See application file for complete search history.

FIG. 1 is a perspective view of the flashlight as seen from the
front, top, right side;

FIG. 2 is a top plan view of the flashlight of FIG. 1;

FIG. 3 is a right side elevational view of the flashlight of FIG.
1, the other side elevational view being a mirror image
thereof;

FIG. 4 is a perspective view of a second embodiment of the
flashlight, as seen from the front, top, right side;

FIG. 5 is a top plan view of the flashlight of FIG. 4; and,

FIG. 6 is a right side elevational view of the flashlight of FIG.
4, the other side elevational view being a mirror image
thereof.

The dense stippling represents a surface having a color that
contrasts with the color of the surface including the sparse
stippling. The surface including the sparse stippling has a
color that also contrasts with the surface that does not include
stippling. The surface that does not include stippling can have
the same color or a different color from the surface that
includes the dense stippling.

The uniform broken line defines a bound of the claimed
design and forms no part thereof. The non-uniform broken
lines showing the remainder of the flashlight are for illustra-
tive purposes only and form no part of the claimed design.
