DESCRIPTION

FIG. 1 is a left-side elevational view of a sliding door peephole cover, with the sliding door in an open position, constituting my invention, the right-side elevational view being a mirror image of the left-side elevational view; FIG. 2 is a front view of the cover illustrated in FIG. 1, with the sliding door in an open position; FIG. 3 is a rear perspective view of the cover illustrated in FIGS. 1-2, showing the rear face of the cover with the sliding door in the open position; FIG. 4 is a front view of the cover illustrated in FIGS. 1-3 with the sliding door in an open position; FIG. 5 is a rear view of the cover illustrated in FIGS. 1-4 with the sliding door in a closed position; FIG. 6 is a rear view of the sliding door illustrated in FIGS. 1-5; FIG. 7 is a left-side elevational view of the sliding door illustrated in FIGS. 1-6, the right-side elevational view being a mirror image of the left-side elevational view; FIG. 8 is a front perspective view of the sliding door of FIGS.

FIG. 9 is a front perspective view of the cover illustrated in FIGS. 1-5 with the sliding door removed; FIG. 10 is a front perspective view of the cover illustrated in FIGS. 1-9 with the sliding door in a closed position; FIG. 11 is a bottom view of the cover illustrated in FIGS. 1-10 with the sliding door in a closed position; and, FIG. 12 is a side view of the cover illustrated in FIGS. 1-11 with the sliding door in a closed position. The broken lines shown in the drawings represent unclaimed portions of the sliding door peephole cover and environmental structure and form no part of the claimed design.
