(57) **CLAIM**

The ornamental design for an array of hip, ridge or rake roofing shingles, as shown and described.

**DESCRIPTION**

FIG. 1 is a front, top and left side perspective view of a first embodiment of an array of hip, ridge or rake roofing shingles showing our new design;

FIG. 2 is a right side view of the array of shingles of FIG. 1. The left side illustration is a mirror image thereof.

FIG. 3 is a left end view of the array of shingles of FIG. 2.

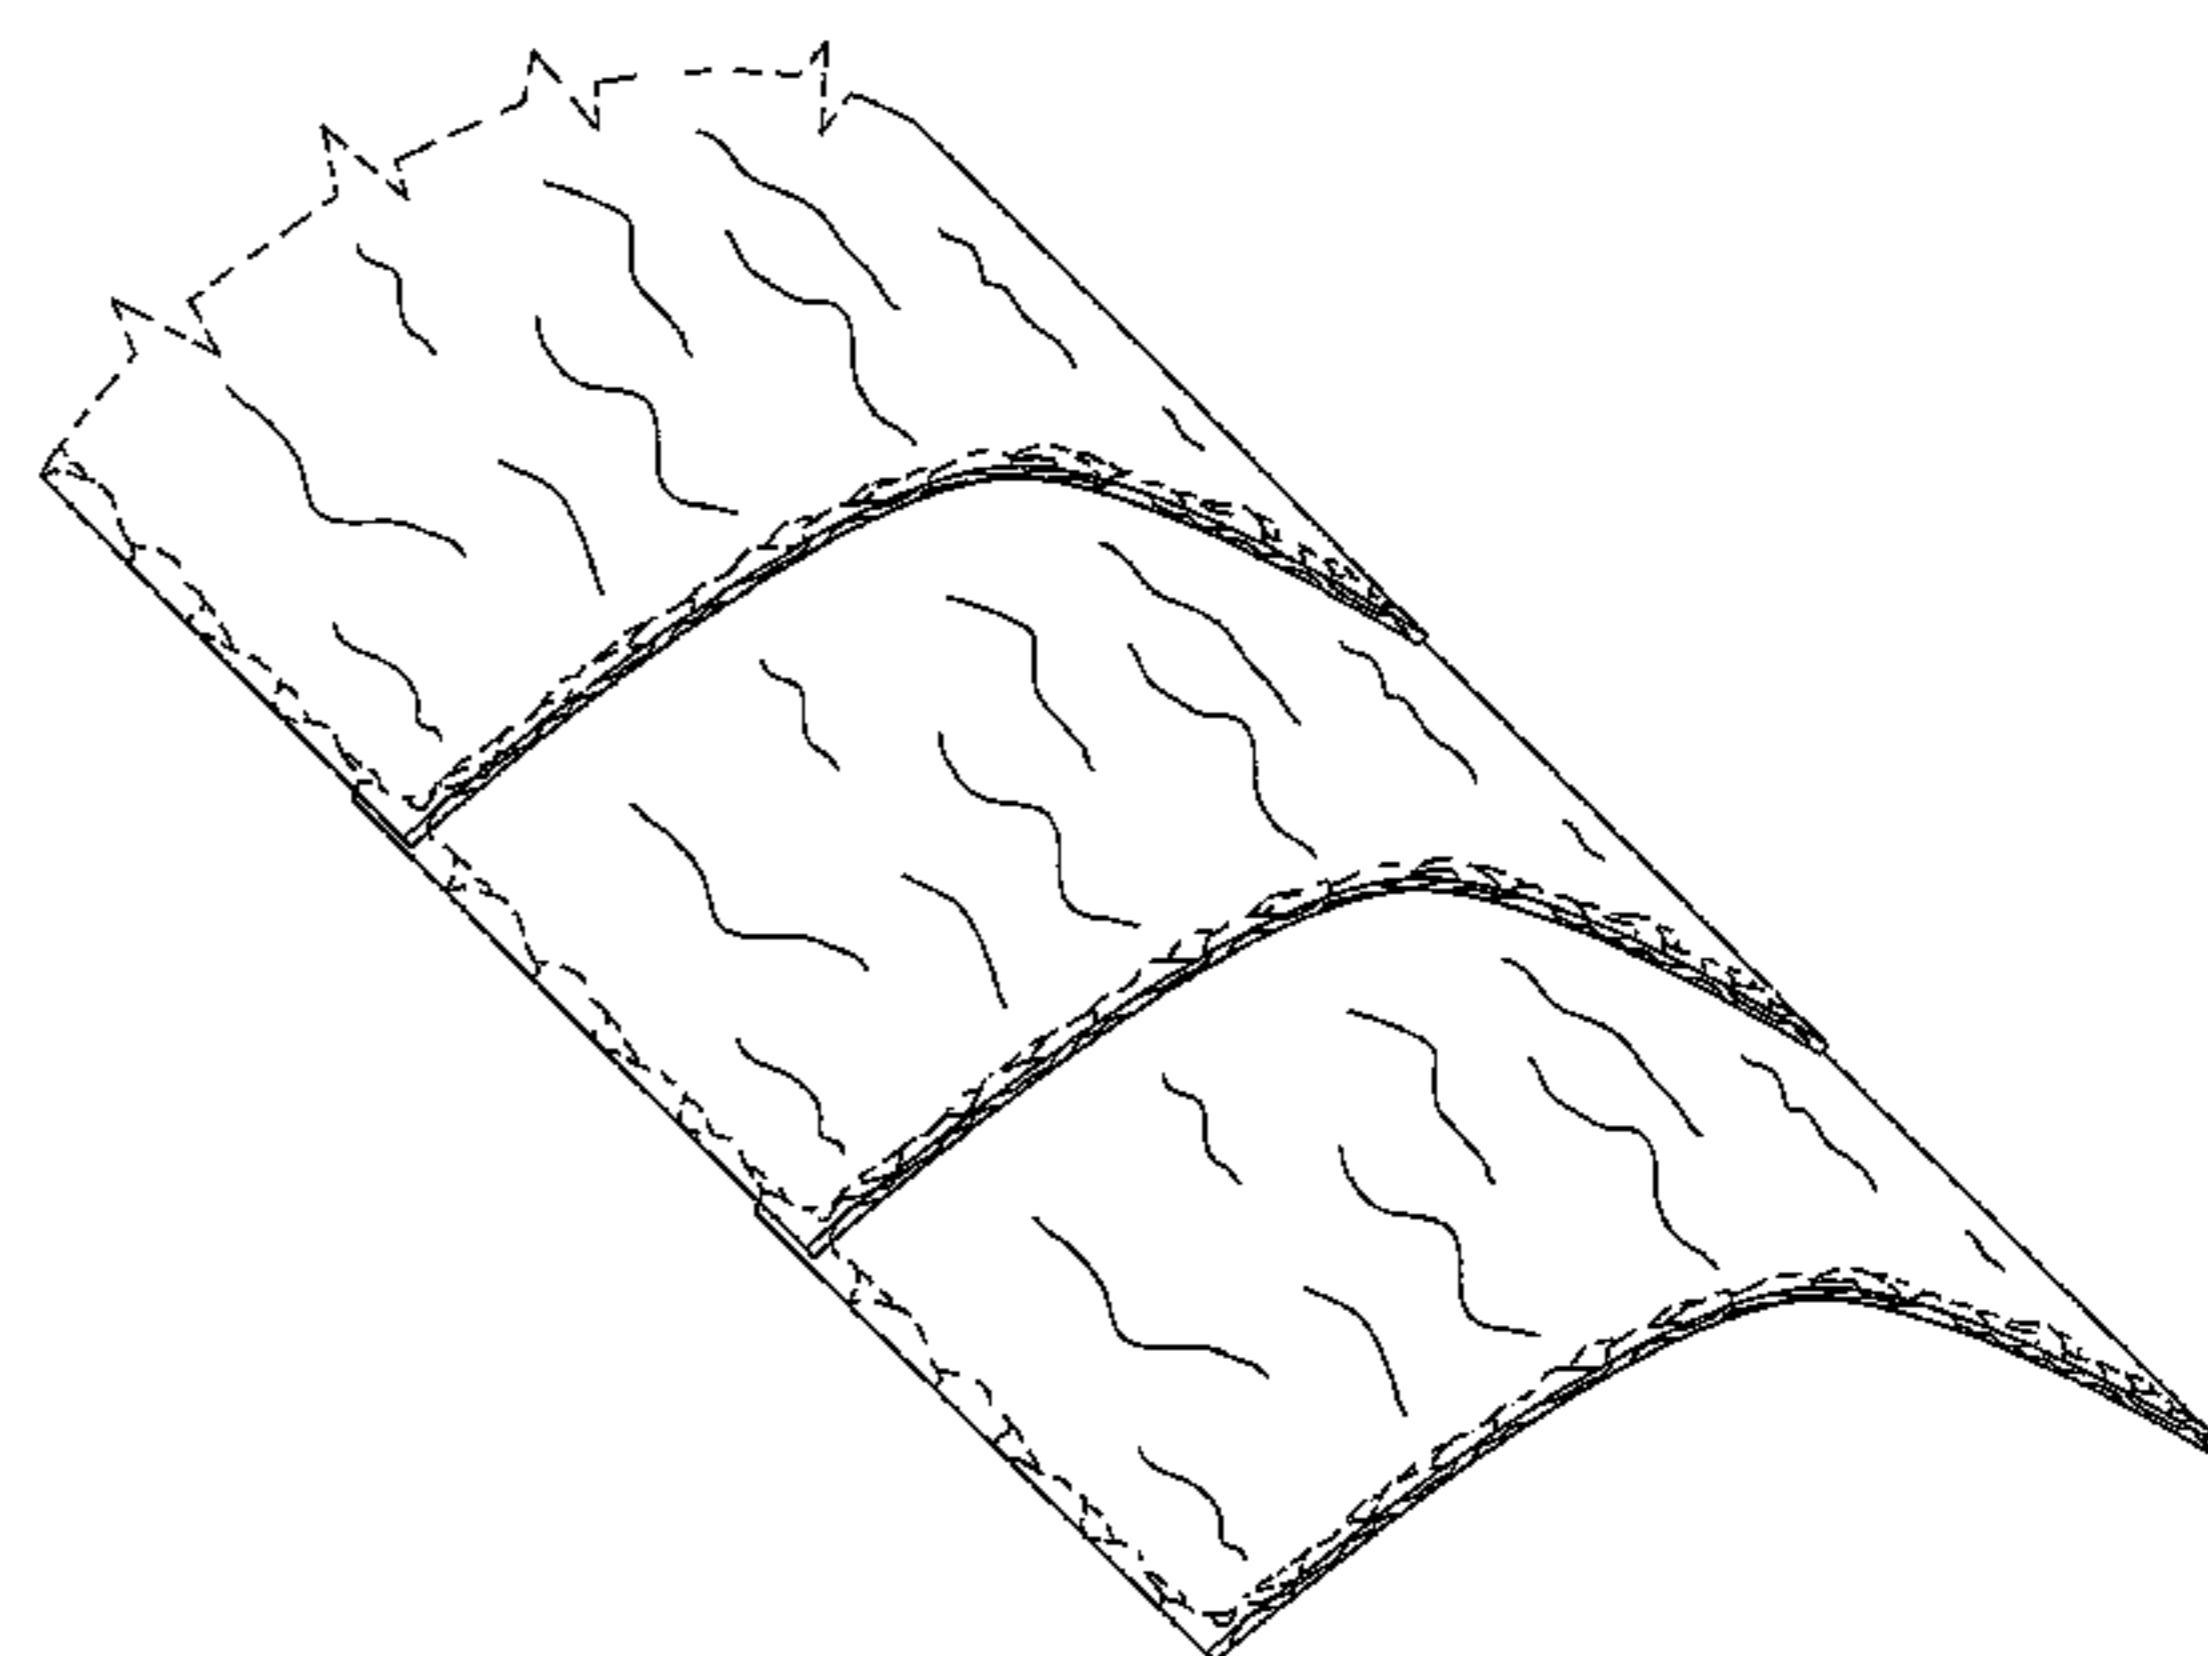

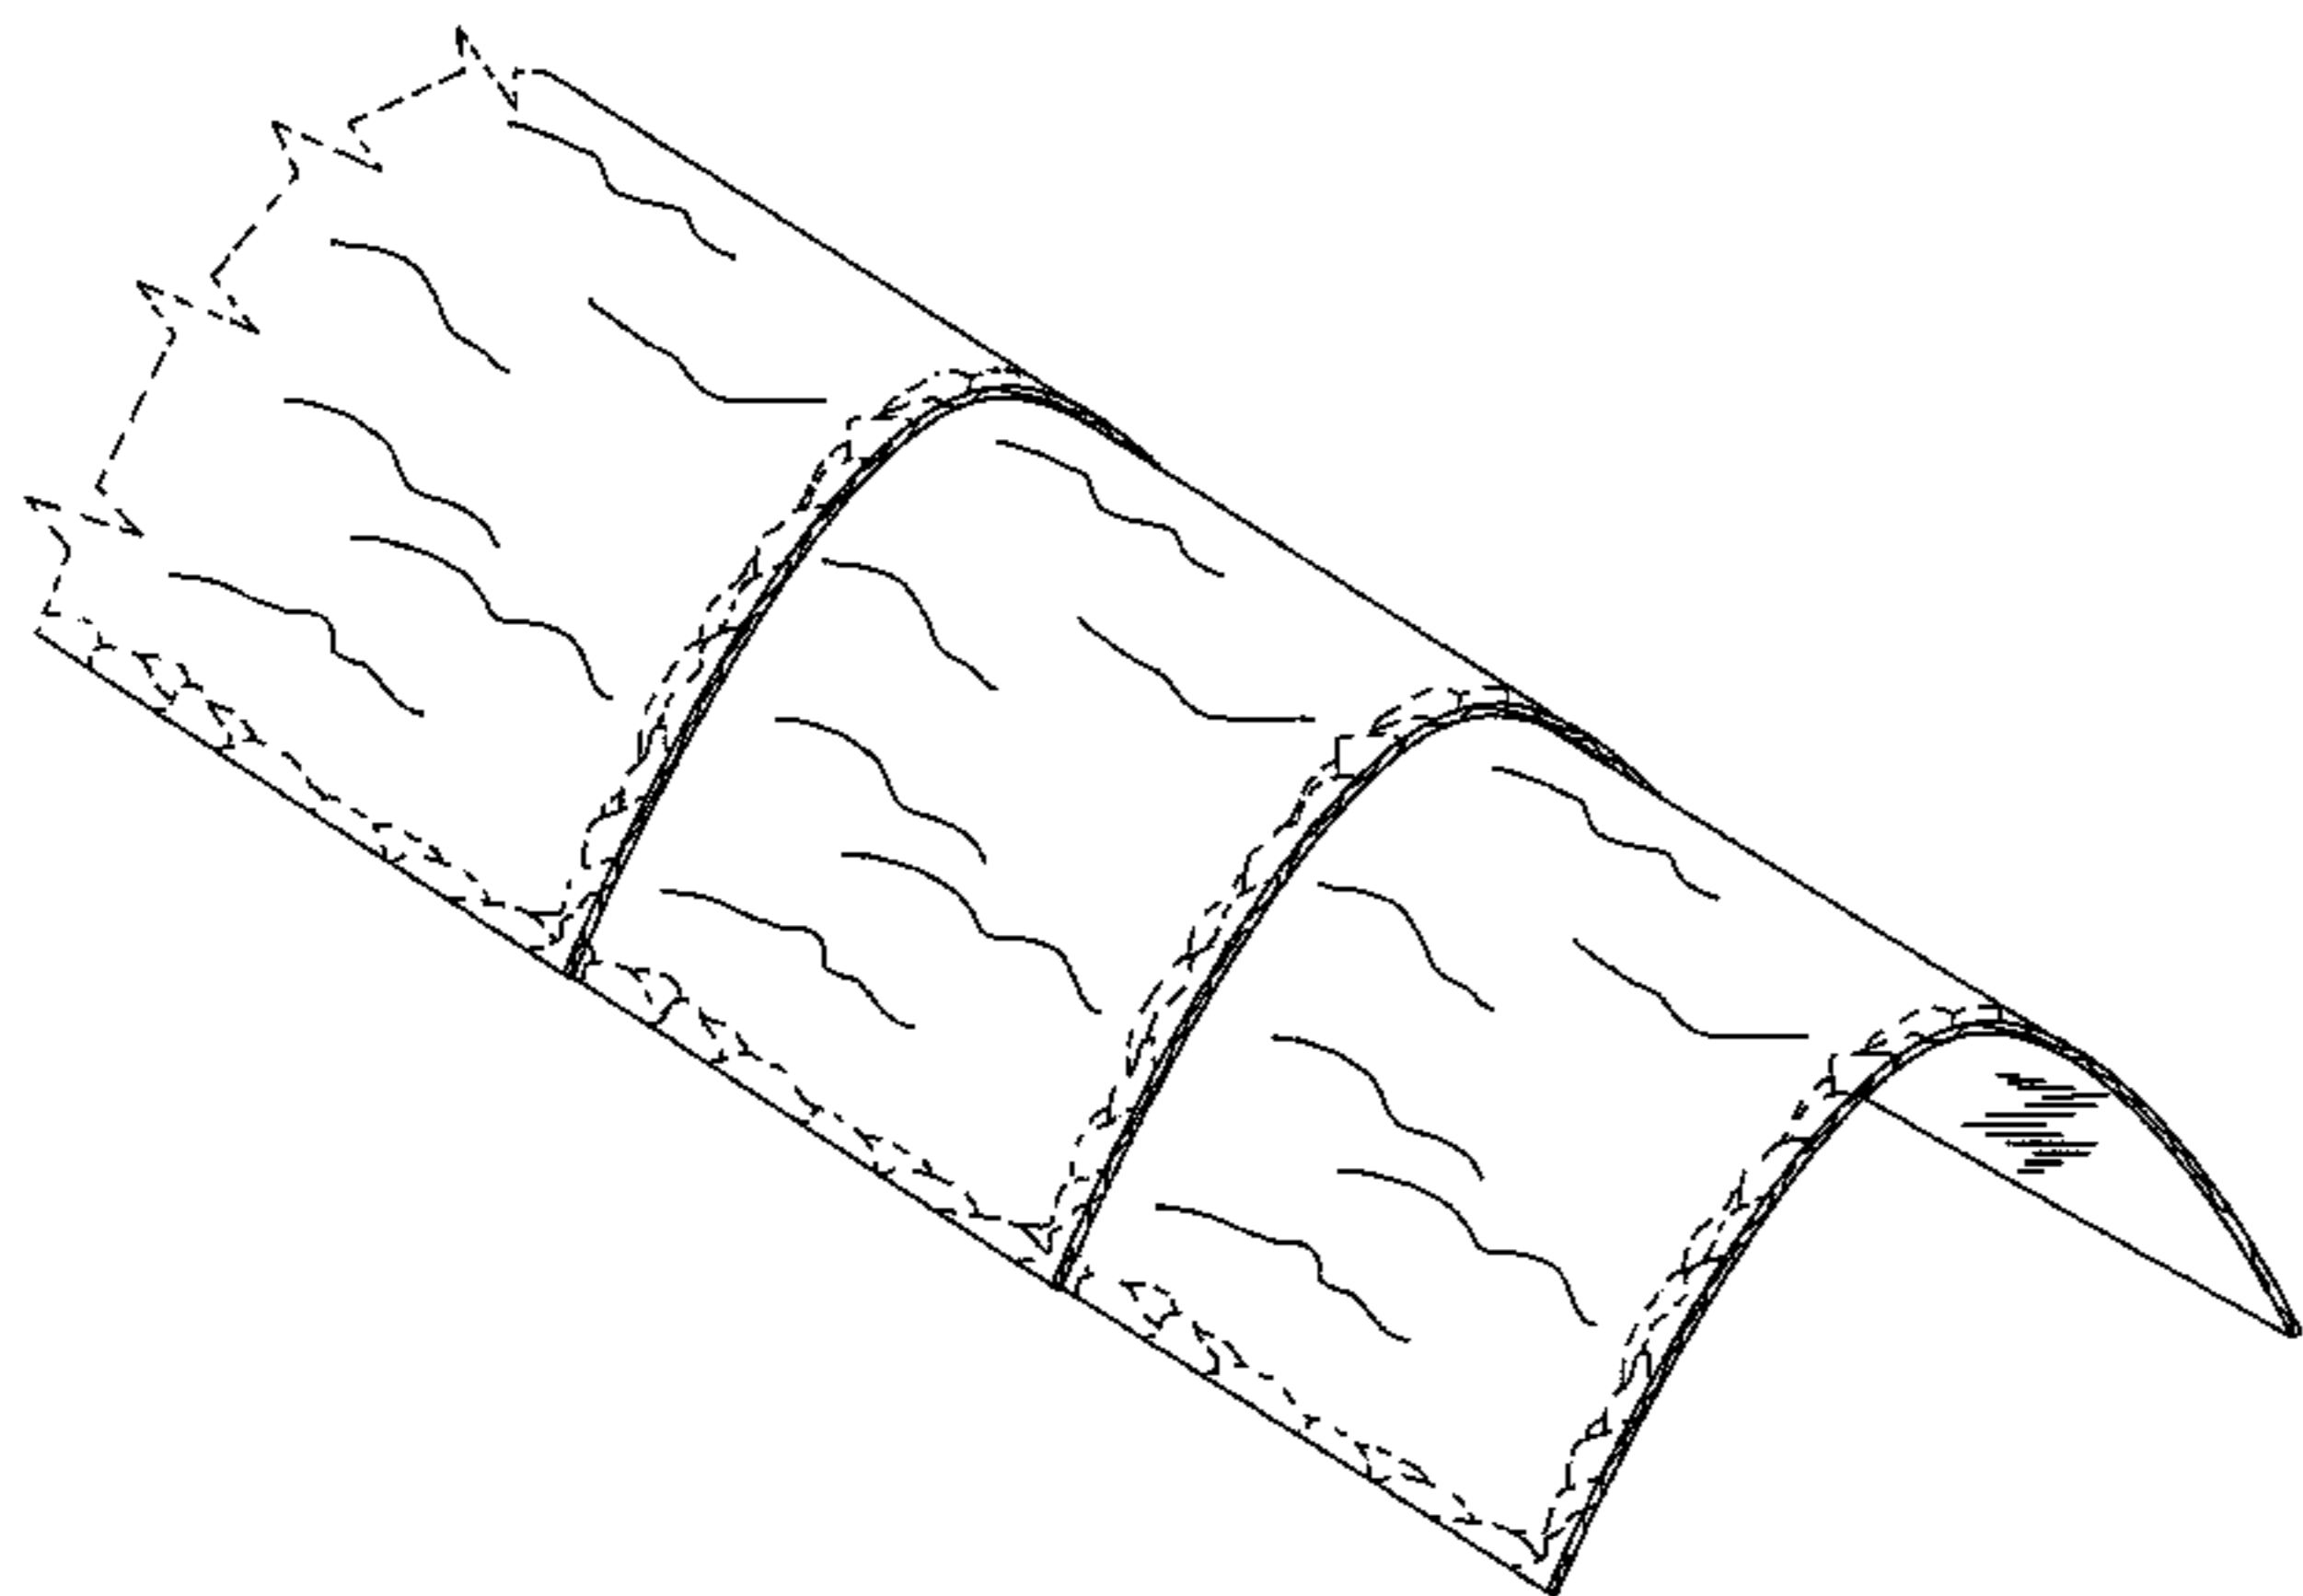

FIG. 4 is a front, top and left side perspective view of a second embodiment of an array of hip, ridge or rake roofing shingles showing our new design. The right side view of the array of shingles of FIG. 4 is comparable to FIG. 2; and,

FIG. 5 is a right end view of the array of shingles of FIG. 4. The irregular lines on the top, right, left and edge surfaces are to illustrate surface irregularities generally.

The broken lines do not form part of the design, but are environment only.

FIGS. 1 and 4 are shown broken away, with the broken line portions seen in other views removed, so that these views will fit on the drawing sheet.
