(57) **CLAIM**

The ornamental design for a misting array frame structure, as shown and described.

DESCRIPTION

This application is related to the following co-pending applications: application Ser. No. 12/787,243, filed May 25, 2010 and entitled Removable Misting Array for an Abatement System; application Ser. No. 12/787,374, filed May 25, 2010 and entitled System and Method for Repairing or Servicing a Misting Array Assembly of an Abatement System; application Ser. No. 12/787,372, filed May 25, 2010 and entitled Misting Array Assembly Having Adjustable Nozzles; application Ser. No. 12/787,373, filed May 25, 2010 and entitled Misting Array Assembly Having Upwardly and Downwardly Disposed Nozzles; application Ser. No. 29/362,440, filed May 25, 2010 and entitled Nozzle Tubing Having Offset Nozzles; application Ser. No. 29/362,443, filed May 25, 2010 and also entitled Nozzle Tubing Having Offset Nozzles; and application Ser. No. 29/362,442, filed May 25, 2010 and entitled Sealing Structure for Blocking an Opening.

FIG. 1 is a front upper perspective view of a misting array frame structure of the present invention;

FIG. 2 is a rear upper perspective view of the misting array frame structure of FIG. 1;

FIG. 3 is a front plan view of the misting array frame structure of FIG. 1;

FIG. 4 is a left side view of the misting array frame structure of FIG. 1;

FIG. 5 is a right side view of the misting array frame structure of FIG. 1;

FIG. 6 is a rear plan view of the misting array frame structure of FIG. 1;

FIG. 7 is a top view of the misting array frame structure of FIG. 1; and,

FIG. 8 is a bottom view of the misting array frame structure of FIG. 1.

The broken lines showing environmental structure are for illustrative purposes only and form no part of the claimed design.
