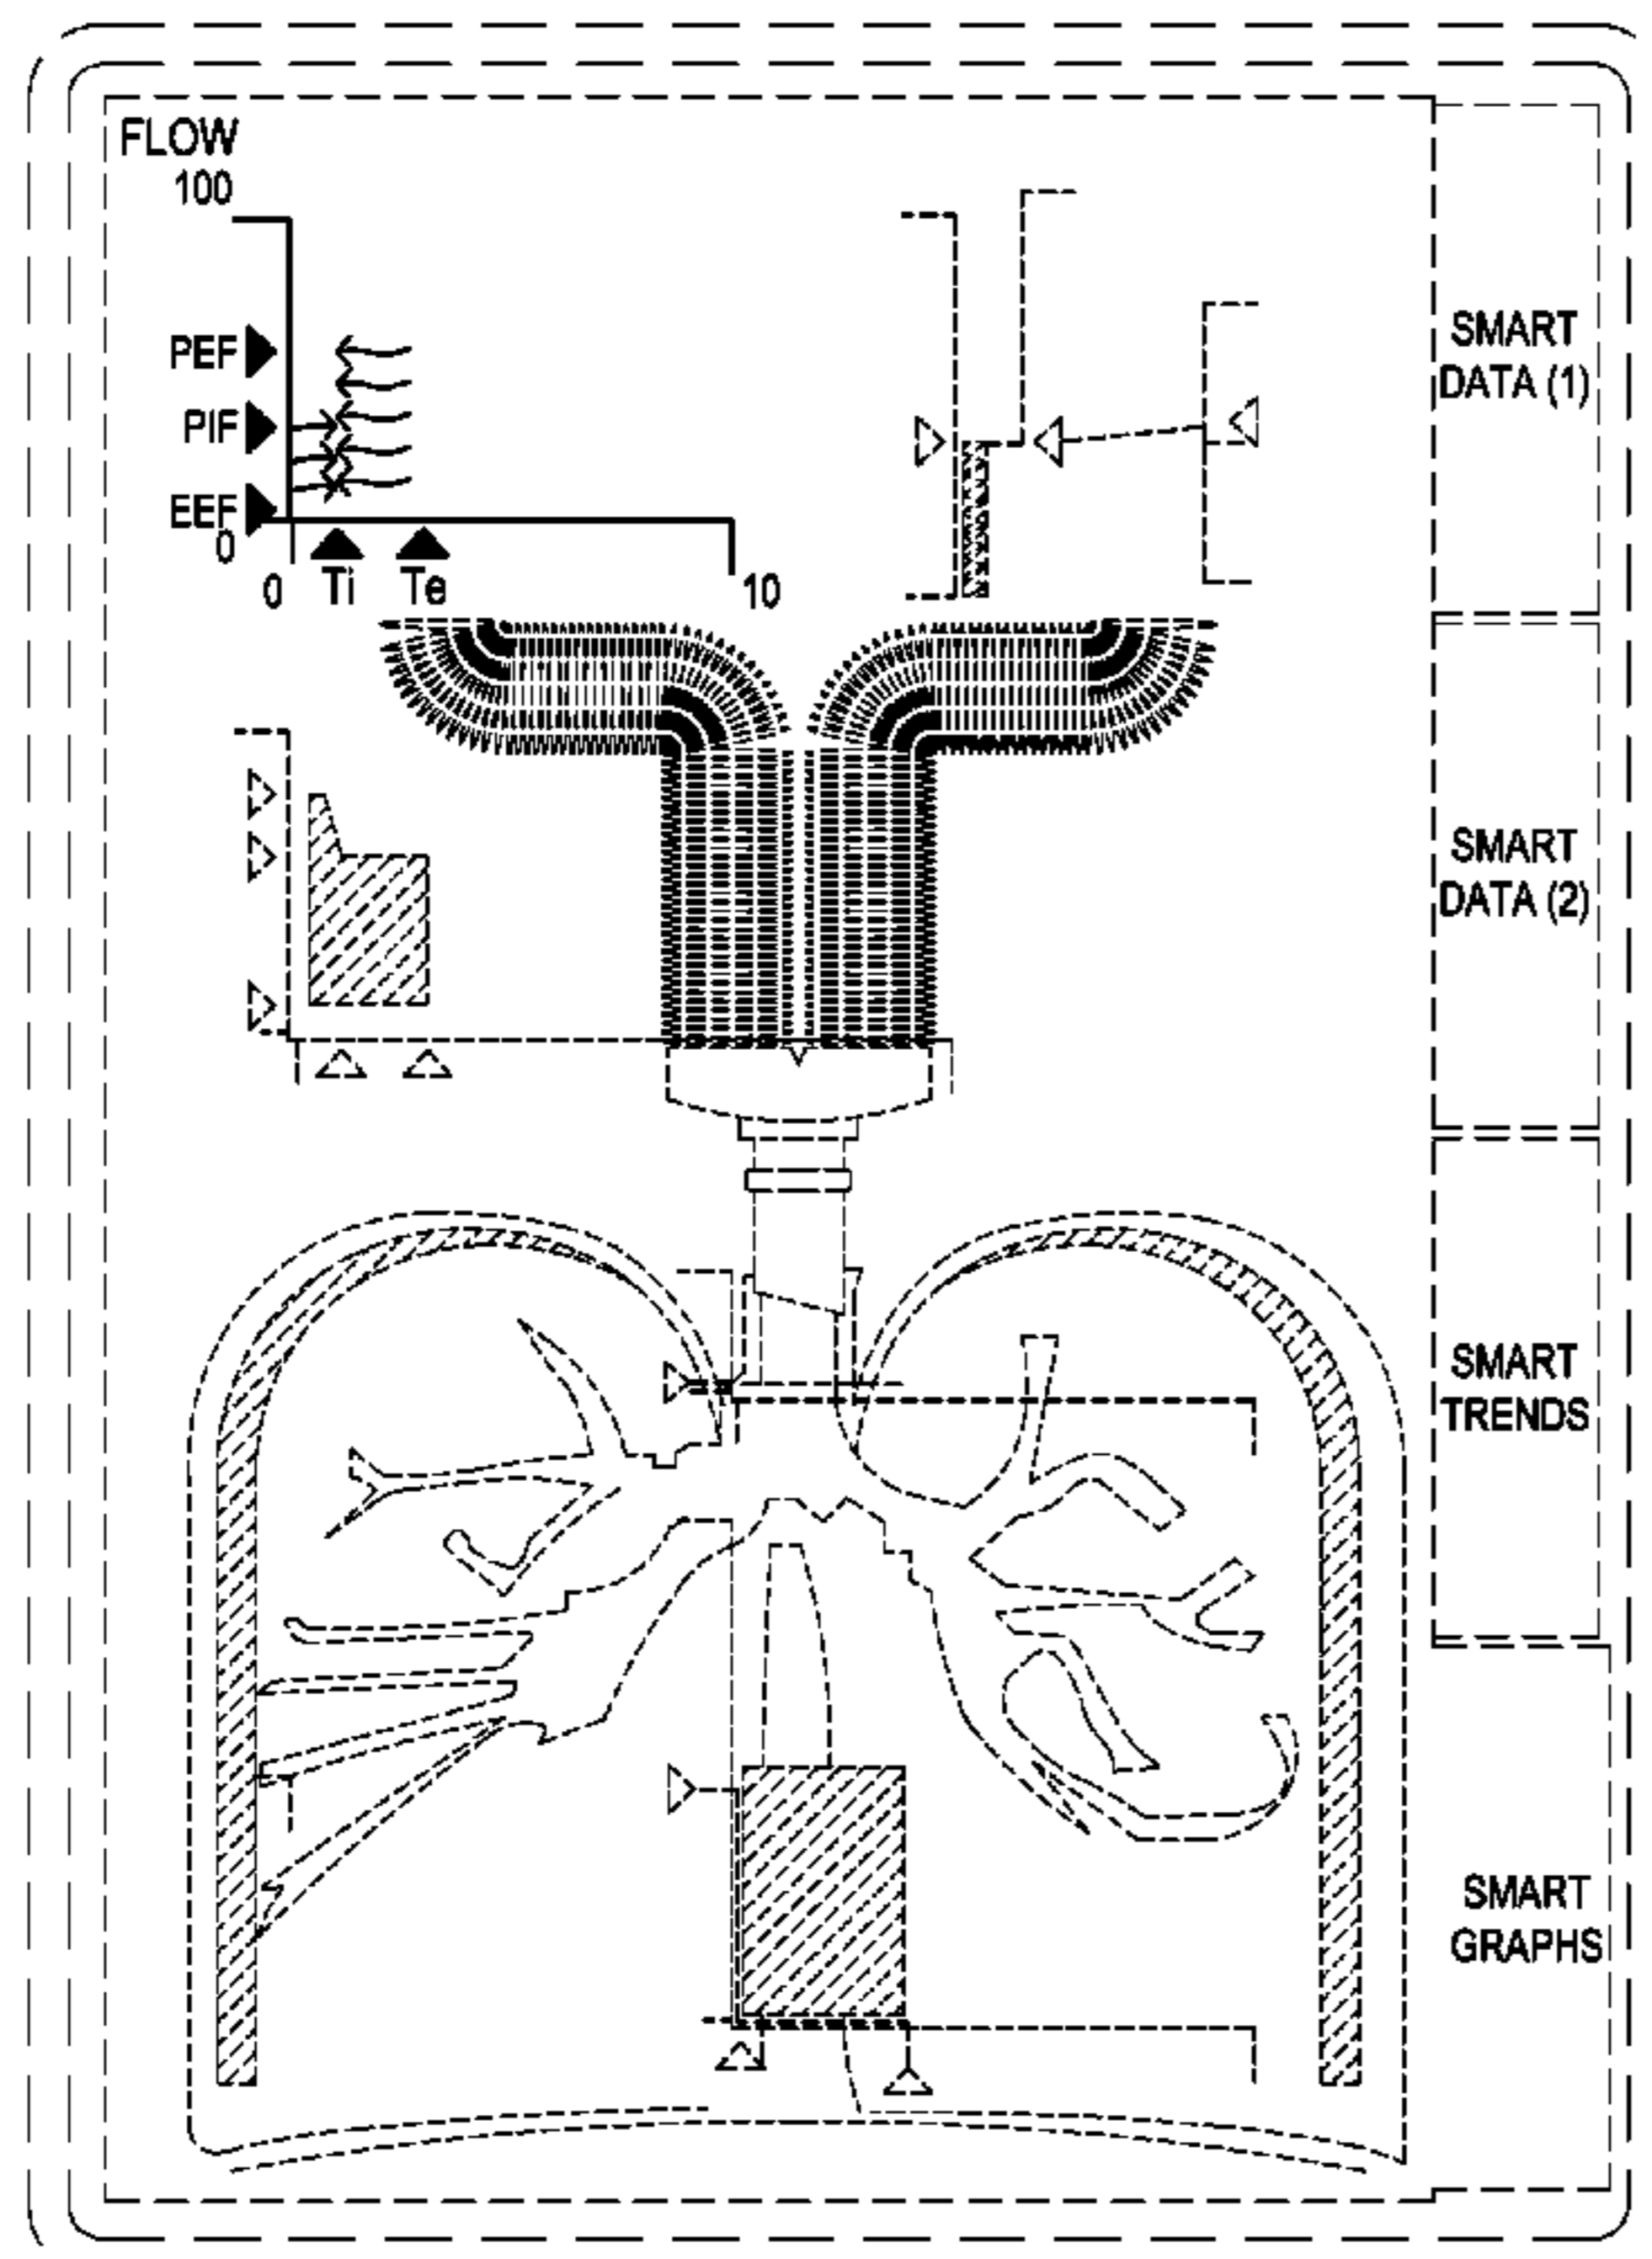

FIG. 4 is a front view of the fourth embodiment thereof.

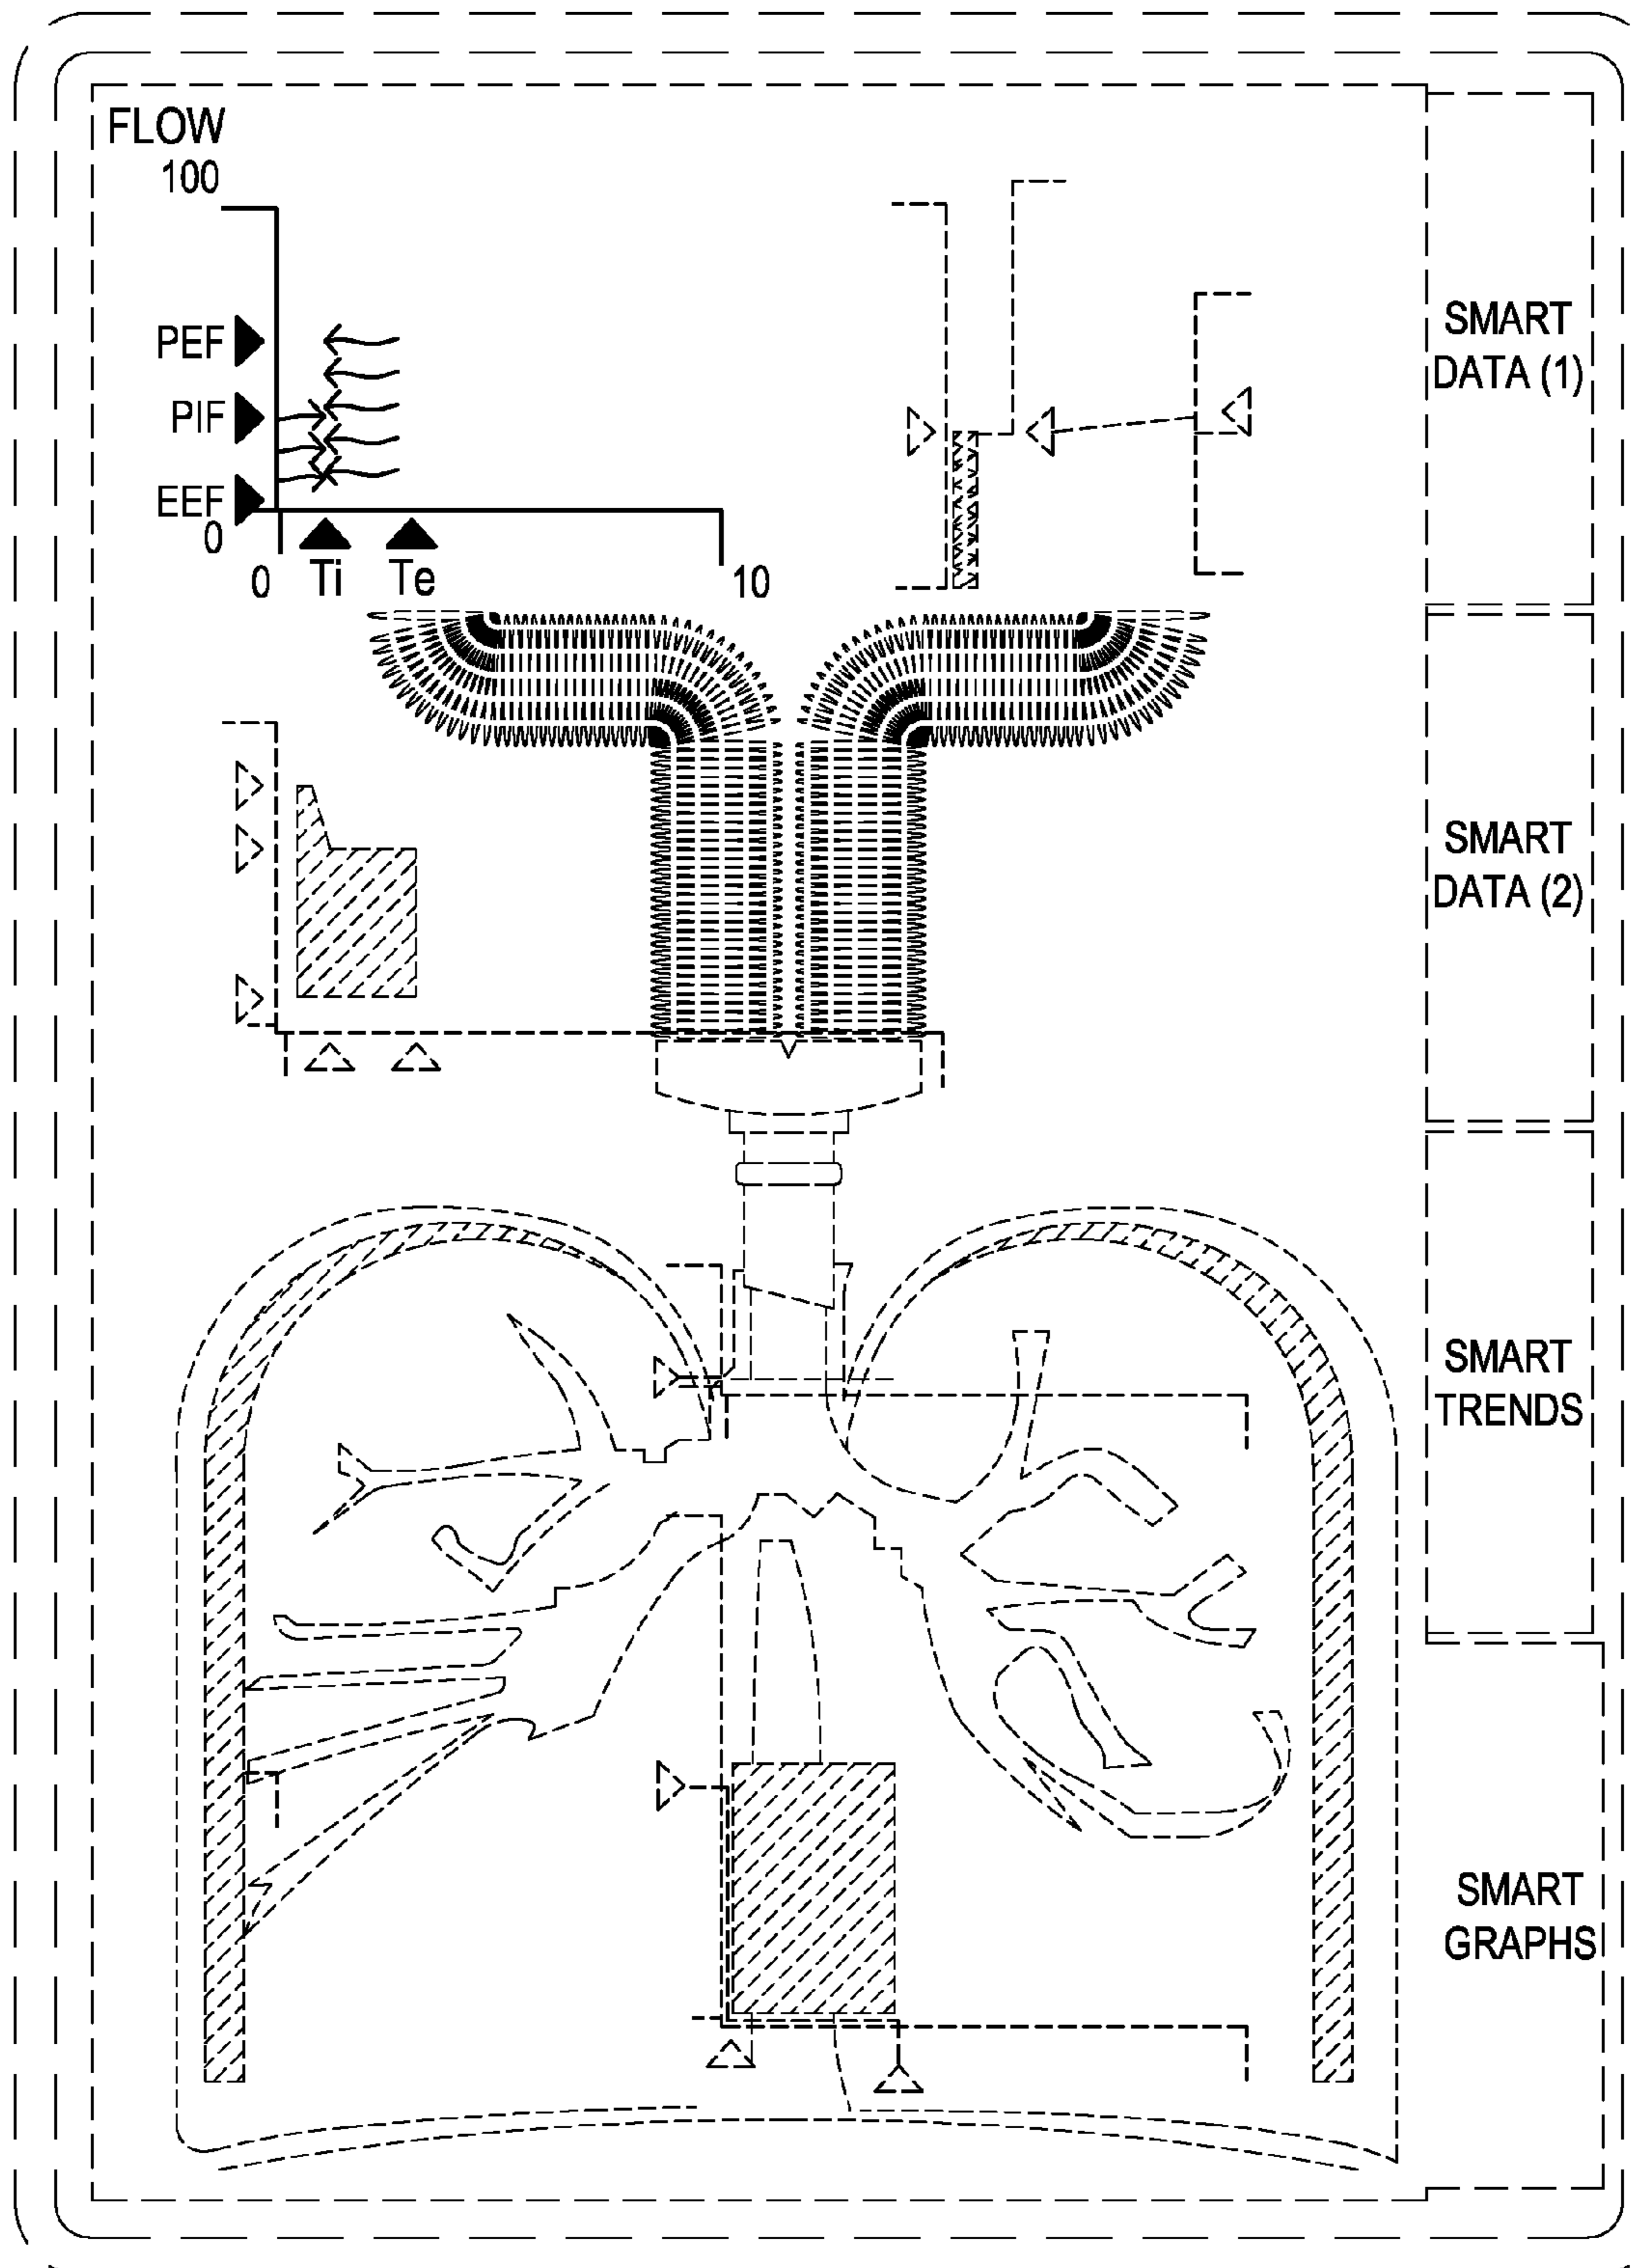

The claimed design is directed to a computer-generated icon, shown in the upper left corner of a display screen, representing a respiratory flow under different physiological conditions.

The broken line showing of the computer monitor or display panel and the broken line showing of portions of the display icon for pulmonary function represent unclaimed environment and form no part of the claimed design.

Graphic display of pulmonary functions, such as flow rate, in form of an icon on a display screen during a medical evaluation or procedure.

1 Claim, 4 Drawing Sheets

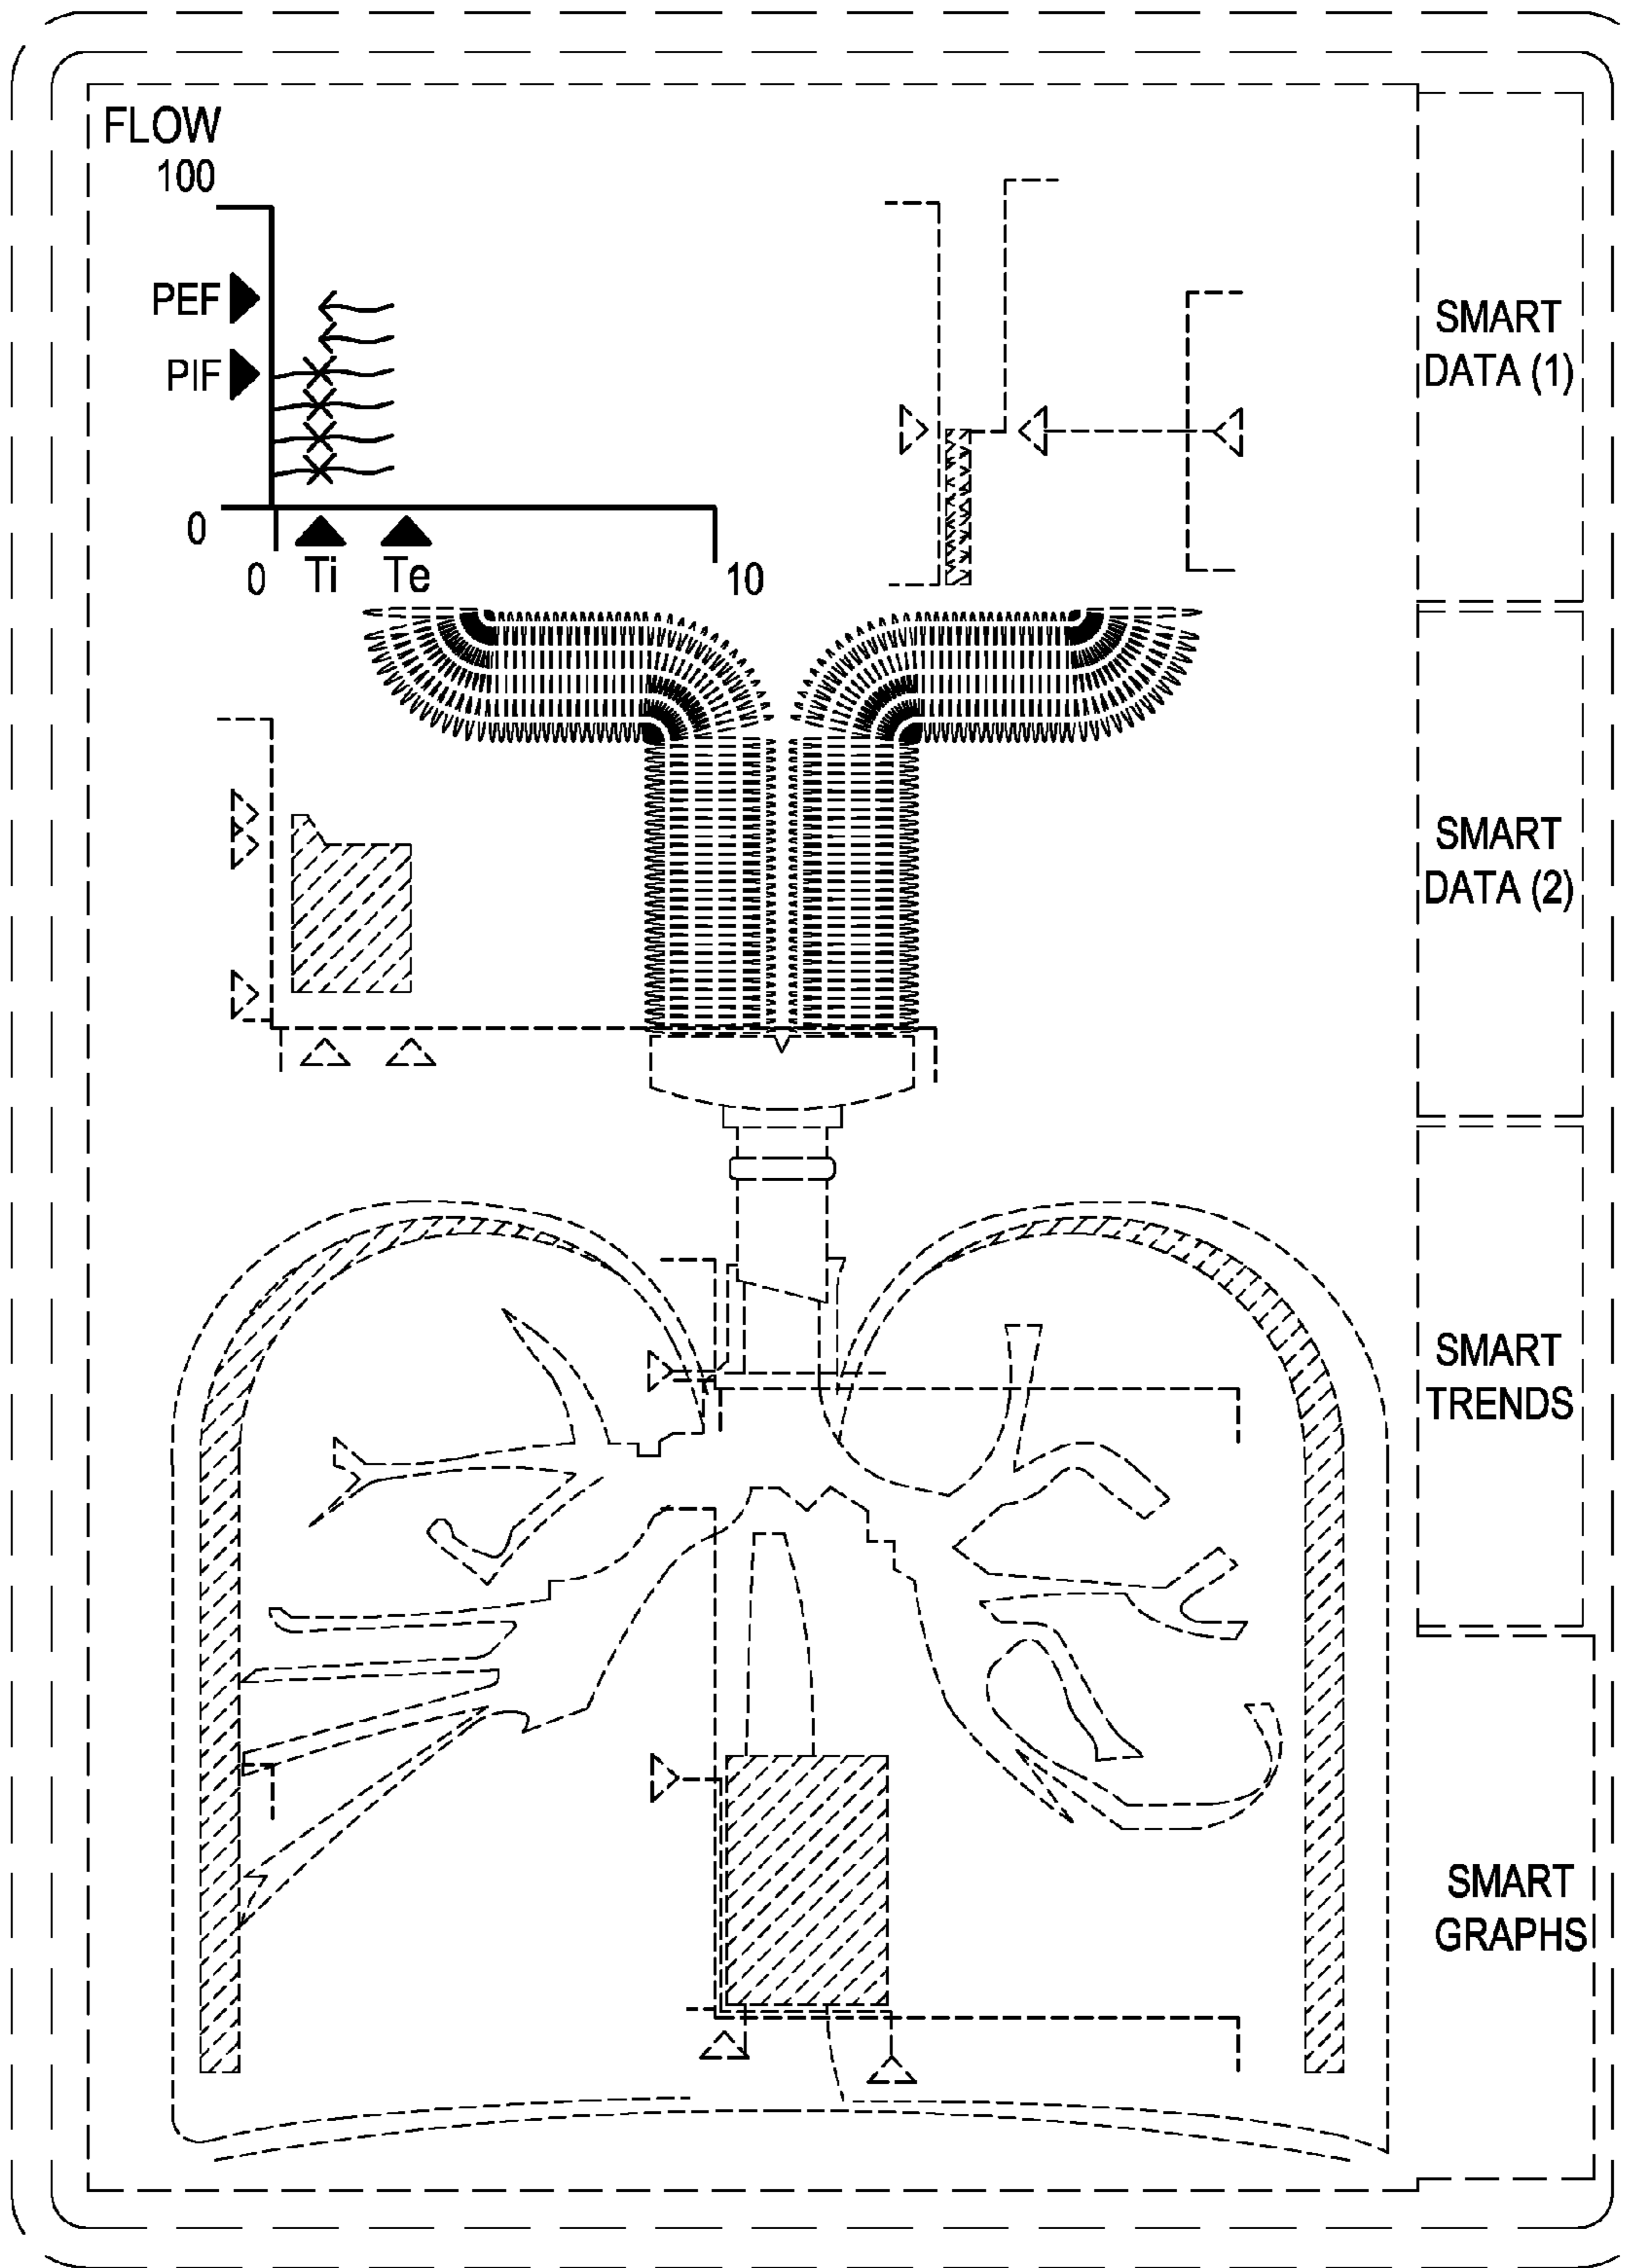

FIG. 2

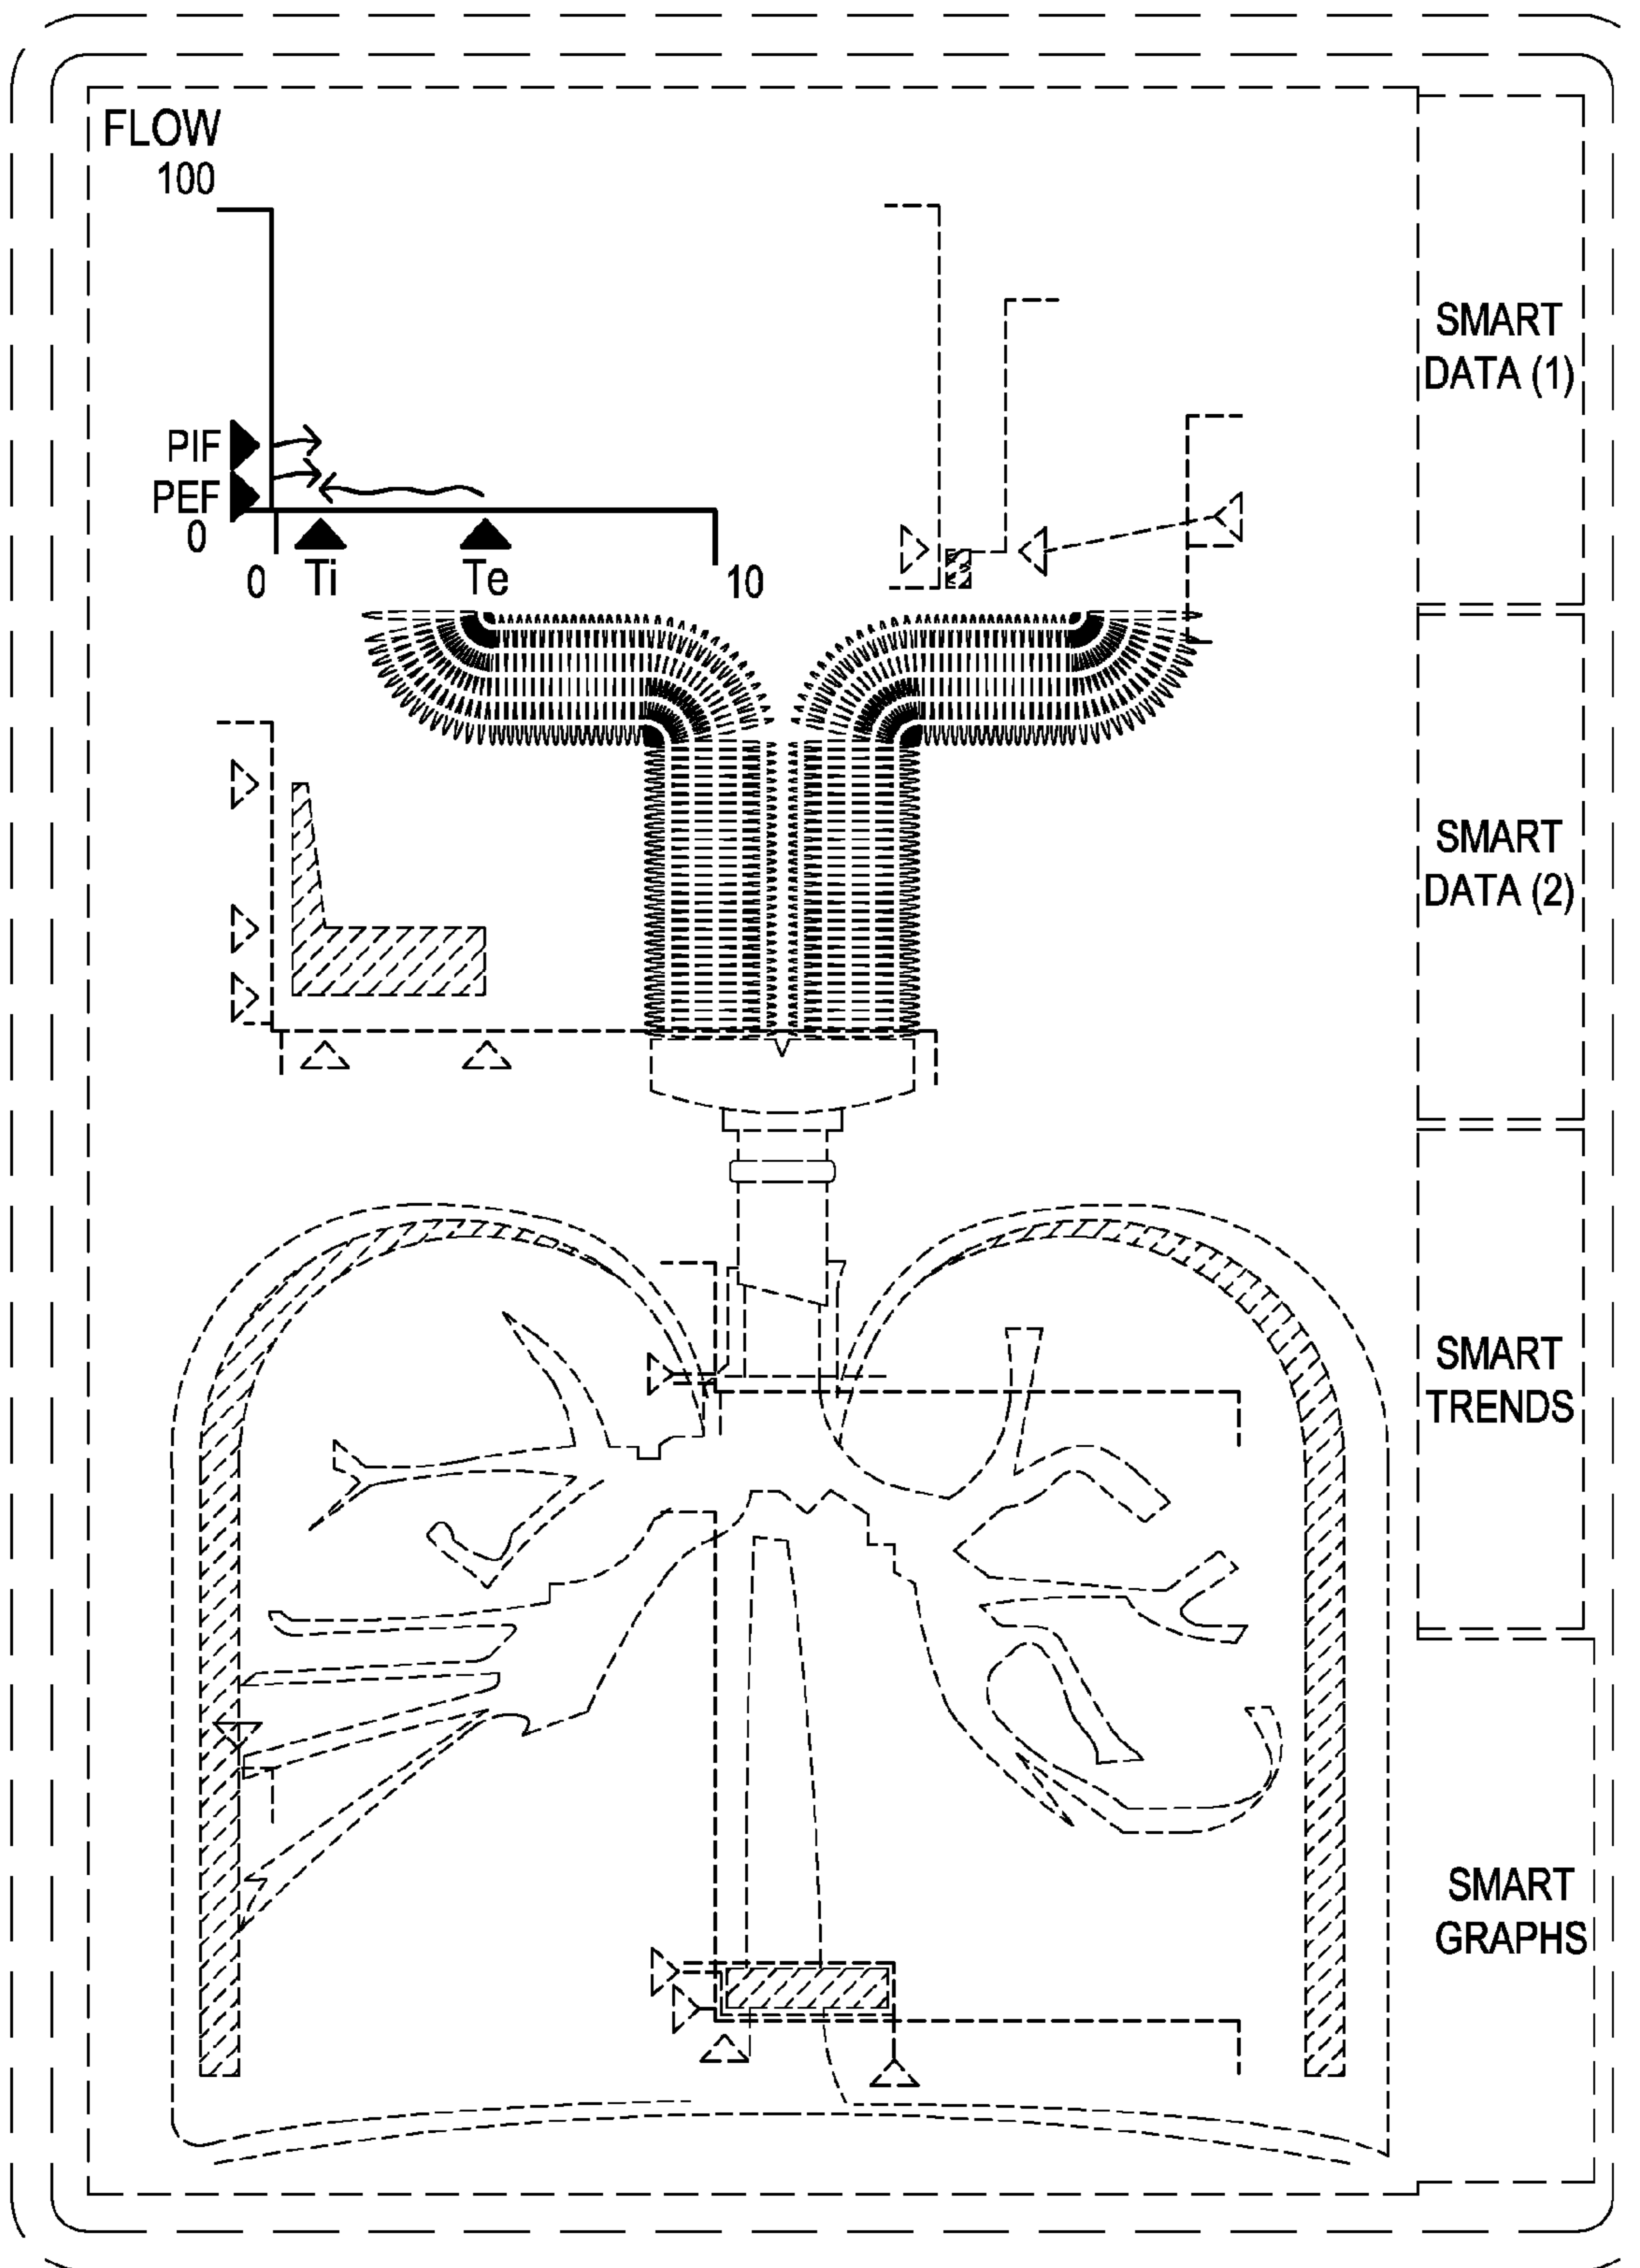

FIG. 3

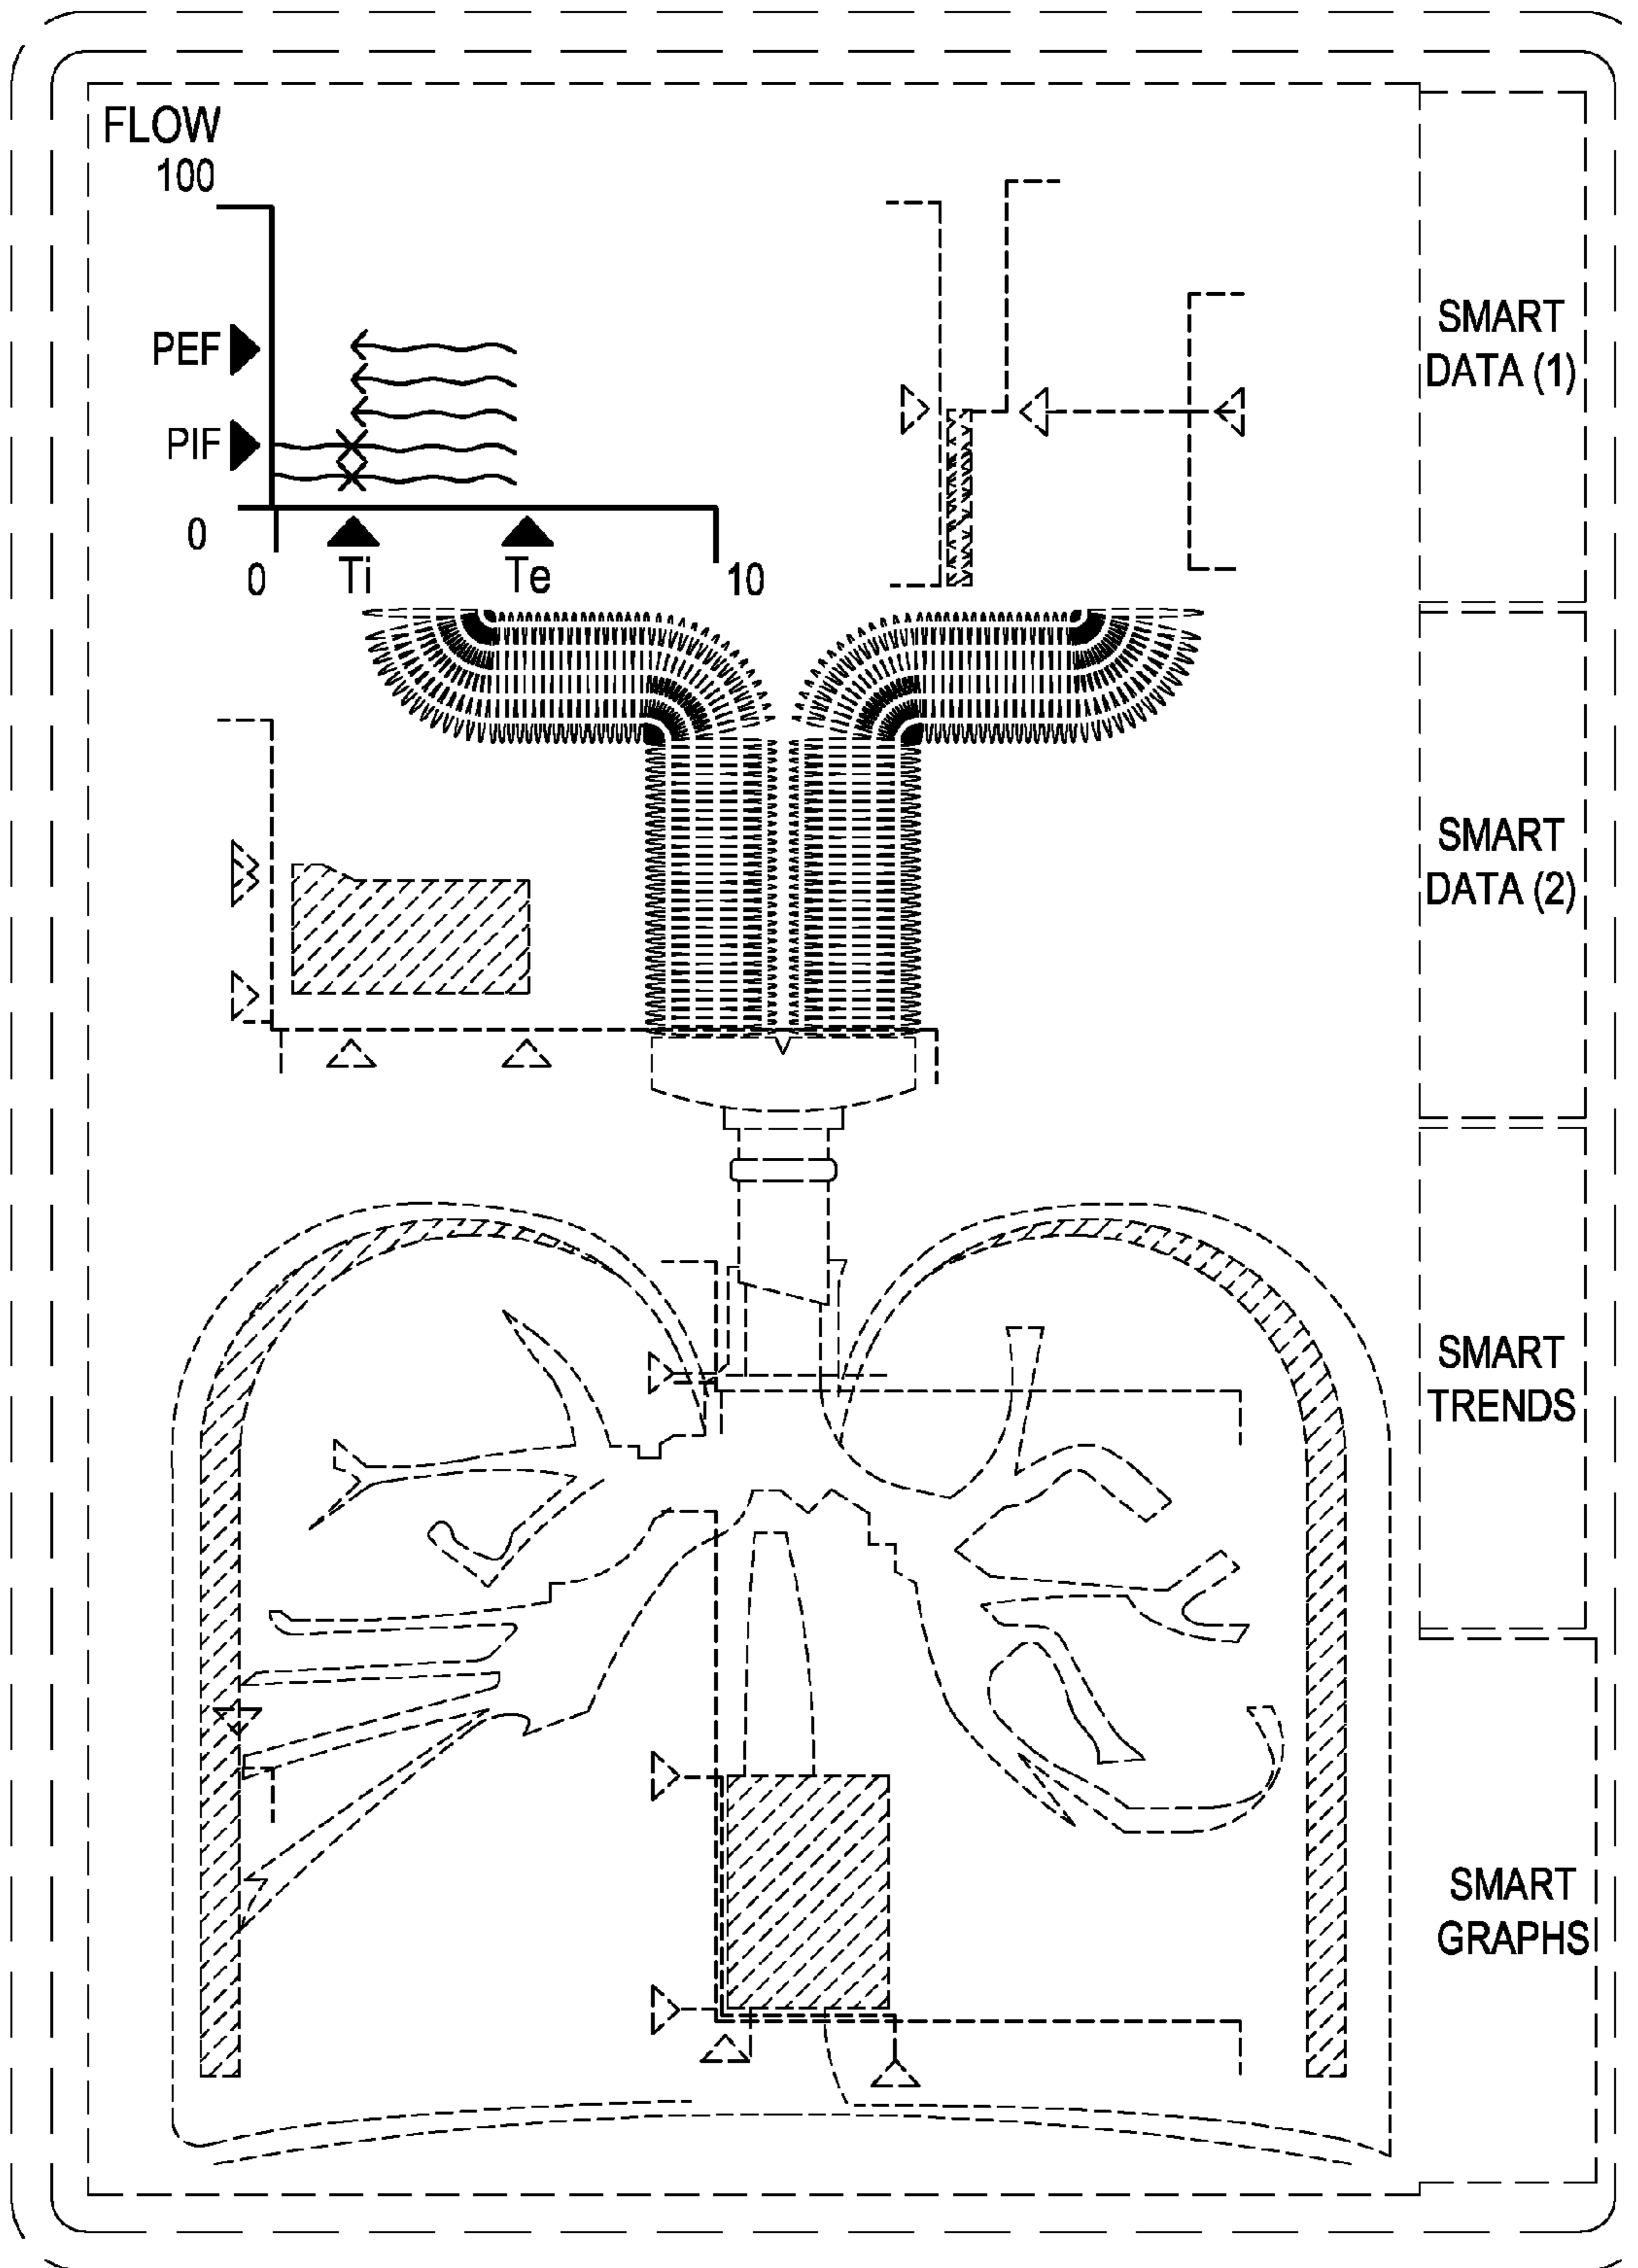

FIG. 4
